New subscripts for old rescripts: 
the Vallicelliana fragments of Justinian Code Book VII*)

In diesem Beitrag werden die zwei erhaltenen Blätter eines Manuskripts aus dem 11. Jahrhundert publiziert, das eine ungekürzte Fassung des Codex Justinianus enthält (Carte Vallicelliana XII.3). Die beiden Blätter enthalten C. 7,64,2–9 und C. 7,71,8,4–7,72,6 und bieten uns elf neue oder jedenfalls verbesserte Subskriptionen zu den darin enthaltenen Rescripten.

This article publishes the two surviving folios from an eleventh century manuscript of an unabbreviated Justinian Code (Carte Vallicelliane XII.3), covering CJ 7,64,2–9 and 7,71,8,4–7,72,6, and providing eleven new or revised subscripts for the rescripts therein.

I. Introduction. – II. The fragments and their text. – III. Corrected text and translation. – IV. The headings and the subscripts.

1. Introduction:

In their book on the fate of the Justinianic codification in the early middle ages, Charles Radding and Antonio Ciaralli have drawn attention to recently identified fragments of a Justinian Code manuscript in the Biblioteca Vallicelliana in Rome1). Two folios used for binding were separated and conserved in the 1980s and recognized as coming from a Justinian Code written in Beneventan script (Carte Vallicelliane XII.3). The earliest references in print to the identification of these folios were by Virginia Brown in 1994 and Roger Reynolds in 19962). However, the significance of the identification has only now been demonstrated by Radding and Ciaralli. They date the fragments to the second half of the eleventh century, suggesting that they may have been copied at Monte Cassino. Given that they generally date the manuscripts of the Justinianic ‘revival’ slightly later that was previously assumed, this manuscript is indeed very early during that process. What marks it out, however, is its nature. In the Radding/Ciaralli scenario, the Code was effectively dormant from the early seventh to the early eleventh centuries3). Then some time shortly after 1000, Lombard jurists developed an interest in it again and created trimmed-down versions of the Code, containing only the material that seemed most useful to them. They did not, however, create a long-lasting static Epitome Codicis, of the type previous scholarly orthodoxy envisaged for the early mediaeval Code. The Lombards’ interest

*) I should like to thank the following for their advice and assistance: Michael Crawford, Carlotta Dionisotti, Charles Radding, and Benet Salway. I should also like to thank the Biblioteca Vallicelliana and its director, Dr. Maria Concetta Petrolio, for kind permission to publish the text and pictures of the two folios, as well as Mario Setter, the photographer who furnished me with the images.

rapidly blossomed, so that the abbreviated versions were speedily re-expanded, so fast indeed, that by the early twelfth century the reintegrated medieval Code (minus the Greek of course) was in existence. Emblematic of this is the earliest surviving manuscript of this process, the Pistoriensis. Previously often thought to be tenth-century, it is now dated to the mid eleventh, and with its many constitutions added in the margin or even pasted-in on slips of parchment, it shows the lively activity of re-expansion. One thing that did not happen, however, was that, as the Code reached its nearly full form again, any scribe simply decided to copy out an intact Code. Perhaps copyists preferred to copy as much as possible from a text written in a more familiar near-contemporary script, only taking from the late antique codices still in existence material otherwise missing, rather than copying them out complete.

Into this eleventh century pattern of an epitomized and then rapidly re-expanded Code, come the Vallicelliana fragments. These clearly represent a different, non-Lombard, approach, for they come from an intact and complete Code. Despite the fact that we have only these two folios, their nature is apparent. First, each gives a complete run of constitutions in the correct order (folio 1: CJ 7,64,2–9; folio 2: CJ 7,71,8–72,6), in contrast with the partial and disordered sequences of the earliest epitome manuscripts). Secondly, each preserves a full set of subscripts, these being the feature of the Code constitutions most speedily dropped from manuscripts elsewhere5). Most surviving subscripts are usually attested in only one or two manuscripts. Since the sections covered in the fragments originally contained no Greek, it is impossible to tell whether the Vallicelliana codex in its complete form contained the Greek, although in an eleventh century context that may seem unlikely. In any case, the Vallicelliana fragments are not an early example of the revival, but rather a coda, being a rare and late surviving example of the complete Code tradition, which was otherwise superseded by the re-expanded but still deficient medieval Vulgate. The only comparable manuscript source is the Würzburg fragments, which, while also surviving as only two folios, similarly represent the remains of an intact Code. They were written in romanEsca, probably copied in or near Rome in the third quarter of the eleventh century6). Our view of the nature of the Vallicelliana and Würzburg fragments is not dependent on the Radding/Ciaralli reconstruction of the Code’s history. The traditional view has been that the Epitome Codicis, Greekless, lacking the last three books, and shorn of much of its other remaining material, had come into existence earlier in the middle ages, with a gradual re-expansion from the tenth century onwards7). This still leaves a

4) Thus of CJ 7,64,2–9, P gives only 7, and L 7, 10 and 5; for 7,71,8–72,6, P and L give only 5. C, R, M, however, give both sequences complete.

5) The Vallicelliana folios contain twelve subscripts at the appropriate points, with only one missing, probably from the trimming of the parchment (CJ 7,71,8). By contrast, only three of these subscripts were previously known (CJ 7,64,5 and 7; and 7,72,5).

7) For a classic account, