Appendix 4.4b: NARRATIVE TASK: SWEET HOME (LISTENER’S COPY)

IMAGE REDACTED DUE TO THIRD PARTY RIGHTS OR OTHER LEGAL ISSUES
Appendix 4.5: Instructions for Task Implementation

1. Instructions for the Descriptive Task: Describer’s copy

Introduction:

Each of you will be given a set of pictures. One of the sets is composed of 5 jumbled pictures with minor differences between them; and the other is the master copy showing the correct order of your partner’s 5 jumbled pictures.

Instructions for the Describer:

This activity will take around 15 minutes.

You will be given the master copy showing the correct order of your partner’s 5 jumbled (randomly arranged) pictures.

Your task is to describe the 5 pictures in the master copy to your partner so that he/she can order them according to the sequence in which you describe them.

Because the pictures are quite similar to each other, your partner needs as an accurate description as possible in order to decide on the correct order of the pictures. You can ask each other questions during the description of the pictures.

STEP 1:

You will be given a set of pictures, which are all in the right order.

Please try to see the differences between the pictures so that you can give a fuller description of them to your partner.
STEP 2: (for Planning condition ONLY)

You have 10 minutes to prepare for the task, and plan how you are going to describe the features of the objects in the pictures.

You will be given a scratch paper and a pencil to take notes, or to do anything else you wish to prepare for the task.

Please do not write full sentences on your scratch paper. You will not be able to look at your paper while you’re doing the task.

STEP 3:

You have to provide a good description of the pictures for your partner, so that he/she finds out the order in which the pictures are organised in the master copy.

Please try to use only English in your descriptions, and to be clear and specific about the features and functions of the objects, so that your partner can find out the correct order.

THANKS A LOT FOR YOUR COOPERATION!
2. Instructions for the Descriptive Task: Picture Sorter's Copy

Introduction:

Each of you will be given a set of pictures. One of the sets is composed of 5 jumbled pictures with minor differences between them; and the other is the master copy showing the correct order of your partner's 5 jumbled pictures.

Instructions for the Picture Sorter:

This activity will take around 15 minutes.

You will be given a set of 5 jumbled pictures (randomly arranged pictures) with minor differences between them.

Your task is to order the jumbled pictures according to the sequence in which they are described to you.

Because the pictures are quite similar to each other, you need as an accurate description as possible in order to decide on the correct order of the pictures. You can ask each other questions during the description of the pictures.

STEP 1:

You will be given a set of 5 jumbled (randomly arranged) pictures.

Look at the pictures carefully and try to find out the right order.

STEP 2: (for Planning condition ONLY)

You have 10 minutes to prepare for the task, and plan how you are going to order the objects in the pictures.
You will be given a scratch paper and a pencil to take notes, or to do anything else you wish to prepare for the task.

Please do not write full sentences on your scratch paper. You will not be able to look at your paper while you’re doing the task.

STEP 3:

You can ask your partner questions when you find the descriptions unclear in order to find out the correct order.

Please try to use only English.

THANKS A LOT FOR YOUR COOPERATION!
3. Instructions for the Narrative Task: Speaker’s Copy

Introduction:

Each of you will be given a task to do. One of you will tell a story based on a series of pictures while the other listens and does a task based on the information s/he hears.

Instructions for the Speaker:

This activity will take around 15 minutes.

Your task is to tell a story to your partner.

You will have the story in pictures; but your partner has only a set of pictures, and has to decide on which pictures belong to the story and in which order the things in his/her pictures happened.

Your partner needs to get the complete story from you, but cannot ask you questions or interrupt you. Therefore, try your best when you tell the story, so that he/she can successfully do his/her task as a listener.

STEP 1:

You will be shown a story in pictures. Please try to fully understand what happens in the pictures, so that you can later tell your partner the right information.

Try to construct a story which has a beginning, a development and an end. Do not just describe the pictures independent of each other.

STEP 2: (for Planning condition ONLY)

You have 10 minutes to prepare your story, and plan how you are going to tell the story to your partner.
You will be given a scratch paper and a pencil to take notes, or to do anything else you wish to prepare the story.

Please do not write full sentences on your scratch paper. You will not be able to look at your paper while you’re telling the story.

STEP 3:

You have to tell the story to your partner, so that he/she finds out which of the pictures that he/she has belong to the story, and the order in which things happened.

Please try to use only English in your story, and to be clear and specific, so that your partner can find out about his/her pictures.

THANKS A LOT FOR YOUR COOPERATION!
4. Instructions for the Narrative Task: Listener’s Copy

Introduction:

Each of you will be given a task to do. One of you will tell a story based on a series of pictures while the other listens and does a task based on the information s/he hears.

Instructions for the Listener:

This activity will take around 15 minutes.

Your task is to listen to your partner telling a story, and to match some pictures with the story you are told.

You will be given a set of 5 pictures, but not all of them belong to the story your partner is going to tell you.

You have to listen to your partner’s story and try to find out which pictures belong to the story, and in what order things happened. You cannot interrupt your partner, or ask any questions.

STEP 1:

Look carefully at your pictures while you’re listening to your partner. Do not interrupt, ask questions, or interact with your partner in any way. Just listen silently to her story, and decide which pictures really belong to the story, and in what order things in the pictures happened, according to your partner.

STEP 2:

Put a check next to the pictures that belong to the story you have just heard, and put a number indicating in which order things happened. If you are not sure, you can put a check and write a number, and add a question mark, but please try to guess.
STEP 3:

You will check your answers when you have just heard the story from your partner.

THANKS A LOT FOR YOUR COOPERATION!
Appendix 4.6: The Retrospective Semi-structured Interview

Introduction: I am researching into lexis and I am interested in how well you use words. This is NOT a test! The more honest you are about your answers, the more reliable the results will be.

Notes for researcher: Learners look at the pictures/stories while talking about their performances throughout the protocol session.

PART I: General impressions

1. What did you think of the task and your performance?
2. What general factors affected your performance?

PART II: Accurate use vs. risk-taking

A) Successful use of words/phrases perceived as difficult

i) accurate/well-formed use

3. Which difficult words/phrases (i.e. not simple ones like book, pencil, etc.) did you use accurately/correctly? (i.e. difficult words/phrases for you).

ii) risk-taking (i.e. words/phrases which were hard for them to retrieve or formulate on-line for whatever reason)

4. Did you use any words/phrases despite the risk of making a mistake? (i.e. words/phrases whose meanings you were not sure about; words/phrases that you took risks with).

273
iii) Replacement

5. Did you use any alternative words/phrases instead of those you could not think of or remember? (i.e. Did you replace any words/phrases?)

iv) Avoidance

6. Did you choose not to use any words/phrases because you were afraid of making a mistake or causing misunderstanding and therefore chose to use more familiar ones? (i.e. Did you avoid using any words/phrases because you were afraid of making a mistake or causing misunderstanding?)

Instruction: Now please listen to your recorded oral production while looking at the pictures or stories and give examples of words/phrases as they apply to the above situations (i.e. questions 3-6).

*Please note such words/phrases on your scratch paper while listening to the recording:

3. difficult words/phrases used correctly: ...........
4. Risky words/phrases used: ...........
5. Replaced words/phrases: ...........
6. Avoided words/phrases: ...........

B) Questions about problems encountered (open-ended types of questions)

Lead-in: What sort of problems did you have with words/phrases while doing the task?

7. What kind of trouble did you have using difficult words/phrases? In what way(s) did you feel bad or comfortable about using difficult words/phrases?
Questions 7 (a), (b), and (c) below apply ONLY to the +Planning condition.

-Planning

(a) What about planning? Did you use the planning time?
(b) Did it help? How?
  - Did it help in terms of words/phrases?
  - Did you use any of the words/phrases you noted or thought of using during the planning stage? If yes, which ones?
  - Did you use any words/phrases you had planned to use but are not written on you scratch paper? Examples?
(c) Did you make any changes to your plans during the task (i.e. while doing the task)? If yes, what kind of changes did you make?
  - Did you make any changes to the words/phrases you had planned to use? Did you add any to those you had planned to use while doing the task? Examples?
  - How did these changes affect your performance and the completion of the task?

Questions 7 (d) and (e) below apply ONLY to the -Planning condition.

-Planning

(d) Do you think you would have performed better if you had had planning time? Why? Why not?
(e) Would you have used better words/phrases if you had had time to plan? Why? Why not?

The following applies to the Descriptive task ONLY.
PART III: Interaction (i.e. Descriptive task)

8. Did you receive any help from your partner with vocabulary use?
   (Note for the researcher: Confirm with 'picture sorter', too.)

9. How did your partner help you when you had difficulty with a word or phrase?
   (Note for the researcher: Confirm with 'picture sorter', too.)

10. Did your partner tell you any words/phrases that you could not think of? If yes, how many? Please specify (give examples).
    (Note for the researcher: Confirm with 'picture sorter', too)

The following questions [11 (a) and (b)] apply to the Descriptive task under +Planning condition ONLY.

11. Did your partner cause you to make any changes to your plan? If yes, ...
    a) what kind of changes did you make?
    b) how did these changes affect you performance and the completion of the task?

The following questions (12 and 13) apply to Descriptive Task ONLY.

PART IV: Interaction-acquisition: retention (after I/A is over and data checked through after a 4-week interval)

12. Do you remember the name(s) for that/those piece(s) of equipment/things/objects you talked about? Examples?

13. Do you remember how you described that/those piece(s) of equipment/things/objects you talked about? Examples?
PART V: General impressions and further opportunities to self-reflect

14. What other general factors affected your performance?

THANK YOU VERY MUCH FOR YOUR COOPERATION!

Gender: F-F
Task: -Des [Study]

O: Now, I’m starting with the first picture. ~Er, in the first picture ~er, there’s a library ~er which is ~er formed with ~er bricks ~er and there’re books on it. There’s a TV. Near the TV, there’s a ~er computer, which is covered with ~er plastic, I think. And ~er near the computer, there’s some equipment and I think on the equipment there’s a, actually I don’t know exactly, and in front of the computer there’s a chair, and on the chair, there’re some ~er jumpers,
N: $Shorts, I think.
*O: %jumpers, which are, %which are, %which are on the chair, %on the chair.
N: $~Mhm. Is there a mask?
O: No, there isn’t a mask. And also on the television, there’re some papers, and ~er there’re some, I think, pictures, which are near the ~er, %which are near the ~er chair.
N: ~Uhuh, in front of the chair.
O: $~Uhuh. Is it enough for first picture?
N: On the library, is there a ~er, ~er %is there a ballerina, %ballerina ~er?
O: Ballerina, no. There’s-there’re a lot of pencils, (alright) in a
N: $Picture? $Okay, okay.
O: ~Uhuh. In the second picture, there’s a mask on the library and also ~er there’s a pullover which is hanging over the chair, %hanging over the chair.
N: $Hanging over the chair.
O: And also the pictures are ~er in the, now against the library, pictures.
N: ~Mhm.
O: And the first picture is the one which, %which-on which ~er the right side is yellow, and there’re ~er blue x
N: $Blue x picture.
O: ~Uhuh. And the mask is white, white and it’s
N: Laughing.
O: Laughing, yes.
N: Okay, it’s enough. The third one?
O: And in the third one, the mask is ~er white too, and it’s-there’s a x.
N: Screaming?
O: White and screaming, yes, that’s the third one. The fourth one ~er, now the mask is black and it’s ~er, %it’s hanging, %hanging ~er at the top of the library, corner of the,
N: ~Uhuh.
*O: left corner and, is it (wrong)?
N: The picture is, %is this picture is yellow or not?
O: Yellow, and it’s against the library.
N: $Yellow. ~Uhuh.
O: And last one is, there’s also mask and it’s at the ~er third floor and also there’re pictures which are against the x (in you).
N: $Chair, x.
O: ~Uhuh.
N: Okay.
O: ~Uhuh.

Gender: F-F
Task: -Des [Kitchen]

R: There’s a kitchen and ~er it’s very untidy. There’re lots of things which are not in their right order. ~Mhm, we can see the oven, ~er the refrigerator and glasses, spoons,
etcetera. ~Er, this is in the first picture, and the !although it’s very untidy, it looks clean ~er, there’re spice-there’re spices, and we can see ~er lots of ~er, %lots of things which are in their ~er uncorrect places. In the second picture

G: $Excuse me, in the first picture, is there a kitchen scale?

R: Scale?

G: You, %you put things, ~er on it to weigh, %weigh, to weigh their &/kil/-kilogram.

R: $No, $there isn’t. I can’t see.

G: And in the second picture, ~er on the oven there’s a kettle and ~er there’re ~er colourful glasses on the ~er, on the cupboard and ~er there’s a cup for ~er, %for garlic, and to make salad there’s a tool here in the second picture.

R: ~Mhm. For lemon?

G: No, not for lemon, for carrots, to make salad.

R: Okay.

G: And there’s a cup, in it there’re spoons, which are made of wood.

R: ~Uhuh.

G: And near it ~er there’s, %there’s a ~er liquid for washing the dishes and that’s all.

R: ~Uhuh.

G: On the wall there’s a tool for cleaning the ~er #lavobo [=sink].

R: #Lavobo [=sink].

G: And in the third picture, ~er there’s a cup [=T. cezve] to ~er cook coffee in front of the oven,

R: ~Uhuh.

*G: and in front of it there’s a tool for lemon, it’s yellow, and@

R: ~Uhuh. Is the scale, kitchen scale on the oven or in front of the oven?

G: On the oven.

R: Okay.

G: ~Er also there’re dishes ~er on a cup, they’re waiting for drying, I think, and ~er, there’re spices on the-under the cupboard, and there’s a kettle again on the oven, and the ~er washing machine-dish machine is open.

R: Open, yes.
G: In the fourth picture, there’s a cup in front of the oven, which is full of biscuits, I think, in front of the oven there’s a kitchen scale also, and near it there’s a kettle, and the tools which are for coffee and lemon are near the biscuit cup. And

R: Last?

G: In the last picture, in the fifth one, the cup which is full of biscuits is on the oven, and near it there’s a tool to put liquid into a bottle which it

R: Mhm, is it on the oven?

G: On the oven, yes, near the biscuit cup.

R: Okay.

G: And there’s a spoon in front of the oven, which is white and I think made of plastic, and there’re two glasses, I think they are made of ceramic, near the other glass and there’re liquid for washing dishes, and also colourful glasses are under the cupboard, and again there’re dishes, they’re put to dry.

R: Okay.

G: That’s all.

Task: -Des [Study]

A: First, I start with first picture, in first picture, there isn’t, there isn’t a sweater on the chair, and there’s no mask on the library. Okay?

G: Uuhh.

A: And there’re some pictures, but they’re not on the library, they’re touching the chair.

G: Half of them are on the chair.

A: Chair, yeah.

G: And, and I can see the television clearly.

A: And there’s some papers on the television.

G: Yes, xx.
A: Okay, and its top of the television can be seen.
G: Okay, ~er yes, let’s go to the second one.
A: $And there’s something white in front of the television.
G: $Yeah, I, %I put the one under
the picture, and the second one I want.
A: Second one, there’s a blue sweater on the chair.
G: ~Uhuh.
A: Okay. There’s a mask.
G: Where?
A: It’s smiling. On the third floor
G: $Oh, what colour is it; %what colour is it?
A: White.
G: White.
A: ~Uhuh, white and smiling.
G: What is it looking (about), to me or to the right side?
A: To the right side, not to you.
G: Okay.
A: Okay?
G: And the pictures are, I think, on the library, under the library?
A: $Yes, %yes, yellow, light colours there.
G: Okay, let’s, %let’s go to the third one.
A: Third one, there’s again a sweater and you can see the half of the TV.
G: And the mask, what about the mask? What colour is it?
A: $~Er, towards you and (unsmiling) mask.
G: Okay.
A: Towards you and a white mask.
G: Okay, let’s go to fourth.
A: Fourth one, there’s a brown mask and ~er at the top, %top of the library.
G: $(Sweater)?
A: There’s no sweater.
G: Okay, finished.

Mus: Yes.
Mea: But &er there’s a, %a symbol, a, a kind of &er ceramic things &er a x.
Mus: $Is the mask over x.

309
Mea: Yes, over the, %over the-this symbol, %over the-this picture. And the last picture-photograph again there’s a mask, black mask, and again there’s a ceramic thing but this time the ceramic &/thi/-thing –er %thing is over the black mask.
Mus: Over or below?
Mea: Over, the –er %the symbol, I think, the symbol is over the black mask.
Mus: ~Mhm.
Mea: Okay?
Mus: ~Uhuh.

Dyad 47/Roles: Selcuk (desc) ↔ Mehmet (sort)
Gender: M-M
Task: -Des [Kitchen]

S: In the first picture, there’s a big chaos in the kitchen [laughing] –er, the x, first, in the table, I mean, in the –er platform, –er there’re a lot of things. There’s an oven, firstly. –Er on the oven –er I see, as far as I see, there’s a –er ketchup or something else, there’s a bottle of –er this thing, and I see some cookies on the platform, not on the oven.
M: Is there a –er something to cook tea or coffee? A device.
S: $Where?
M: On the oven.
S: On the oven, no. –Er I see a metal thing on the oven, which –er helps you to –er make vegetables or kind of things into-in its small pieces,
M: $–Uhuh.
*S: which (help) two things, and another –er gadget, can we say-we can say, a wooden gadget with a –er wooden again handle which makes you press things in it. And –er there’s also, –er a little distinguishing x, –er near the-in front of the oven, there’s a –er bottle, there’s an empty bottle, I think a whisky bottle, you know –er and some little saucepans –er on the platform, and on the platform a red –er cylinder black tool –er roll onions
M: $–Uhuh.
S: [laughing together], and on the platform, I said yes there’s—there’re some cookies
and@
M: Okay, tell the next picture.
S: In the second picture, on the &/plat/-the metal thing which was on the oven in next-
in the first picture is now on the table. Okay?
M: Okay.
S: This was xx. And also the wooden thing with handle is on
M: $Is there again a bottle in
-er again a bottle in
front of the oven?
S: Yes, of course, yes, ~uhuh, an empty whisky bottle. And ~er, there’s a different,
this time there’s a different appliance on the table, er@
M: Something like ~er x
S: $Something like
*M: cut the-make holes on the walls?
S: Yes, make holes on the walls, on the wall for ~er nails or something else, screws.
Yes? I think no need to describe this picture.
M: $Yes.
S: And third picture, there’s a pizza ~er on the oven, there’s a (delicious)@ and a kind
of ~er weight machine.
M: $Is there a screwdriver?
S: Screwdriver? No. Again there’s a—there’s that electrical appliance on the table
again, and ~er on the shelf ~er I can see, on the second shelf, I mean not the first, the
second shelf I can see a red ~er, no a green ~er kettle, %a green kettle xx
M: $~Uuhh. $Is something like
S: A pizza on the oven.
M: $No, is something like garlic or onion is hanged on the cupboard or@
S: Cupboard?
M: $Cupboard.
S: ~Ah, yes, ~uhuh.
M: Okay.
S: Just from the top, just near the kettle.
M: $Which one ~er? Just near the kettle?
M: $~Okay.
S: And, %and a kind of brush is hanged on the wall, an orange brush.
M: Orange?
S: Brush, ~uhuh.
M: Brush.
S: Brush kind of thing, ~uhuh, yes.
M: And is there a green ~er something, no not kettle, but something like ~er
S: $Kettle?
*M: x houses.
S: $Again brush?
M: Something like brush, ~er it’s the same kind.
S: $No, it’s not hanged on the wall. Only orange brush, and, %and also on the table there’s an orange juicer.
M: ~Ah, I see.
S: Maybe lemon.
M: Yes, is there again something like a device ~er to cut the holes, yes?
S: Cut holes, yes. ~Uuh, yes.
M: Is it on the table?
S: Yes, on the, it’s on the table.
M: $Near the, %near the tap.
S: Near the tap? Yes, ~uhuh. Fourth picture
M: $Okay.
*S: this time, yes, this time ~er the green brush is on the wall. Okay?
M: $~Uuh.
S: Again the green kettle is ~er on the top shelf, but this time the, %the ~er onion kind of thing is not hanged on the first shelf, okay? In the top shelf, #pardon [=sorry].
M: Okay.
S: On the second floor, you can say. The oven again, ~er this, %this time there isn’t any bottle, %there isn’t any bottle. And is seen as the third picture. Okay? xx
M: $Is there $~Er is there something like ~er ~er measure the weight of
S: $Weight, %weight of something, in front of the oven.
M: ~Uuh, in front of the oven.
S: Yeah. Again the orange juicer kind of thing.
S: And the last picture, the cookies are on the oven.
M: Okay.
S: Again there isn’t an empty bottle. There isn’t—there’s the ~er green brush on the wall and the green kettle on the top shelf.
M: Is ~er tea cooker seen on the oven?
S: Tea cooker?
M: Big oven, not the microwave oven but@
S: Yes, on the oven there’s a big x. The ~ah, !I want to say the order of the greens—order of the colours of the cups on the first shelf.
M: ~Uhuh.
S: There’re four cups, you see?
M: Yes, I see.
S: The order is ~er purple, light purple, ~er dark blue,
M: $Pink, blue.
*S: yellow.
M: Okay.
S: I think that’s a different order, I think. And you can see them easily.
M: $Yeah.
S: front of them there isn’t anything.
M: ~Uhuh.

Mur: Again there’s a bottle?
Mer: ~Uhuh, glass bottle near the oven, yes. And —er you see that in first picture
there’s something that you use to clean dishes or things like that, near the cloth, near
the heart+shaped cloth —er green thing, it’s on the glasses in the second picture,
Mur: $Okay. $Okay. On the second?
Mer: ~Uhuh, near the sink. And (there) you see —er@ ...
Mur: You can tell the third one.
Mer: Okay, did you understand the second, —ah you see in the third picture, a kitchen
balancer on the oven.
Mur: Okay.
Mer: And —er the thing is not there anymore on the pizza, you see in the first picture I
said something on the pizza, it’s not there anymore, not even near the oven.
Mur: $Yes, yes, I x.
Mer: And —er the thing that I said near the sink —er I said you make holes in the@
Mur: Okay.
Mer: Near the sink, I said, it’s still there, and there’s something you use to make
lemon juice near the sink.

328
Mur: $Okay.
Mer: And again the &/tE/-the cloth is on the dishes, and near it there’s a heart+shaped cloth again, and then ~er ~ah, the teapot and the kettle’s places are changed, it’s at the back side of the oven, and ... what else? ~Ah, the bottle, no, not the bottle-the can that you put your spoons and things like that is near the sink, is not there anymore either.
Mur: Okay. And is there something, ~er on the oven, a white thing?
Mer: Oven? ~Mhm, just a kitchen balancer and pizza. And ~er x [giggling]
Mur: In the third picture, is there a something you make ~er the-you make holes in the wall?
Mer: Yes, it’s still there, near the sink.
Mur: $Okay, %okay, %okay.
Mer: That’s all.
Mur: Okay.
Mer: Shall I go to different picture?
Mur: $Yes.
Mer: And the, I said, ball+shaped garlics, over the oven, I said,
Mur: $Okay.
Mer: It is places-it’s place is changed, it’s taken away, and you see, I said a green thing on the glasses near the sink, a green thing that you clean the dishes.
Mur: $Okay. $Okay.
Mer: It is in its place, in its back, %back place.
Mur: $Okay.
Mer: And the lemon juice-the thing you make lemon juice is again near the sink, and ~er the kitchen balancer is near the oven anymore and, you see, I said it’s on the oven, the kitchen balancer is on the oven I said.
Mur: Okay.
Mer: It’s not there anymore, it’s near the oven.
Mur: Okay, I see. And is there something to eat on the oven or near the oven?
Mer: $~Uhuh. Near the oven.
Mur: Okay.
Mer: In one of-I said in the second and third picture, there’s a cloth on the dishes near the balcony.
Mur: Yes.
Mer: It isn’t in its place anymore, and the heart-shaped cloth is not in its place anymore either. And –er what else? That’s all, I think you understood.
Mur: Okay.
Mer: And the fifth picture, x I think there’s tea in it, a can, a metal can, near the sink.
Mur: Okay. Okay.
Mer: And –er the cookies are on the oven, and –mhm the heart-shaped cloth is near the kettle and the teapot, in the fourth and the fifth picture.
Mur: Okay.
Mer: What else?
Mur: There isn’t something to make a hole in the wall?
Mer: –Uhuh, –uhuh, anymore. In the fourth and the fifth picture. –Er
Mur: There isn’t something for making lemon juice?
Mer: –Uhuh, –uhuh, –uhuh. Yes, that’s right. That’s all.

E: And there’s ~er two pictures that have no sweater, blue sweater kind of thing ~er put on. You see them?
C: Sweater?
E: No sweater, the two chairs that has no sweater on-hanged on.
C: ~Mhm, yes.
E: These are the first and the fourth ones. And you see the sculpture in one picture, the ones that have sweater on? On the bookstore, there’s a kind of sculpture head.
C: Mask?
E: Yeah, mask. That’s better, yeah mask. The one that mask is on is the number four.
C: Number four.
E: And the one there’s no mask is number one.
C: Number one.
E: And, ready? And the,
C: $There@
*E: %the rest are second, third and the fifth, and ~er
C: $There’s a $Second, (third)?
E: Yeah, I’m going to tell the difference. First, I’m going to tell the difference of the second one. You see the paintings? ~Er, yeah, there’s two blue one that you can see.

C: $Yes. $Yes.

*E: and one yellow. The one that you see, the yellow one is number two.

C: Okay.

E: And ~er the rest is three and five, and I’ll tell you the difference, ~er again, you-can you see the masks?

C: Yes.

E: $And one is white, and the other one is black, kind of black. ~Er the one-the white one is number three, and the other one is number five.

C: [nodding to confirm he’s finished]

Dyad 45/Roles: Zafer (desc) ⇔ Ibrahim (sort)

Gender: M-M

Task: +Des [Study]

Z: Well, let’s start with two pictures in which the blue sweater is not on the chair. These are picture one and picture four. Did you find them?

I: Yes.

Z: ~Er in picture four, the dark ~er mask is on the cupboard, on the left side.

I: Yes, I’ve found (it).

Z: The one which doesn’t have a mask is picture one.

I: Okay.

Z: Okay? ~Er, in picture two you can see the funny smiling white mask on the cupboard. On the left side.

I: Also sweater.

Z: Yes, also sweater is on the chair, and there’s a painting which has more yellow

I: $xx

*Z: colours. Yes, ~er and in picture three, there’s a frightened face.

I: $–Uuhh. (White) mask?

Z: Mask, of course mask on the cupboard. And the picture five has dark,
I:

*Z: ugly mask on the left side.
I: And a woman?
Z: And a woman on it, yeah. That’s all I think.
I: I’ve found them. Congratulations.

Task: -Nar [Skiing]

EZ: ~Er, one day, Suzy decided to go on a holiday, ~er up to the mountains, and while she was driving, it began to snow. Then ~er she, %she went into a &/hot/-hotel. ~Er, she liked skiing too much-very much. ~Er, after a few, %after a few hours she, %she began-she wanted to go skiing. She went to skiing but she had an accident unfortunately, ~er because she wasn’t good at it, ~er then she, %she, %she fell and ~er I think &/sh/-she broke his leg-she broke her leg, ~er and she was in somewhere that she didn’t know, ~er then she walked a few kilometers with the broken leg, then she saw a car and she stopped it ~er and want, %want the driver to take her to the hotel, ~er then she-the driver was handsome, I think, [laughing], ~er they fell in love with each other, and ~er he take her to the hotel ~er, they, %they fell in love, I said it before, and ~er they, %they &/sl/-they skied together and ~er after that they want-they fell in love so deeply that they ~er suddenly wanted-to get married, decided, and ~er they get-they got married after a few days. They had a really beautiful wedding ceremony and went to the Hawaii for their &/ha/-honeymoon, and years later they had a baby maybe [laughing].
Dyad 30/Roles: Aynur (speak) ⇒ Gozde (list)
Gender: F-F
Task: -Nar [Home]

A: The family of a boy went on holiday, and the boy was alone at home, he watched television, and phoned to his family. The family was in Paris. He was enjoying himself by watching television, talking to his friends on the phone, and then he called for a taxi and went away. When he wasn’t at home, thieves broke into the home, and he was shocked when he came back. There was nothing in the home and he was so upset because he didn’t take any cautions.

Dyad 32/Roles: Burcu Kucukuysal (speak) ⇒ Burcu Bakircioğlu (list)

Gender: F-F
Task: -Nar [Skiing]

A: Once upon a time, I was going to Uludag for skiing. It was a nice day, the sun was shining and ~er I was on the way to Uludag with my car and my-with my ~er skiing tools, and ~er suddenly it began to ~er rain and ~er it turned to snow after a while, and ~er I had difficulty to go ~er and then my-I, %I was run out of petrol so I had to stop near a hotel ~er ... and ~er in fact I was planning to go to another hotel but ~er I had, %I had to stop there and ~er the other day I take-took my ski-I &/wler/-wear-wore my skiing costume and go for skiing, and I’m not very professional, for that reason I fall down and ~er broke my leg~er I injured my leg, ~er and I went to the doctor and I understood that I broke my leg, ~er ~er ... I finished my vacation and ~er plan-I was planning to go to home, but ~er I parked my car in the wrong way, so ~er the traffic-
the policeman pulled it and -er I was very angry and -er, in fact, I was going mad, because I have to go-I had to go to work on Monday, and it was Sunday, and -er suddenly a boy crashed me -er behind and -er I have-I had-I felt so much pain because my leg was broken. But the boy was so nice and so handsome that -er we had a-we began to have a good relation with him and I fell in love with him. We had a common point and-because he had broken her leg-his leg too, and we decided to get married and-er-but this time for the honeymoon we decided to go somewhere to Hawaii -er because -er we didn’t want to -er feel -er pain for this time, and -er we want to-wanted to have-we wanted to /sunbath/, swim but not ski, and -er we &/di/- we didn’t want to broke-break our legs.

Dyad 38/Roles: Ozge (speak) ⇒ Behiye (list)

Gender: F-F

Task: -Nar [Home]

O: -Er, I think it’s a fine day, and a boy with his car full of baggages in front of his -er home, and he’s waving his hand to me as he’s smiling, -er then -er the home has a garage and a small garden, like American homes, -er out of the city. Okay, then boy get to his-gets to his home, I think the living room, on a carpet in front of the television, he sits on a three+persons armchair and -er he watches TV, he’s lying on the three+person armchair and then -er he–oh-he’s got a &/po/-er-handly phone, and -er I think he’s talking or dreaming about something, there’s a cloud over his head because it’s a sunny day, there’s a ladder, and a woman -er, or a man, I would say a family it can be, with their small girl child walking somewhere, he’s smiling so much I think, and -er he goes to, !I think he’s talking with his handy phone and -er, then he goes to -er another room I think, -er I can’t see clearly but he has his teeth-toothbrush and -er he’s &/tho/-thinking about something seriously, he’s not smiling this time. -Er the room is different, there’s a carpet with lines and -er there’s, I can’t see, -oh yeah, there’s his handy on a little table on the carpet and it rings, -er there’s a vase and in it there’s -er plants like brushy plants, maybe you can remember, they’re in lakes usually -er they’re on the picture with dots, in the lake, such a plants in the
vase, a book, and then he thinks he's angry with the phone ringing because he's trying to brush his teeth. He opens the phone and talks happily with his boyfriend, and I think he's calling from a bar because there's a glass with full of drink and the man is someone, the boy looks like blonde, my boy, and the dark-haired and with a moustache, he's (wearing) a spotted shirt, he's a funny person I think, then he got in front of his home, my boy, and he takes a taxi from there, seriously his face again. He got away I think, then there's a thief comes to his home, he fulls his sack with everything, it looks very large and he looks very tired, I think he had (a task) I think. He comes home and sees home bare, floor is bare, there's the only thing left is the vase with some flowers, they're split away, and he sits down on the ground with his knees near to his chest, his hands are on his face, and he's very very sad, angry, in a bad mood, yes he is. And this is the last of my story; he comes home and finds it empty, and I think he's got a car.

Dyad 41/Roles: Hale (speak) ⇒ Yeliz (list)

E: ~Er holiday, ~er it’s winter ~er and the weather is good first-at first. Then ~er it’s snowing ~er and ~er I think their car ~er broken down, %their car broken down, ~er and ~er they decide to ~er go to a hotel ~er and then ~er they park on-in, %in front of the hotel and ~er I think she’s /skaiNg/, with her /skaiNg/, and she ~er ... %and she, %she fall, ~er and then, I couldn’t understand what she’s doing, ... she wants to stop the car to help her and ~er she wants a friend-she finds a friend and ~er ~ah accidentally they ... !the boy crashes her and then they understand that they fall in love with each other, and they decide to ~er go to a honeymoon to Hawaii.
Dyad 26/Roles: Murat (speak) ⇒ Merve (list)
Gender: M-F
Task: -Nar [Home]

Mur: My family was going one+trip+day trip to my aunts, and I will be alone at home. I was thinking about what I will do, when I went them by their car-they went by their car, then I went back into the our house, and I begin to watch some television. But it was very boring, there was nothing on television to watch, I wanted to make something interesting, first I make a telephone call, and then I prepared myself to go out of our house. Then, I first, I used toothbrush to brush my teeth, then I called my friend to go out and some fun out of the house, but then I called a taxi and I went to meet him. But maybe something was wrong, I don't remember, did I lock the door or not, but when I came home, I found that there was nothing left. There's a thief. Something entered our house and took out nearly everything from our house.

Dyad 27/Roles: Ilker (speak) ⇒ Hale (list)

He watched TV, then phone rang, it was her wife and she said they were enjoying very much in Paris, they talked together. After talking, Andy decided to sleep. Before brushing his teeth, the phone rang again. He was surprised; who would be the person calling at this time? It was her friend Paul, he suggested him drink
something and persuaded him to drink with together. Andy took a taxi in front of the house, it was late night. Then, a few hours later, Andy’s house door opened and somebody came in the door-in the house, it wasn’t Andy. When Andy got back home, he found a space &/Ins/-instead of the furnitures in the house. All his flowers was thrown on the floor. What would he say to his wife?

Dyad 16/Roles: Mustafa (speak) ⇒ Mehmet Ali (list)
Gender: M-M
Task: +Nar [Home]

M: It was a hot day. His family was starting a journey, he wasn’t, %he wasn’t be lonely at home for a long time, he was happy because he want to be-he wanted to be lonely in &/hI/-his home, after they-his family started the journey, he went to his home. He was relaxing, ~er watching TV and doing something, ~er watching TV and eating some things. Then he thought his family. He thought her mother &/kal/-could phone him, so he put his cellular phone at the table. While he was brushing her-his teeth, the phone rang. He expected she, %she was her mother but she wasn’t. She was a friend of him. He was invented-he invented his friend-his friend invented him to a party. He was happy because he was boring at home. He went to his friend’s home with a taxi. When he was at the party, a burglar robbed their home. When he returned to home, he sees that their home-there’s nothing-there was nothing in their home. He was disappointed.

Dyad 47/Roles: Mehmet (speak) ⇒ Selcuk (list)
Gender: M-M
Task: +Nar [Skiing]

M: Dave is a successful manager ~er in a company, and ~er he ~er got bored one day ~er from business, and ~er he decide he-he realised that he has-he needs a holiday, so
he decides to go to a mountain to make some ski, he buys some new ski boards and he arranges a jeep from one of his friends and he goes to somewhere with someone advised him to go, it’s a hotel in a mountain, and everything was going as Dave has planned, and he, he hoped. First it was sunny, but later on it began to snow and one day when he came to hotel, everything is quite good, the scene is also very nice, and he stays the night in the hotel. The next day, he goes on a tour with his car around the town to find a suitable place for skiing, in the road, while going, at the same time, the woman, Lisa, is skiing. While skiing, she hurts her leg and she looks around for somebody to help her, and she saws that the car was coming towards her she shakes his hand and tells that she has a problem and needs help. Dave goes there and realises that her leg was injured, so he decides to help her, he carries her to the car, and while carrying her, they fond of each other, they like each other, and while in the road, they talk about beginning a relationship they tried and as they see themselves happy together, they decide to marry, and they go to Hawaii for their honeymoon.

M: Ah, I %see.
S: Maybe #lemon.
M: Yes, %is there ~again something @like a #device er to %cut the #holes, yes?
S: %Cut #holes, yes. Uhuh, yes.
M: %Is it on the #table?
S: Yes, on the, %it's on the #table.
M: Near the, near the #tap.
S: Near the #tap? Yes, uhuh. Fourth #picture
M: Okay.
*S: this #time, yes, this #time er the &green #brush %!is on the #wall. Okay?
M: U huh.
S: ~Again the &green #kettle %!is er on the #top #shelf, but this #time the, the er #onion #kind of thing is not %hanged on the first #shelf, okay? In the #top #shelf, pardon [=sorry].
M: Okay.
S: On the second #floor, you can %say. The #oven ~again, er this, this #time there %isn't any #bottle, there %isn't any #bottle. And is %seen as the third #picture. Okay? xx
M: Is there something like er er measure the weight.
S: Weight, weight of something, infront of the oven.
M: Uhuh, infront of the oven.
S: Yeah. Again the orange juicer kind of thing.
M: Yes.
S: And the last picture, the cookies are on the oven.
M: Okay.
S: Again there isn't an empty bottle. There isn't there's the er green brush on the wall and the green kettle on the top shelf.
M: Is er tea cooker seen on the oven?
S: Tea cooker?
M: Big oven, not the microwave oven but
S: Yes, on the oven there's a big x. The ah, I want to say the order of the greens order of the colours of the cups on the first shelf.
M: Uhuh.
S: There're four cups, you see?
M: Yes, I see.
S: The order is er purple, light purple, er dark blue,
M: Pink, blue.
*S: Yellow.
M: Okay.
S: I think that's a different order, I think. And you can see them easily.
M: Yeah.
S: Infront of them there isn't anything.
M: Uhuh.

Gender: F-F
Task: +Des [Study]

EA: I'm %describing the first one. In the first #picture er, as you %see, in all the
pictures %there's something @like #mask, but in the first #picture %there's no
#mask.
EZ: Mhm.
EA: Er and %there're some #pictures, which are %hanged er on the #walls, but
they're not %hanged on the #walls, %they're near the #chair-beside the #chair er, and
you can ~clearly %see the #television.
EZ: Uhuh.
EA: Er, %that's all on the first #picture.
EZ: Uhuh.
EA: The second #picture, %there's a &white #mask, and
EZ: Uhuh.
*EA: the #man in the #mask is %laughing.
EZ: Uhuh.
EA: And er %there's a &yellow #picture and some &birds+like things, and #lips,
EZ: Uhuh.
*EA: and it's ~clearly %seen, and %there're some &untidy #clothes on the #chair, but
some of the #sweater %lis at the #top of the #chair.
EZ: Mhm.
EA: And %there’s &only one er #speaker of the #computer, a >little #speaker.
EZ: #Loudspeaker?
EA: #Loudspeaker, yes.
EZ: Ah, yes.
EA: Mhm, and halfof the #television is %seen.
EZ: Okay. Uhuh, okay.

EA: I'm describing the third one. Again there's a mask but he looks a little bit frightened.

EZ: What colour is it?

EA: White. It's white. And again, er the clothes is at the top of the chair, and the picture, there's a picture, it's dark blue, and there're some planet-like things on it, and er there're two loudspeakers of the computer.

EZ: Okay.

EA: And that's all I think.

EZ: Uhh.

EA: The fourth one, there's a black mask, and under the black mask, er there's a woman, I think, it's sculpture, maybe another thing, er and you can only see a little part of the picture, again a yellow picture.

*EA: ~only see a little part of the picture, ~again a yellow picture. Uhh.

EZ: Mhm.

EA: And hardly you can see the television.

EZ: Uhh, okay.

EA: And there's only one loudspeaker, and at the top of the library, there's a bottle.

EZ: Uhh.

EA: Er, and the clothes are on the chair, not at the top of the chair. The last picture er... xx [some general murmuring and laughter]

*EA: there's a black mask ~again, but the woman sculpture is at the top of the black mask. And er the pictures are besides the chair and it's ~again blue, some planets, I think.

EZ: Uhh.

EA: Er that's all.

EZ: Okay.

Mur: Okay, and the second?
Mer: Okay. In the second picture, the teapot is on the kettle.
Mur: Teapot, yes.
Mer: The teapot is on the kettle on the oven.
Mur: Okay.
Mer: And in the front side—on the front side, at the front side.
Mur: Okay.
Mer: And there’s a hanger—also, and the, and the thing er that was on the pizza in the first picture.
Mur: Yes.
*Mer: is near the oven in the second picture.
Mur: Okay.
Mer: And there’s something that is used for making holes in the walls, you see, it’s
Mur: Okay.
*Mer: near the sink in the second picture, and the heart-shaped cloth I said,
Mur: Okay.
Mer: It is not in the—at the same place in the second picture.
Mur: Okay.
Mer: And there’s a second cloth on the dishes, near the sink, and er
Mur: Yes, yes, I x.
Mer: Uhuh, glass bottle near the oven, yes. And er you see that in first picture there’s something that you use to clean dishes or things @like that, near the cloth, near the heart-shaped cloth er &green thing, it’s on the glasses in the second picture,
Mur: Okay. Okay. On the second?
Mer: Uhuh, near the sink. And (there) you see er ...
Mur: You can tell the third one.
Mer: Okay, did you understand the second, ah you see in the third picture, a kitchen balancer on the oven.
Mur: Okay.
Mer: And the thing is not there anymore on the pizza, you see in the first picture I said something on the pizza, it’s not there anymore, not ~even near the oven.
Mur: Yes, yes, I x.
Mer: And er the thing that I said near the sink er I said you make holes in the
Mur: Okay.
Mer: Near the sink, I said, it's still there, and there's something you use to
Mur: Okay
Mer: And again the E-the cloth is on the dishes, and near it there's a
heart-shaped cloth again, and then er ah, the teapot and the kettle's places
are changed, it's at the back side of the oven, and ... what else? Ah, the bottle,
no, not the bottle-the can that you put your spoons and things like that is
near the sink, is not there anymore either.
Mur: Okay. And is there something, er on the oven, a white thing?
Mer: Oven? Mhm, just a kitchen balancer and pizza. And er x [giggling]
Mur: In the third picture, is there something you make the-you make
holes in the wall?
Mer: Yes, it's still there, near the sink.
Mur: Okay, okay, okay.
Mer: That's all.
Mur: Okay.
Mer: Shall I go to different picture?
Mur: Yes.
Mer: And the, I said, ball-shaped garlics, over the oven, I said,
Mur: Okay.
Mer: It is places-it's place is changed, it's taken away, and you see, I
said a green thing on the glasses near the sink, a green thing that you clean
the dishes.
Mur: Okay. Okay.
Mer: It is in its place, in its back, back place.
Mur: Okay.
Mer: And the lemon juice-the thing you make lemon juice is again near the
sink, and er the kitchen balancer is near the oven anymore and, you see, I
said it's on the oven, the kitchen balancer is on the oven I said.
Mur: Okay.
Mer: It's not there anymore, it's near the oven.
Mur: Okay, I see. And is there something to eat on the oven or near the oven?

Mer: Uhuh. Near the oven.

Mur: Okay.

Mer: In one of—I said in the second and third picture, there’s a cloth on the dishes near the balcony.

Mur: Yes.

Mer: It isn’t in its place anymore, and the heart-shaped cloth isn’t in its place anymore either. And er what else? That’s all, I think you understood.

Mur: Okay.

Mer: And the fifth picture, I think there’s tea in it, a can, a metal can, near the sink.

Mur: Okay. Okay.

Mer: And er the cookies are on the oven, and mhm the heart-shaped cloth is near the kettle and the teapot, in the fourth and the fifth picture.

Mur: Okay.

Mer: What else?

Mur: There isn’t something to make a hole in the wall?

Mer: Uhuh, uhuh, anymore. In the fourth and the fifth picture. Er

Mur: There isn’t something for making lemon juice?

Mer: Uhuh, uhuh, uhuh. Yes, that’s right. That’s all.

Dyad 27/Roles: Hale (desc) ⇔ Ilker (sort)

Task: +Des [Kitchen]

H: Now I want you to find the three pictures which have a, a heart+shaded er something, near the curtain, there’re three pictures.

I: Uhuh.
H: Er, and now er two of them %! has the er # heart in the & right # bottom and one %! has & left & upper. Can you er, could you % find? In two # pictures the # heart %! is in the & right and # bottom # part and one %! has it the in & left and & upper # part.
I: Yes.
H: And now I % want you to % look at those two ones which %! have the # heart in the & right # bottom one. % There're two # pictures.
I: The one things that you % hold & hot things %! is as a # shape of # heart?
H: %! Is as a # shape of # heart. It %! is near the # curtain, # curtain.
I: Uhuh.
H: And you, you % saw % there're three ones, and one %! is in the & left # bottom, and I: Uhuh. Yes.
*H: the other %! is in the & right er, & right # bottom. Er, the other, the other two %! is in the & rot-in the & right # part.
I: Uhuh.
H: Do you % understand? And now er I will % tell you er one of the, the two ones. ~ Now the # difference %! is that, er the one I'm % trying to % explain it to you %! is- %! has a # bottle er near the er # microwave. # Bottle,
I: Uhuh.
*H: % there's a # bottle. The others don't %! have.
I: The one with # bottle %! is the first one?
H: Ah, yes, it %! is the first one. Okay?
I: And (this one), the second.
H: \No, \ no % it's not. It %! is the third one, okay? ~ Now, I % said three # hearts,
I: Uhuh.
*H: and ~ now we’ve % discussed about the two ones, and the other-other one which %! has the # heart # shape %! is the second one.
I: On the & left & upper # side?
H: Uhuh, & left & upper # side. Okay? Er, okay, the first three ones %! are okay, ~ now I'm % trying to % tell you the fourth one, er ... okay ~ now er you % know the, er let's % check it if we %! did it ~ right. The fourth and fifth %! has something er on the er # pizza, the fourth and fifth one, and % they're the & same # object, on the Okay ~ now, % that's okay.
I: Uhuh.
H: Now the fourth one is different from the fifth one in that the photo is taken from the er, or I'll say it like that, the photo, the fourth photo has more of the curtain, the fifth one has a little curtain.

I: I can't [laughing].

H: You couldn't find, okay, - of course.

I: And about the kettles, one of them you can

H: /kEt/, okay, in the fourth one, there're er some er #cakes in a er, in a, you know, round bottle, okay?

I: Yes.

H: And in the fourth one, this is on the,

I: #Oven?

*H: no this is on the er floor, (I mean), on the floor.

I: Yes.

H: And the fifth one has them on the microwave #oven.

I: Uhuh.

H: Okay?

I: Yes.

G: ~Now, first I’ll %tell one and two. %There’s a #similarity, in the #minioven-on the #minioven %there’s a #ketchup #bottle.
H: &Yellow? &Yellow, #ketchup?
G: Yeah, #ketchup [laughing].
H: And &black #screw, I %think, with &red #bottle, with &red #bottle.
G: No, no. One and two has a similarity, and it's er the two pictures with yellow ketchup on the minioven. Can you see that? One of them one, and other two. And I will tell.

H: Uuh. Uuh. So which one, which one?

G: the second difference. Near the dish washer there's a machine, I don't know the name but it's used to make a hole on the wall.

H: Uuh. Okay. So, that's one?

G: The one is no, it's two.

H: Okay.

G: And the other one is one.

H: Okay. Now four?

G: Five, you can see biscuits on the minioven.

H: Five?

G: Yes, it's five.

H: but there're biscuits in the oven or two, two pictures.

G: In the oven, on the oven?

H: On-above, above it. Okay.

G: One.

H: That's five.

G: Yes, that's five. And three and four. Three has a, has the same machine in the two, screwer, I don't know, [both laughing] and a cable going down.

H: Okay, &black. Okay, so other one's

G: Other one's four.

H: Okay.
Dyad 36

Roles: Sercan (desc) ↔ Cemil (sort)

Gender: M-M

Task: +Des [Study]

S: The first picture, in this picture er you can completely see the television and er there isn’t a mask in this picture er and a phone-a speaker er that belongs to the computer, and I think this is enough for the first one.

C: Yes.

S: And in the second one er, there’s a mask er, which is hanged on the er, which is hanged on the books, the place where the books are found and the mask er, the mask is smiling, and er -again -only a speaker is found er and you can see the, you can see more than halfof the television in this picture, and er I think this will be enough.

C: What colour is the mask?

S: The mask is white. Er in the third picture er, -again er

C: No, it doesn’t look towards us, but smiling. In the third picture er, -again er

S: And in the second one er, %there’s a white mask er, which is looking towards us and it looks like surprised er, and-but this time %there’re two speakers er, two speakers of the computer, -again you can see more than halfof the television, and a small part of the bed is seen on the er &left er, &left, #bottom &left #side. I think this will be enough.

C: Yes.

S: On the fourth picture, %there’s a brown mask er which is hanged at the top of the er, #top of the er, how can I say, #top of the #shelves, not at the #bottom er, %there’s -only a #speaker, and er less than halfof the television can be seen and er, %there’s a-%there’s, %there’s a ballet er on the #shelves, but the ballet is behind the #mask. I, I think this will be enough. And the

C: Ballet, is x that one?

S: Ballet.

C: Behind the #mask?

S: At the bottom of the mask. And the fifth picture, -again %there’s a brown mask er, but this-it %is-this %is in the #middle of the #shelves, and at-the ballet
This time the ballet is stopping on the mask, and the television is approximately seen except its right part. There's a, there's a ballet stopping on the mask, and it's only a small part of the bed can be seen at the bottom left side of the picture. Yes, I think that's all.

C: [approves by nodding]

Dyad 39/Roles: Kaan Gencel (desc) ⇔ Toygun Keskin (sort)

Gender: M-M

Task: +Des [Study]

K: #Toygun, I'm starting, er firstly, be calm because there're great differences between five photos, er in the first photo, for example, there isn't there's no mask on the wall, so you can identify it clearly, er and in the second and third photo there're er white masks, er and number four and five, there're black masks, but er the difference between four and five is er you can see, there's a ballet dancer shaped er something, there's something like a ballet dancer and in number four the ballet dancer is under the mask and number five it is at the top of the mask er, so we, we have found number one, four and five, the rest is two and three. Er two and three may look the same. There're there's a er there's &white er how can I say, mask, mask, in number two and three, but in number two

T: In which one the mask is laughing?

K: Laughing? Er in number two and three the &white masks are laughing, but in number four and five, there're &black masks, they're not laughing. As I said, er you can find four and five easily because the ballet dancer is in four the ballet dancer is under, in five the ballet dancer is at the top of the mask. So er I have to say the difference between two and three. I said there're there's a &white mask laughing at number two and three, but in number two er the picture is nearly &white+coloured or something &surrealistic, but in number three er it is er /blu/-&blue+coloured. The, the #door
looks the same but the pictures are different, so er so I think the greatest difference is that in number two the picture is white-like, in number three it is blue-like.

T: I have found.

I: Yes.
Z: Er in picture four, the dark mask is on the cupboard, on the left side.
I: Yes, I've found (it).
Z: The one which doesn't have a mask is picture one.
I: Okay.
Z: Okay? Er, in picture two you can see the funny smiling white mask on the cupboard. On the left side.
I: Also sweater.
Z: Yes, also sweater is on the chair, and there's a painting which has more yellow
I: xx
*Z: colours. Yes, er and in picture three, there's a frightened face.
I: Uhuh, (White) mask?
Z: Mask, of course mask on the cupboard. And the picture five has dark,
I: Mask.
*Z: ugly mask on the left side.
I: And a woman?
Z: And a woman on it, yeah. That's all I think.
I: I've found them. Congratulations.
EZ: Er, one #day, #Suzy %decided to %go on a #holiday, er up to the #mountains, and while she was %driving, it %began to %snow. Then er she, she %went into a #/hot/-hotel. first picture, is there a kitchen </scale?||
R: (2.7) [</ Scale? [||]
G: 7<>You, [%you] put 5things, [-er] (2.5) on it |to weigh, [%weigh], (3.7) to
</weigh their 3[&/kil/-] kilogram.||
R: $No, $there
isn’t.|| <>I can’t see.||
G: <>And in the second picture, [-er] (6.3) on the oven there’s a kettle|| and [-er]
(4.8) there’re [-er] colourful glasses on the [-er], (2.1) on the cupboard|| and [-er]
there’s a cup for garlic. and to make salad there’s a tool here in the second picture.

For lemon?

No, not for lemon, for carrots. to make salad.

Okay.

And there’s a cup in it there’re spoons, which are made of wood.

For lemon? "Uhuh.

And near it there’s a liquid for washing the dishes and that’s all.

For cleaning the sink.

And in the third picture, there’s a cup to cook coffee in front of the oven.

And (1.9) in front of it there’s a tool for lemon. it’s yellow. and Is the scale, kitchen scale on the oven or in front of the oven?

On the oven.

Okay.

Also there’re dishes on a cup. they’re waiting for drying. I think. and, (5.3) there’re spices under the cupboard. and there’s a kettle again on the oven. and the [washing machine] dish machine is open.

Open, yes.

In the fourth picture, there’s a cup in front of the oven, which is full of biscuits, I think. in front of the oven there’s a kitchen scale also. near it there’s a kettle. and the tools which are for coffee and lemon are near the biscuit cup. And@ (3.3)

Last?||
G: <>In the last picture, in the fifth one, the cup which is full of biscuits is on the oven, (2.5) <>and near it there’s a tool to put liquid into a bottle which it (1.8) 
R: <>[~Mhm], is it on the oven?||
G: <>On the oven, yes, near the biscuit cup.||
R: [<>] Okay. [||]
G: <>And there’s a spoon in front of the oven, which is white and I think made of plastic, (2.1) and there’re two glasses, I think they are made of ceramic, near the another glass near another glass and there’re liquid for washing dishes, and also colourful glasses are under the cupboard, (2.3) and again there’re dishes, they’re put to dry.||
R: [<>] Okay. [||]
G: <>That’s all.||

A: Once upon a time, I was going to Uludag for skiing. It was a nice day, the sun was shining and I was on the way to Uludag with my car and my tools. Suddenly it began to rain and I had difficulty to go near a hotel. I was run out of petrol so I had to stop near a hotel and in fact I was planning to go to another hotel but I had to stop there. The other day I took my skiing costume and went for skiing. And I'm not very professional, I fell down and I injured my leg. And I went to the doctor and I understood that I broke my leg. I was very angry, in fact, I was going mad, because I have to go to work on Monday, which was Sunday, and suddenly a boy crashed me behind and I felt so much pain because my leg was broken. But the boy was so nice and so handsome that we had a common point because he had broken his leg too. We decided to get married but this time for the honeymoon we decided to go somewhere because we didn't want to feel pain for this time. And we wanted to have sunbath, swim but not ski, and we didn't want to break our legs.

Our main character is Sarah. She’s a journalist and because she didn’t go holiday for two years, she wanted to go holiday. She went to the mountains and by her own car. While driving to the hotel that she heard from her friends, the snow became very hard and harsh. Actually the hotel was not so suitable for her because it is not very big! and it doesn’t have a suitable skiing area. Yes, actually, the hotel was very small but this is good for her because there no people! While skiing, she fell down suddenly because of the way that she was going. This was not suitable. After breaking her leg, she went to his hotel and she found her car was broken. It was not working. So she wanted to turn her house but her car was broken! So, she must hitchhike for returning back to her house. Then while going in the road, she wanted to go to her house and called a car. Actually the car! She didn’t know that the man in the car will be the lucky person in her life. While carrying her luggage to his car, actually his name is Jimmy, she fell off and he also broke his leg. At this time, the love between Jimmy and Sarah appeared. After that, Jimmy and Sarah married with each other and went to Hawaii for a vacation, for a honeymoon.

Appendix 4.10: Measures and Symbols in Data Analyses

PART I: DISCOURSAL FEATURES AND WORD COUNTS
(Analysis I: analysis of experimental data coded for measures in PART I)

Transcript conventions used in Analysis I are adapted from Allwright and Bailey (1991:222-23).

1. TOKEN: The total number of words for each subject in the text.
   - Exclude filled (-) and unfilled pauses (...), non-target words (#), and partial words (&), e.g., independent partial words: &/pl/, &/ov/, etc. (for other combinations see 'self-correction' below)
   - Exclude unintelligible speech marked by (x), (xx), or (xxx).
   - Exclude explanations between […], [=…], ([…])

2. TYPE: New words that have been used once (e.g. if a word is repeated 5 times, it counts as ONE word).
   - The self-corrected words (e.g. ... she break-broke her leg ...) should be counted as two tokens (so the number of self-corrected words should be multiplied by two to arrive at the total number of tokens). Also, when 'types' are calculated, each word in the self-correction should be dealt with individually.
3. TYPE-TOKEN RATIO (lexical range): ‘Types’ divided by ‘tokens’ (i.e., the number of total words divided by the number of unique words).

- When the above values for ‘type’ and ‘token’ are used, non-target words (#), partial words (&), and filled pauses (~), unfilled pauses (…), and unintelligible speech marked by (x), (xx), or (xxx) will be automatically excluded.

4. NON-TARGET WORDS: Words resulting from foreignizing or occasional switches to L1. They are represented by the symbol (#).

5. PARTIAL WORDS: All tokens produced which contained an initial consonant but also a vowel, and thus are recognizable as words, as opposed to voiced fillers contributing no lexical information. The symbol for partial words is (&).

6. FREQUENCY: The number of occurrences of a word (types).

- Words are listed from the most frequent to the least frequent (in descending order).

7. REPEATED WORDS: Exact repetitions of one or two words, e.g. They went to a hotel, %a hotel. Such repetitions will be represented by the symbol (%).

- Example: ... a very very small part of the bed [NOT repetition-used only for rhetorical effect].

8. SELF-CORRECTION: The number of words marked with a hyphen (-), e.g. ...
there’re disks-diskettes; ... they’re-were interested ..., etc. Words normally
spelt with a hyphen, like heart-shaped, are spelt with a plus (+) in the data,
i.e. heart+shaped.

- The number of hyphenated words has to be added to arrive at the ‘token-
type’ ratio.
- ‘Self-corrected words’ can stretch from partial words to several words.

How to account for the following cases from the transcripts:

a) ... near the~er-near another glass ...
b) ... are not~er-the pyjamas’ place ...
c) ... picture is~er-isn’t on the top ...
d) ... ballet was~er-is ~er on the ...
e) ... I can saw~er-I can see ...
f) ... ~er he~oh-he’s got a ...

In the examples (a-f), the self-correction includes the ~er/~oh (or any other
interjection marked by the symbol (~)) without space, so in the ‘token’ count the self-
correction will be counted as TWO tokens, and in the ‘type’ count both words
involved in the self-correction will be treated separately. Both in ‘token’ and ‘type’
counts the ~er/~oh will be excluded!

g) ... another &dis~er-diferention between ...
h) ... a &/po/~er-handY phone ...
i) ... in &/fra/~er-under it ...

The above examples (g-i) involve a partial word (&). The partial words involved in
such self-corrections will be excluded both from ‘token’ and ‘type’ counts.

j) ... &on-onion ...
k) ... the &/shEl/~shelf ...
l) ... a &/kaf/~coffee maker ...

617
m) ... &/wa/-over the oven ...

n) ... how &/hE/-heavy ...

In the examples above (j-n), the self-corrections do not involve an interjection (~), so the self-correction will be counted as ONE word, and the partial words (&) will be excluded in the token/type counts.

o) A special case:
   A: Is that &/mi/-
   *Y: content
   *A: mixer.

Here the self-correction is interrupted but it should be treated in the same way as in (j-n) above.

9. FALSE STARTS: The number of occurrences represented by the symbol (!).

10. DYSFLUENCY MARKERS (total): [Dysfluency= Repetitions (%) + Self corrections (-) + False starts (!)]

11. TURN-TAKING: The number of times a subject takes turn on the descriptive task.

12. INTERRUPTED/OVERLAPPED SPEECH: A dash at the beginning of the line, preceding the speaker symbol (e.g. *S) indicates completion of an interrupted/overlapped utterance. {Originally, it was -S}.

13. PARTIALLY OVERLAPPED SPEECH: Indented lines indicate partially overlapping speech. For analytic purposes, it is represented here by ($).
14. **UNINTELLIGIBLE SPEECH**: Speech which is unintelligible to the ear of the researcher.

(a) \(x\): indicates unintelligible speech, probably one word only.
(b) \(xx\): indicates unintelligible speech (garbled or inaudible), of phrase length.
(c) \(xxx\): indicates one long unintelligible utterance beyond phrase length.

15. **FILLED PAUSES**: Strings of letters functioning as gap fillers—i.e. showing that the speaker follows the conversation or approves of what has been said. Fillers are represented by the symbol (-).

- Show ~er, ~uhuh, ~mhm, ~hmm, ~mm, ~ah, ~huh, ~oh separately.

16. **UNFILLED PAUSES**: Pauses where there is no utterance.

... indicates a long pause.

17. **FLUENCY (A)**: Values for the amount of lexical dysfluency markers per subject across conditions were arrived at by adding all repeated words, self-corrected words, false starts and non-target words, and dividing the resulting figure by the total number of words (for the lexical fluency measure partial words and foreignized words, as well full target-like words, were counted).

i.e. FLUENCY (A) = Dysfluency markers = (repeated words + self-corrected words + false starts) + (non-target words)/total words

Formula: \{[((%) + (-) + (!) + (#))/total words\}

18. **UNCOMPLETED SEGMENTS OF DISCOURSE**: Uncompleted segments of discourse are represented by the symbol (@).
19. **NON-VERBAL LANGUAGE**: Gestures like nodding the head to mean ‘yes’, are represented by the symbol (=).

*Disregard [=.....], as it means translation by the researcher.

20. **SIMULTANEOUS SPEECH**: Cases where subjects speak at the same time.

Curly brackets { are used to indicate simultaneous speech.

{M3 .......
{F7 .........

Other symbols used in transcripts:

21. [ ] used for commentary of any kind (e.g. to indicate point in discourse where T writes on black-board)

22. [= ] used to introduce a gloss, or translation, of speech

*23. / / used for phonemic transcription instead of standard orthography, where pronunciation deviant. Used with gloss if meaning also obscured.

*24. ( ) used for uncertain transcription

*25. (/ /) used for uncertain phonemic transcription

26. ([ ]) used for uncertain gloss

(In cases such as *23. / /, *24. ( ), *25. (/ /), the word(s) between these symbols will be INCLUDED in the word counts, unless there is a symbol such as (&) or (#) preceding these parentheses/brackets!)
PART II: GRAMMATICAL AND LEXICAL WORD COUNTS

(Analysis II: analysis of experimental data coded for measures in PART II)

Guidelines for Analysis II:

- Exclude filled pause er from counts.

Examples from transcripts:
(i) ... &front er-&back ...
(ii) ... dis er-#diferention between ...
(iii) ... for er-you %use for ...
(iv) ... the er-on the ...
(v) ... on er-nextto ...

- Exclude non-target words (#) and partial words (&).

(i) Non-target words (#) do not have the same spelling, so they do not cause a problem.
(ii) Partial words (&) whose spelling resembles words in the ‘grammatical words’ list will cause a problem.

Examples:
... &on-onion ...
... the &/shE/-shelf ...
... how &/hE/-heavy ...

In the above examples, when the partial word symbol (&) is deleted for the PART II analysis, the items will become acceptable words in the grammatical list: ‘on’, ‘she’, ‘he’.
Grammatical and lexical analyses:

(1) Grammatical word counts on the joined text (where phrasal verbs and two-word/multiple-word prepositions are considered ONE lexical item and written without space, e.g. give up)

(a) Number of 'Grammatical Words' (joined)
- 'a while' as a noun phrase
  For the correct count of 'types of nouns', use a different symbol (^),
  e.g. 'a while' → '#a^while'
- \no (opposite of 'yes')

(b) Number of 'OTHER' (joined)

(c) Number of 'All Closed-Class Words (grammatical words + OTHER)' =
\[(\text{number of grammatical words}) + \text{number of OTHER}]\]

- Number of '@like' as preposition
- Number of auxiliary verbs as main verbs (!)
- Number of '>little' as adjective/adverbs
- Number of Tokens (unjoined)
- Number of Net Grammatical Words
- Types of Net Grammatical Words

(2) Net Grammatical Words = [Grammatical Words (joined)-(!+>)]+(@)

(3) Net Lexical Words = [Nouns (#) + Verbs (%) + Adjectives (&) + Adverbs (-)]

- Number of nouns (#)
- Number of verbs (%)
- Number of adjectives (&)
- Number of adverbs (-)
- Types of nouns (#)
- Types of verbs (%)
- Types of adjectives (&)
- Types of adverbs (~)
- Types of Net lexical words (i.e., total of above ‘types’)

-Noun range = (Types of #) divided by (number of #)
-Verb range = (Types of %) divided by (number of %)
-Adjective range = (Types of &) divided by (number of &)
-Adverb range = (Types of ~) divided by (number of ~)

(4) **Lexical word range** = (Types of Net lexical words) divided by (number of Net lexical words)

(5) **Grammatical word range** = (Types of Net grammatical words) divided by (number of Net grammatical words)

- Number of $ (Subject-Verb Disagreement)

(6) **S-V Agreement** = (Number of %)-(Number of $)

(7) **Noun-to-Verb Ratio** = (# / %) ['number of #’ divided by ‘number of %’]

(8) **Lexical-to-Grammatical Ratio** = (Net Lexical words) / (Net Grammatical Words) ['net lexical words’ divided by ‘net grammatical words’]

(9) **Lexical Density** = (Net Lexical Words / Tokens (joined)) * 100 [(Net Lexical words) divided by (Tokens (joined))] multiplied by 100]
PART III: FLUENCY, COMPLEXITY, ACCURACY AND LEXICAL STRATEGIES
(Analysis III: analysis of experimental data coded for measures in PART III)

A. FLUENCY (B)

-Total number of syllables
-Pruned speech rate (s.p.s.) (i.e. syllables per second) = (total number of syllables) / (total articulation time in seconds)

*EXCLUDE the following:

a) self-corrected words;
b) false starts;
c) repetitions (except repetitions for rhetorical effect);
d) asides in the L1 (see Lennon, 1990);
e) pauses (filled or unfilled) of 3 or more seconds (see Griffiths, 1991);

Filled pauses, i.e. ‘pauses which involve some non-lexical vocal cord activity’, e.g. ~er, ~uhuh, etc. (see Faerch & Kasper, 1983b:215); ‘no distinction was made between unfilled pauses and pauses that included fillers such as hm, um, and uh’ (see Mehnert, 1998:90).

Computer programme details:

a) Put the above a, b, c, e (i.e., self-corrected words, repetitions, asides, non-lexical) between brackets [...] , so that they are automatically excluded by the computer.
b) Put the pauses in seconds between parentheses (3.0); the pauses of 3 seconds and over will be added up and the total will be subtracted from the total articulation time.

c) Articulation time (in seconds) will be written at the bottom of each text (dialogue/monologue) in a separate line like the following: Articulation time: 185 seconds

- Go to ‘Polysyllable’ file (i.e. the file for words divided into syllables), check words in transcript against the list in ‘Polysyllable’ file, and count syllables to arrive at the ‘Fluency score’.

Also count the following for each dialogue/monologue:

(Excluding words in brackets [ ] applies here too!)

- Tokens of monosyllabic words = ?
- Tokens of two-syllable words = ?
- Tokens of three-syllable words = ?
- Tokens of four-syllable words = ?
- Tokens of five-syllable words = ?
- Tokens of six-syllable words and more = ?
- Tokens of polysyllabic words (three-syllable +) = ?

- Types of monosyllabic words = ?
- Types of two-syllable words = ?
- Types of three-syllable words = ?
- Types of four-syllable words = ?
- Types of five-syllable words = ?
- Types of six-syllable words and more = ?
- Types of polysyllabic words (three-syllable +) = ?
-Monosyllabic word range (types/tokens) = ?
-Two-syllable word range (types/tokens) = ?
-Three-syllable word range (types/tokens) = ?
-Four-syllable word range (types/tokens) = ?
-Five-syllable words range (types/tokens) = ?
-Six-syllable word and more range (types/tokens) = ?
-Polsysyllabic word (three-syllable +) range (types/tokens) = ?

B. COMPLEXITY

-Number of tokens (unjoined)
-Number of subordination (marked by an upright slash ( | ) )
-Number of total clauses (marked by an upright slash ( | ), indicating the beginning of a clause plus clauses embedded within c-units) = ( | ) + ( || )
-Number of c-units (marked by a double upright slash ( || ), indicating the end of an individual c-unit)
-Complexity = (number of total clauses) / (number of c-units)
-Words per c-unit = (number of tokens) / (number of c-units)
-Words per c-unit (excluding dysfluency features) = { [(number of tokens excluding dysfluency markers i.e. (-)+(%)+(!)] / [(number of c-units)] }

* (-): self-correction; (%): repetition; (!): false/new start

- As in Fluency, we will have brackets [ ] in Complexity as well.

* Exclude symbols in brackets from counts: e.g. [ ...[, or [, or [...

e.g. [~Uhuh.][

* Count symbols in brackets [ ] as below:

626
Number of clauses excluded from interactional data = [...] + [...]]

Number of C-units excluded from interactional data = [...]]

- Excluded:
  - Minor utterances (e.g. Yes, No, Okay, Yeah, Alright, Right, Uhuh); and combinations of such utterances that function as wholes (e.g. Yes, alright)
  - Gap fillers (e.g. er, uh, hm, oh)
  - Echoic utterances which are verbatim
  - Asides in L1 in echoic utterances
  - C-units completely in L1
  - Non-target utterances as echoic

C. ACCURACY

- Number of total clauses [ ( ) + ( || ) ]
- Number of error-free clauses (marked by <>))
- Percentage of error-free clauses = { [(number of error-free clauses) x 100] / (number of total clauses) }

- Number of lexical choice errors (marked by <)/)
- Percentage of lexical choice errors = { [(number of lexical choice errors) x 100] / (number of total clauses) }

- Excluded:
  - Minor utterances (e.g. Yes, No, Okay, Yeah, Alright, Right, Uhuh); and combinations of such utterances that function as wholes (e.g. Yes, alright)
  - Gap fillers (e.g. er, uh, hm, oh)
  - Echoic utterances which are verbatim
  - Asides in L1 in echoic utterances
  - C-units completely in L1
Non-target utterances as echoic

D. LEXICAL STRATEGIES

- Number of language switch (marked by 1)
  - Percentage of language switch = \( \frac{\text{number of language switch} \times 100}{\text{number of total clauses}} \)

- Number of foreignizing (marked by 2)
  - Percentage of foreignizing = \( \frac{\text{number of foreignizing} \times 100}{\text{number of total clauses}} \)

- Number of literal translation (marked by 3)
  - Percentage of literal translation = \( \frac{\text{number of literal translation} \times 100}{\text{number of total clauses}} \)

- Number of appeal for assistance (marked by 4)
  - Percentage of appeal for assistance = \( \frac{\text{number of appeal for assistance} \times 100}{\text{number of total clauses}} \)

- Total number of L1-based lexical strategy use (language switch (1) + foreignizing (2) + literal translation (3) + appeal for assistance (4))
  - Percentage of total L1-based lexical strategy use = \( \frac{\text{number of total lexical strategy use} \times 100}{\text{number of total clauses}} \)

- Number of generalisations (marked by 5)
  - Percentage of generalisations = \( \frac{\text{number of generalisations} \times 100}{\text{number of total clauses}} \)

- Number of approximation (marked by 6)
  628
-Percentage of approximation = \{ \frac{[\text{number of approximation} \times 100]}{\text{number of total clauses}} \}

-Number of circumlocution (marked by 7)
-Percentage of circumlocution = \{ \frac{[\text{number of circumlocution} \times 100]}{\text{number of total clauses}} \}

-Number of paraphrase (marked by 8)
-Percentage of paraphrase = \{ \frac{[\text{number of paraphrase} \times 100]}{\text{number of total clauses}} \}

-Number of word coinage (marked by 9)
-Percentage of word coinage = \{ \frac{[\text{number of word coinage} \times 100]}{\text{number of total clauses}} \}

-Total number of L2-based lexical strategy use = (generalisation (5) + approximation (6) + circumlocution (7) + paraphrase (8) + word coinage (9))
-Percentage of total L2-based lexical strategy use = \{ \frac{[\text{number of total L2-based lexical strategy use} \times 100]}{\text{number of total clauses}} \}

-Number of lexis avoidance (marked by 10)
-Percentage of lexis avoidance = \{ \frac{[\text{number of lexis avoidance} \times 100]}{\text{number of total clauses}} \}

-Number of lexis abandonment (marked by 11)
-Percentage of lexis abandonment = \{ \frac{[\text{number of lexis abandonment} \times 100]}{\text{number of total clauses}} \}

-Total number of lexical avoidance strategy use = (lexis avoidance (10) + lexis abandonment (11))
-Percentage of total lexical avoidance strategy use = \{ \frac{[\text{number of total L2-based lexical avoidance strategy use} \times 100]}{\text{number of total clauses}} \}
Appendix 4.11: Data Coded by Coder 1 (IG: Researcher)

TRANSCRIPTS OF THE EXPERIMENTAL DATA CODED BY CODER 1
(Section I: Description by Condition/Task/Gender)

-DesFF

Dyad 15/Roles: Elcin (desc) ⇔ Pinar (sort)
Gender: F-F
Task: -Des [Kitchen]

E: In the first photograph, there’s a red [~er], (2.9) [a red] 5<material> that is used [for preparing] 6<pastry, first kind of pastry.] and they [how can I say,] 10<can I pass the second one?>
P: [<>] Yes.
E: (2.7) In the second picture, the teapot is on the [front] 3<on the front.>
P: [<>] Which side?
*E: [front] on the front.
P: [<>] On the front? [<>] [<>-Mhm.]
E: [x], (2.5) And there’s a [~er, there’s a] 5<device> in front of the oven, 7<it’s used for peeling onion, a kind of onion,> and (1.9) what else? (3.3)
P: [<>-Uuhh.][<>-Uuhh.] You can pass the third one.
E: <>Third one [...] (4.0) juice, [~er] juice extractor, there’s a juice extractor in the third one <>and it’s [~er] (2.6) not in front of the oven but not near the [~er] 4<and it’s not near the oven.>
P: Are there <pastries?>
P: A black **machine**?

E: Yes, a black, there’s a black machine.

P: [Uhuh.]

E: In the fourth one, there’s a 6**cup** and there’re pastries in it. And I think a coffee maker, the pastries are in front of a coffee maker. and what else?

P: [Uhuh.]

E: It’s not necessary. I understand.

E: And the fifth one.

P: And the fifth?

E: The pastries are on the oven and the teapot is in the back. [giggling].

P: [Uhuh.]

E: And there’s a box.

P: Box, [uhuh.]

E: A pink box.

P: [Uhuh.]

E: Did you finish?

P: Yeah.

Articulation time: 168.6 seconds

**Dyad 17/ Roles: Aytul (desc) ↔ Bilge (sort)**

**Gender: F-F**

**Task: -Des [Kitchen]**

B: What is in the first picture? [the ‘sorter’ appeared to start the task, unlike usual]

A: Yes, it’s a kitchen and there’s a dishwasher.

B: (Where)?

A: [Oven] over the oven, [Oven].

B: Microwave oven.
A: <>Yes, then there’s 7/Ssomething |<>which we use [~er] for garlic, you know?||
B: [<>–Uuhh], [–uhuh.||]
A: (2.7) Yes, and (1.6)
B: <>Okay, what’s [~er] [~er] (4.9) yellow|| [xx]? (3.3) And [~er] in the second picture [xxx]?
A: <>[~Mhm], (5.8) there’s 7/Ssomething |<>we use |<>for making Turkish coffee.||
B: Okay, and third?||
A: In the third picture, there’s </a timer on the microwave.||
B: <>And the fourth?||
A: <>] $Fourth. []] And the fourth one [~er]
B: $Is there any biscuits or?||
A: Not, biscuits is in the fifth picture.||
B: [<>] Okay. []]
A: In the fourth, there’s 6something like cable?||
B: <>Yes, finished.||
Articulation time: 81.4 seconds

Dyad 18/Roles: Deniz (desc) ↔ Sevda (sort)
Gender: F-F
Task: -Des [Kitchen]

D: First of all, it’s, [~er] kitchen [is-] has lots of 5things in it. (4.1)|| There’re a microwave; (2.5)|| <>in the first picture there’s a microwave [~er] (2.8) and some [~er] 7/6</cups |to [~er] heat milk and [~er] (1.7) some cookies.|| <>In the second one, [~er] (3.1) there’s no [~er] (4.5) pan |<>[for-] to heat milk,|| [~er] (6.4) and in the third one, (6.1) it’s, [~er] (2.1) more, it’s not too much [~er] (2.3) 6</mixed and 6</crowded. (2.1)|| <>In the third one, [~er] (4.9) there’s a […] [~er] (9.8) 7[%there’s a] 5thing to [~er] (1.6) [%to] learn [the-] [~er] (2.8) how [~/hE/-] heavy, [%how heavy] 5something|| and in the last one there’re some [~/pIE/-] plates on the </surface and some cups, (5.0) and 7a 5</machine |[for-] to make tea or coffee,
and the cookies are on the microwave oven. Do you want to ask something?

S: (Just a minute) [laughing].

D: In the first picture, there’s a bottle on the surface, and some little pans to heat milk, and in the second one, there’s bottle too, the same bottle and [to make tea or coffee. In the third one, there’s something to peel garlic and to make tea or coffee, and in the fourth one, there’s a machine to know how heavy something, for example flour or sugar, for example.

S: Yes, I know. But where is the machine?

D: It’s a simple machine.

S: Yes, I know, but on the surface or on the microwave oven?

D: In the fourth photograph, it’s on the surface, in front of the oven, and in the last photograph there’re some plates on the surface, and some cups, glasses and the cookies are on, on the oven. Any question?

S: That’s okay.

D: Okay. 

Articulation time: 285.2 seconds
10: actually I don’t know exactly.|| <>and in front of the computer there’s a chair.,|| <>and on the chair, there’re some [-er] (2.6) jumpers,

R: [<>] [#lavobo] [] [=sink].

G: <> And in the third picture, [~er] (7.8) there’s a cup [=cezve] to [~er] **6 coffee** in front of the oven.

R:

[<>-Uuhuh.]]

*G: <> and (1.9) in front of it there’s a **tool** for **lemon**, it’s yellow, and @ (5.4)

R: [<>-Uuhuh.]] <> Is the scale, kitchen scale on the oven or in front of the oven?[]

G: <> On the oven.[]

R: [<>] Okay. []

G: [~Er] (3.9) also there’re dishes [~er] (1.5) on a cup, they’re waiting for drying, I think, and [~er], (5.3) there’re spices on the- (2.3) under the cupboard, <> and there’s a kettle again on the oven, and the [~er] (2.0) [washing machine-] **6 dish machine** is open. (3.5)]

R: [<>] Open, (3.2) yes. []

G: In the fourth picture, [~er] there’s a **cup** [=container] in front of the oven, which is full of [~er] (2.4) biscuits, I think <> [~er], (2.1) in front of the oven there’s a kitchen scale also, <> and **near** it there’s a kettle, (2.3)] and (2.1) the **7 tools** which are [~er] (2.0) for coffee and lemon <> are **near** the **biscuit cup**. (5.5)]

And @ (3.3)

R: Last??}
In the last picture, in the fifth one, the cup which is full of biscuits is on the oven, and near it there's a tool to put liquid into a bottle which it to put liquid into a bottle.

On the oven, yes, near the biscuit cup.

And there's a spoon in front of the oven, which is white and I think made of plastic, and there're two glasses, I think they are made of ceramic, near the another glass and there're liquid for washing dishes, and also colourful glasses are under the cupboard, and again there're dishes, they're put to dry.

That's all.

Appendix 4.14: Definition of Measures with Guidelines for Coding: Fluency, Complexity, Accuracy and Lexical Strategies

A. FLUENCY

Two fluency measures were used: Fluency (A) and Fluency (B).

1. Fluency (A): Dysfluency markers
2. Fluency (B): Pruned speech rate (s.p.s.) (i.e. syllables per second) = (total number of syllables) / (total articulation time in seconds)

*EXCLUDE the following:
a) self-corrected words;
b) false starts;
c) repetitions (except repetitions for rhetorical effect);
d) asides in the L1 (see Lennon, 1990);
e) pauses (filled or unfilled) of 3 or more seconds (see Griffiths, 1991);

Filled pauses, i.e. ‘pauses which involve some non-lexical vocal cord activity’, e.g. -er, -uhuh, etc. (see Faerch & Kasper, 1983b:215); ‘no distinction was made between unfilled pauses and pauses that included fillers such as hm, um, and uh’ (see Mehnert, 1998:90).

*INCLUDE the following:

a) morphologically ill-formed words, e.g., un-cor-rect vs. in-cor-rect
b) abbreviations counted as syllables articulated, e.g., TV (two syllables); et-cetera (two syllables).
B. COMPLEXITY: Clauses/c-units

The C-unit was chosen as the unit of analysis for complexity (Foster and Skehan, 1996; Mehnert, 1998). Additionally, certain features (regarding particularly subordination) of a more recently proposed unit of analysis – AS-unit – (Foster et al., 2000) were incorporated into the analysis. The C-unit is based on subordination, which is a frequently used measure of complexity (see, e.g. Crookes 1989; Foster and Skehan 1996; Wigglesworth 1997). It was calculated by dividing the number of clauses by the number of C-unit.

**Clauses**: ‘Clauses are either a simple independent finite clause or a dependent finite or nonfinite clause’ (Foster & Skehan, 1996:310). Clauses are marked by a single upright slash (\`).

**C-unit**: ‘A c-unit is defined as each independent utterance providing referential or pragmatic meaning. Thus, a c-unit may be made up of one simple independent finite clause or else an independent finite clause plus one or more dependent finite or nonfinite clauses’ (Foster & Skehan, 1996:310). C-units are marked by a double upright slash (\`\`).

Also elliptical utterances (e.g. a word/phrase) qualify as a c-unit (see Laban, 1966:5-6). Ellipsis is defined as ‘the leaving out of words when they are obvious from context’ (Collins Cobuild English Usage, 1992:gxiii-xiv). However, since such minor utterances (e.g. ‘Yes’, ‘No’, ‘Right’, ‘Okay’) are abundant in interactive data, their inclusion in the analyses could distort the results; thus, they were not identified as c-units (see Foster et al., 2000).

**Guidelines for clauses**

An *independent clause* including a finite verb:

1. There’s a box\`\`
2. There’s no sweater\`\`
3. That’s okay\`\`

722
4. It's yellow
5. The family was in Paris

A subordinate clause, which gives more information about an independent clause, 'is introduced by a conjunction such as 'because', 'if', 'that', or a 'wh-' word' (Collins Cobuild English Usage, 1992:132). It can occur in front of, after, or inside the independent clause. 'A subordinate clause will consist minimally of a finite or non-finite Verb element plus at least one other clause element (Subject, Object, Complement or Adverbial)' (Foster et al., 2000:366).

6. There are spoons [which are made of wood] (2 clauses, 1 C-unit)
7. They're put to dry] (1 clause, 1 C-unit)
8. In third one it's easy to find] (1 clause, 1 C-unit)
9. It began to rain and snow] (1 clause, 1 C-unit)
10. She likes skiing] (1 clause, 1 C-unit)

In examples 7-10, at least one additional clause element is required to establish clausal status (Foster et al., 2000), as in examples 11, 12 below (i.e. ... to find another car; ... to bake cakes).

11. He tried [to find another car] [because his car couldn’t move] (3 clauses, 1 C-unit)
12. In the first picture there’s a device [which is used] [to bake cakes, an oven] (3 clauses, 1 C-unit).
13. He was shocked [when he came back] (2 clauses, 1 C-unit)
14. [When he got in the hotel, he wanted] [to have some good time] (3 clauses, 1 C-unit)
15. [After making the second phone call, he gets into a taxi] (2 clauses, 1 C-unit)
16. ... the sweater is on the chair [where you sit] (2 clauses, 1 C-unit)
17. I couldn’t understand [where the speakers are] (2 clauses, 1 C-unit)

Coordinate clauses with subject deletion (see Mehnert, 1998:90; Polio, 1997:139):

18. He comes home and finds it empty] (1 clause, 1 C-unit)
19. He opened the telephone and began to talk] (1 clause, 1 C-unit)
20. A burglar came to the house and burgled the house|| (1 clause, 1 C-unit)

‘An imperative does not require a subject to be considered a clause’ (Polio, 1997:139). It is considered a clause with a finite verb.

21. Look at the fourth one|| (1 clause, 1 C-unit)

‘In a sentence that has a subject with only an auxiliary verb, do not count that subject and verb as a separate clause’ (or a separate C-unit) (Polio, 1997:139):

22. John likes to ski and Mary does too; John likes to ski, doesn’t he?; John is happy and Mary is too (Polio, 1997:139)

Notes on Awkward Cases:

1. Include uncompleted predication/utterance in the following C-unit.
   e.g. ... the third one, it’s, -er more it’s not too much mixed and crowded||

2. If the utterance is unintelligible because of an unintelligible word/words (i.e., x, xx, xxx), do not count it as a C-unit.
   e.g. the right side is yellow|| and there’re –er blue x
   e.g. ... $xx
   e.g. The papers (in the) xx
   e.g. Okay.|| xx

Unintelligible words/phrases, i.e. ‘x’, ‘xx’ or ‘xxx’, will also be ignored in error-free clause analysis.

3. A phrase without a finite or nonfinite verb can stand alone as a C-unit unless it appears to be an uncompleted part of the preceding C-unit.
   e.g. In the second picture||
4. Do not separate units with 'I think ' used as a gambit in either mid-utterance or at the end of the utterance:
   e.g. ... [which is white and I think [made of plastic]]
   e.g. ... [which is full of -er biscuits I think] in front of the oven there's a kitchen ...
   e.g. They are waiting for drying I think]

   But count 'I think' at the beginning of the utterance as a separate C-unit:
   e.g. I think [there is a ...]

5. When repeated as complete utterances, count as separate C-units:
   e.g. $Oh, what colour is it;| %what colour is it?|

6. A clause with subject deletion, count as 1 C-unit:
   e.g. ... and there's a -er mask, white mask and is smiling, on the shelf]

7. When minor words like 'okay', 'yes', etc. are used as part of an utterance DO NOT count as separate C-units.
   e.g. $~Uuh, okay;|

8. Consider the following 1 C-unit because it is incomplete, otherwise it would be 2 C-units.
   e.g. ... and I think] there's a (1 C-unit)

9. When finite and nonfinite clauses are repeated, count as 1 C-unit:
   e.g. ... that gadget we use |to make coffee-Turkish coffee,| %to make Turkish coffee.|

10. Because there is no complement after the infinitive clause, count as 1 c-unit:
    e.g. I'm trying]] to find@

11. Do not count filled pauses representing a turn as C-units:
    e.g. $~Er.
12. Do not count cases with ‘you know’ as a C-unit in the position of confirmation check. Ignore ‘gambits like turn-internally used starters (well) or cajolers (I mean, you know) (see Edmonson and House 1981; Faerch and Kasper, 1982a)’ (cited in Faerch and Kasper, 1983b:215).

e.g. ... make ![when-while we are making pastas you know, cakes we use it for, for the -er content][

e.g. ... ![while we’re shaping this we use it,][ for shaping the you know@

e.g. It’s with salt, you know][ I don’t know the name][

e.g. ... ![and we, you know, we put off-take off our clothes][

e.g. ... ![that we do it with the, with the you know !for !while we are ...]

e.g. ... something we use to, you know, walls ... for the walls][

e.g. ... a bottle you know, ...

e.g. ... and something we, you know, make holes.]

13. Include in the same C-unit the uncompleted part of the C-unit:
   e.g. And there’s a -er, there’s a matter-device in front of the oven][

14. Do not count an uncompleted part of a turn as a separate C-unit.
   e.g. ... ![it’s near the, %it’s near the@
   e.g. ... ![you can’t see,][ -er the face of the mask is not -er@
   e.g. It’s white,][ and -er

15. Repetition as a finite clause:
   e.g. It’s near the -er it’s &/ov/-it’s near the glasses,[ it’s near the glasses][ and ...

16. Sub-clausal C-units:
   e.g.O: Yellow?][
   E: Yellow, something yellow,][ there’re the birds][

726
17. If the self-correction is interrupted by the interlocutor, count the whole utterance as 1 C-unit.

e.g.  
Y: ... we use it for, for -er  
A: Is that &/mi/-
*Y: content ||
*A: mixer? ||
Y: No, not mixer ||

e.g.  
E: In the second picture, the teapot is on the -er@  
P: Which side?  
*E: &/fra/-front, on the front ||

C. ACCURACY

The percentage of error-free clauses was used as a general measure of accuracy. The analysis also includes a specific measure of accuracy: lexical choice error.

Error-free clauses (marked by <>): Error analysis to establish the number of errors included errors in syntax, morphology, word order, and lexical choice, but not intonation or pronunciation (Mehnert, 1998:91).

a) An incorrect inflectional ending, no matter whether the mistake was due to, for example, wrong gender, wrong case, or both, was counted as ONE error.

b) Misused derivational affixes were counted as errors, e.g., un-correct vs. in-correct.

c) Errors that were repeated (i.e., forms based on wrong assumptions but consistent) were counted ONLY ONCE.

d) Reference errors, such as switches between he and she, were counted as errors every time a shift occurred.
e) Erroneous shifts in tense were counted as signs of grammatical inaccuracy, but were counted as errors every time a shift occurred unless what follows is consistent with the new tense.

f) No distinction was made between British and American usages of English in terms of nativelikeness.

**Lexical choice error** (marked by <I>): ‘lexical errors were defined as errors in lexical choice affecting words, phrases, or collocations’ (Mehnert, 1998:91).

These include the following:

a) Completely unintelligible words (i.e. the words that are incontrovertibly wrong; in cases of fine decisions of appropriacy, no error was recorded (Foster & Skehan, 1996:310);

b) L1 words, i.e., Turkish words;

c) Words/phrases unacceptable in English, excluding proper names such as Mrs. Eroz, Ali, Meltem, etc.;

d) Lexical items that were confused due to related meaning or due to misleading equivalence of English and Turkish (e.g., *bookstore* for *bookcase* (or *bookshelf*/*bookshelves*), both meaning ‘kitaplik’ in Turkish);

e) Misused prepositions

f) Contextually inappropriate expression or meaning (e.g., ‘he invented his friend’ instead of ‘he invited his friend’)

g) Consistently repeated lexical choice errors by the same speaker are counted ONCE.
D. LEXICAL STRATEGIES

The lexical strategies adapted from Faerch and Kasper (1983b) and employed in the study are outlined as follows:

- *Lexical strategy use* was used as a measure for *lexical stretching*.
- Strategies used in self-correction are also marked.

L1-based lexical strategies: (borrowing)

(i) **language switch** (marked by 1); (i.e., the insertion of an L1 word or expression, e.g. T. ‘matkap’ for ‘electric drill’, excluding proper names, e.g. ‘Gozde’, ‘Mrs Eroz’)

(ii) **foreignizing** (marked by 2) = (i.e., the creation of non-existent or contextually inappropriate target language (L2) words by applying L2 morphology and/or phonology to L1 lexical items, e.g. kitap-s)

(iii) **literal translation** (marked by 3) = (i.e., the learner translates word for word from the native language, e.g. ‘control pen’ for ‘tester’)

(iv) **appeal for assistance** (marked by 4) = (i.e. appeal for help from the interlocutor for a word or expression)

L2-based lexical strategies: (paraphrase/replacement)

(v) **generalisation** (marked by 5) = (i.e., a superordinate term used in place of a subordinate term, e.g. ‘tool’ for ‘wrench’; ‘ball/something/some present/some toy’ for ‘balloon’);

(vi) **approximation** (marked by 6) = (i.e., use of a single target language vocabulary item or phrase, which the learner knows is not correct, but which shares enough semantic features in common with the desired item to satisfy the speaker, e.g. ‘pipe’ for ‘waterpipe’);

(vii) **circumlocution** (marked by 7) = (i.e., the learner describes the characteristics-physical properties, specific features, function-or elements of the object or
action instead of using the appropriate target language item, e.g. ‘a thing that you dry your hands on’)

(viii) **paraphrase** (marked by 8) = (i.e., the rewording of the message in an alternate, acceptable, target language construction, in order to avoid a more difficult form/word, e.g. ‘the car is in difficulty to go’ for ‘the car is stuck’)

(ix) **word coinage** (marked by 9); (i.e., a creative construction of a new IL word, e.g. ‘airball’ for ‘balloon’).

Lexical avoidance strategies: (risk-avoidance)

(x) **lexis avoidance** (marked by 10) = (i.e. the learner tries not to talk about objects for which the L2 item is not known)

(xi) **lexis abandonment** (marked by 11) = (i.e. the learner begins to explain a word through different means but is unable to continue and stops in mid-utterance)
Appendix 4.15: Grammatical words (closed-class words)

*All categories of grammatical words were collapsed into ONE alphabetical group, excluding INTERJECTIONS. These categories include: Pronouns, Prepositions, Prepositional adverbs, Auxiliaries (Modal verbs and Operator-verbs – auxiliary verbs), Conjunctions, Negation (Negative words and Negative particle ‘not’) and Contractions.

*The word ‘close’ as in ‘close friends’ has been excluded.

Appendix 4.16: Other Words

*In ‘I’m sorry’, ‘sorry’ is a lexical word, but ‘sorry’ as single item is grammatical (Foster et al., 1997: Appendix).

*Opposite of ‘yes’ is ‘no’. (To distinguish between ‘no’ as in ‘no sugar’ and ‘no’ as the opposite of ‘yes’ for word counts).

Appendix 4.17: Specifications on Grammatical and Lexical Word Counts
(PART II/Analysis II)

'Grammatical and Lexical Word' Counts are operationalised in the following order:

Count 1: Number of Grammatical Words (List 1-two/three/four-word entries will be written with no space between words, e.g. at the expense of).

Count 2: Number of @like, Auxiliary verbs (!) functioning as Main verbs of the sentence, and >little:

a) Number of @ will be added to the number of Grammatical Words.
b) Number of (!) will be subtracted from the number of Grammatical Words.
c) Number of >little functioning as lexical word (i.e. adjective or adverb) will be counted and subtracted from number of Grammatical Words.
d) All 'no' word entries which mean opposite of 'yes', will be marked with (\) and counted as OTHER (e.g. '\No', I can't see it).

Count 3: Number of lexical words (e.g. #noun, %verb, &adjective, -adverb) will be marked with special symbols and counted.

a) Number of Subject-Verb Disagreement ($) will be counted here.

S-V Agreement = Number of Verbs - Number of S-V Disagreement

b) 'a while' functioning as Noun will be replaced by '#a^while' before doing the count, and thus will be counted as a noun.
Some Notes on ‘Counts’:

a) like (similar to) Preposition

(i) Mark ‘like’ with @ if it’s preposition (i.e. grammatical word);
(ii) Then, delete the entry ‘like’ from the alphabetical ‘Grammatical Word List’;
(iii) Then count @ and add it to the number of Grammatical Words. (The remaining ‘like’ occurrences will be counted as verbs (i.e. lexical words))

b) while vs. a while

(i) In transcripts, before doing ‘grammatical word count’, occurrences with ‘a while’ are marked as: ‘#a^while’.

c) Two-word or three-word entries like ‘would rather’ or ‘with regard to’ will be written with no space between words both in the grammatical word list and the text.

   eg wouldrather         withregardto

d) Lexical words will be coded with special symbols.

e) ‘Auxiliary Verbs’ functioning as the Main Verbs of the sentence (e.g. she’s !doing/having) will be coded by hand with special symbols and counted, and then this number will be subtracted from the number of grammatical words.

Appendix 6.1a: Transcript of Protocol with Case 1 (Ismail)

Semi-structured Interview: Researcher (R)-Ismail (I)

Task: +Narrative [Skiing]

Subject/Gender: Ismail (Male) [Dyad 1]

R: What did you think of the task and your performance?
I: Telling a story in English is not easy for me, I kept on saying 'his' for 'Sally' and I don’t understand why? Also I used some wrong prepositions. But I have described the situation well.

R: What were the general factors affecting your performance?
I: I can’t think of any. But I don’t know the meaning of some words that I need to use. I think that affected me. Also ...

R: Words, such as?
I: Hmm, the thing you use to stand on foot when your leg is broken.

R: Which difficult words did you use accurately/correctly? Words you saw as difficult but you still used correctly?
I: I have tried not to use any words that are difficult for me because I can’t be sure if I use them correctly or not, so I used, I tried to use simple words and all the words that I definitely know their meaning and how can I use them in sentences.

R: So are there any ‘difficult’ words you used correctly?
I: I can’t remember.

R: Did you use any words or phrases despite the risk of making a mistake?
I: No, I tried not to use any words if I saw any possibilities to make a mistake.

R: So you didn’t take a risk at all?
I: Almost no risks.

R: OK, were there any words that you thought they were risky to use and therefore you didn’t use them?
I: Yes, the holiday that you go after marriage is called ‘honeymoon’ I think but I wasn’t sure of that so I just said ‘holiday’.

R: That’s very good, any other examples like this?
I: I don’t remember.
R: Did you use any alternative words/phrases instead of those you couldn't think of like 'honeymoon'?
I: For example, I said 'she fell' but I wanted or yes I wanted to say 'she fell really very bad' and I couldn't remember the name of the word so I just said 'she fell and broke her leg'. That's all I can remember.
R: So you wanted to say 'she fell badly' and instead of that ...
I: I just said 'she fell'.
R: Did you choose not to use any words/phrases because you were afraid of making a mistake or causing misunderstanding? And therefore you chose to use more familiar ones?
I: Yes.
R: Can you give me a couple of more examples?
I: That's all I can remember I think.
R: Would you like to listen to it again?
I: Yes.
(The subject listens to his taped oral performance.)
R: Right, I asked you to think about risky words.
I: Yes, I've found two more. The first one is: I said 'Sally's car was taken off' and I didn't know the meaning of the car which takes off other cars, and so I didn't use that. Also, I said 'someone came and hit her from the back and talked and decided to go to the evening party'. I forgot to say a sentence between those two, like 'they enjoyed each other and then they decided to go to the evening party'. And the last one is: I said 'she decided she loved her'. I meant to say 'she recognised that she loved her' because you don't decide whether you love somebody or not; you just realise it.
R: Realise it, not recognise but realise it. So did you avoid using that word or?
I: No, I just didn't know what to say to give the meaning of 'realise'.
R: So you couldn't think of the word 'realise' ...
I: Yes.
R: and you used the word ...
I: 'decide' instead.
R: Any words that you avoided using because you were afraid of making a mistake or causing misunderstanding?
I: I would say a phrase, it's not a word.
OK.

I said 'the clouds appeared'. I wanted to say 'the sky went darker' or something like that but I thought that can be wrong because I wasn't sure if 'the sky went darker' or 'became darker' and I used 'the clouds appeared'.

R: What sort of problems did you have with words/phrases on the task, when you were doing the task?

I: Not being sure whether they are at the correct place in the sentence or not. Also if a phrase I used here would describe the situation clearly.

R: In what way did you feel bad about using such words?

I: I thought I'm taking English lessons for like seven years and I had to know what to use exactly and where to use them, but then I couldn't remember those phrases and those were the phrases that I have seen before. For example, 'realise' vs. 'recognise', and when I couldn't remember them I felt bad.

R: Did you also feel bad about using a word wrongly?

I: Yes, while I was listening to the things I spoke, I felt bad when I mentioned a wrong word or something like that.

R: Such as?

I: Such as 'his' or 'x' and some time mistakes of the words.

R: You mean tenses?

I: Yes. And also think that when I can't remember a word it also affects my structure of the sentence I want to use because I spent my time thinking what can I say for this or what was that word I can't remember. It also affects the structure and I panic for not doing the sentence, how can I say, in a short time or in the correct from.

R: Yes, what about planning? Did you use the planning time? You had 10 minutes for planning?

I: Yes, not all the time but I think I used it enough because I looked at pictures and tried to find special, how can I say, objects. For example, I said 'she was climbing the mountain on a sunny day' because she was climbing and there was a sun shining behind the mountains and heavy snow also. I mean I just think the words, the key words for the pictures.

R: Did it help?

I: Yes, I think it helped.

R: How? This is probably a repetition but ...
I: Yes, it helped because if it was an unplanned task then I would get more excited [=nervous] and I would have to do two things together. One, to think about the key words, and the second to remember them in English. Yes, I think I'd say 'snow' here if it was an unplanned task but because it was planned I said 'heavy snow'.

R: Right, so you included more details to make it a better story. OK, thanks. Alright, some of the questions here don't apply. Now, this is Question 12-do you remember the names of the objects you talked about, the objects in the pictures?

I: I couldn't understand.

R: The things in the pictures you talked about like 'a car taking ... away another car'?

I: Yes.

R: Do you remember how you described them? Can you give me some examples?

I: Hmm, OK I understood. Maybe that was a mistake I just described the situation not the object in sight; for example, I could say 'that was a small car with just two doors and Sally's hair was long' but that wasn't the aim.

R: Yes, that wasn't the aim-to describe every single picture fully but produce a well-constructed story.

I: Yes.

R: OK, the final question what other general factors affected your performance?

I: I think the only thing that affected me was that I was doing it for the first time. When I was doing it the first time I tried to make almost no mistakes but that worked the opposite way and I made lots of mistakes but the second time I think they disappeared.

R: Anything else you'd like to say?

I: That's all I think.
Appendix 6.1b: Hand-written pre-planning notes of Case 1:

"Men, it's War (speak)

Tony decided to go in a marin building with the bullet hole in it and the skin cut off. It'll be hurt for war.

Hair taken off 

 copied each other 

 noted when listening to his recording!"
Appendix 6.2a: Transcript of Protocol with Case 2

Semi-structured Interview: Researcher (R)-Baris (B)
Task: +Narrative [Skiing]
Subject/Gender: Baris (Male) [Dyad 5]

R: *Baris, what did you think of the task and your performance?*
B: It was interesting.
R: *Interesting?*
B: Yes, very interesting. And ...
R: *And your performance?*
B: Not very well. It's the first.
R: *What was wrong?*
B: In the story?
R: *Uhh.*
B: I don't know, I couldn't use the exact, right, good words.
R: *Good words.*
B: Complete words.
R: *OK. But you took notes on some words/phrases.*
B: Yes. I tried to use them.
R: *OK. We'll talk about that. What general factors affected your performance?*
B: General?
R: *Factors.*
B: Preparation time.
R: *OK, in what way did it affect your performance?*
B: If we have more time we can talk more and accurately.
R: *So, wasn't the time enough?*
B: It's not short but I couldn't do it x
R: *If you had had more time, then ...*
B: It would be better.
R: *It would have been better, alright. Which difficult words/phrases did you use accurately/correctly?*
B: Correctly ...
R: Do you remember?
B: No.
R: We’ll listen to your recording as I said and come back to this question but if you can remember any, you can note them now.
B: Any words I want or?
R: Any words you used correctly/accurately?
B: That I write.
R: Not, not the ones you wrote but the ones you used while telling the story.
B: Mhm, ‘she had an accident’.
R: ‘She had an accident’, OK.
B: I hope it is right [laughing jokingly but still sounding confident about the utterance].
R: It is.
B: ‘Bump into’ and ...
R: Uhuh, ‘bump into’ ... OK, did you use any words/phrases despite the risk of making a mistake?
B: Yes, I used ‘at first glance’. I don’t know, is it really right?
R: So, you were not sure but you still used it?
B: Yes.
R: OK, risky. Any other risks with words/phrases?
B: ‘Bump into’ was in that case another one.
R: So you were not sure about ‘bump into’ either?
B: Yes, I’m sure but I-I wasn’t sure if I could use it there.
R: OK, whether it would be appropriate or not. OK, did you use any alternative words or phrases instead of those you couldn’t think of? You couldn’t remember? You know, when there’s a word that you need to use but you can’t remember it and you use a replacement, an alternative word.
B: Yes, may be ‘at first glance’.
R: ‘At first glance’, it’s another ... mhm, OK, others?
B: I would use ‘crash into’ instead of again ‘bump into’.
R: Uhuh.
B: I remember this [‘this’ stressed].
R: So you couldn’t remember that ...
B: Yes.
R: so you used 'bumped into'.
B: Yes.
R: Er, were there any words or phrases you avoided using because you were afraid of making a mistake? You just didn't use them because you thought you would make a mistake or you would cause misunderstanding.
B: No. I don't remember.
R: Now I'll have you listen to your story again. Please take notes this time under the topics we talked about [the subject is reminded of the general categories] [After listening] Now have you got more examples of risky words?
B: Yes.
R: Such as?
B: Just 'pack the packages'. I don't know is it right or wrong.
R: So you felt they could be wrong, these words.
B: Yes.
R: OK, so 'pack packages'. Also ...
B: Mhm, no more.
R: No more? OK. Er, so you put 'glance' here [on subject's scratch paper] as well?
B: Yes.
R: Did you use that confidently or you thought it was risky?
B: Risky.
R: Risky, OK. But you've mentioned this before.
B: Yes, I mentioned it.
R: OK, and the words/phrases you have avoided using?
B: Avoided? I couldn't (find any).
R: OK, no problem. What about words you replaced with other words because you couldn't think of them?
B: Yes, I used 'good' instead of 'small' for hotel, and 'crash'-I used 'bump into' instead of 'crash into'.
R: Yes, any other examples?
B: I don't have any.
R: No? ... Good. Er, we move on to the next question. What sort of problems did you have with words/phrases while doing the task, in general?
B: I couldn’t know where they best suit-the words-for the words. And also I used the-I don’t know the exact words to use in a place, and I-I tried to tell it form another way, so I stopped sometimes and think of it.

R: So there were pauses?

B: Yes.

R: OK, what kind of trouble did you have using difficult words or phrases?

B: Difficult? What do you mean by ‘difficult’?

R: Difficult to you. You know, some words, you use them very easily because they’re easy

B: Yes.

R: but some are difficult.

B: Maybe I learned them very recently or I haven’t used them enough.

R: OK, examples?

B: Like ‘glance’.

R: Like ‘glance’. OK, so that was a difficult one.

B: Yes.

R: In what way did you feel bad about using such words? When you used ‘glance’ or bumped into’, how did you feel?

B: I felt the listener won’t-wouldn’t understand it.

R: OK, and you also thought, yes, they might be wrong or

B: Yes.

R: the listener might misunderstand it.

B: Yes.

R: OK, what about the planning? Did you use the planning time?

B: Yes.

R: You had 10 minutes of planning time.

B: Yes.

R: Did it help?

B: Yes, it helped (really).

R: It did. How? Can you be more specific?

B: More specific … mhm, specifically, I couldn’t understand the fifth picture and I couldn’t find the, how can I say-I couldn’t combine the fourth one with the fifth one, so I tried (it) on this.

R: So, you-you used your planning time to establish the relationship?
B: Yes.
R: *Did it help in terms of words and phrases?*
B: Words ... not so much.
R: *Not so much?*
B: I mostly tried to combine the pictures,
R: *Pictures.*
B: make the story.
R: *OK. Did you use any of the words you noted on your scratch paper?*
B: Yes.
R: Did you use them?
B: Yes.
R: Most of them? Half of them? Few of them?
B: Most of them.
R: Most of them! *OK, so in a way it did help you with the words and phrases.*
B: Yes.
R: *Do you member the words that you used in general on task?*
B: What do you mean? Like 'going'?
R: *When you close your eyes now, can you remember the words you used?*
B: Yes.
R: *Give a couple of quick examples, please?*
B: 'Ski', 'go', 'hotel', 'secretary', 'skiing teacher', 'car'.
R: *Thank you. And what other general factors affected your performance?*
B: General ... 
R: [question is repeated] *What other general factors affected your performance?*
B: My vocabulary capacity.
R: *Negatively or positively?*
B: I think a bit negatively.
R: *Alright. Any other factors?*
B: Any other ... No.
R: *OK. Anything else you'd like to add to this?*
B: No.
R: *Thank you very much.*
Appendix 6.2b: Hand-written pre-planning notes of Case2

28/7/58

Protocol

- fishing words: accident, pack, package, bicycle

- avoided:

- words replaced: good, small, bump into, crash into

- running behind, hit, crash into Toker
- they fell in love
- happy
- honeymoon in Hawaii
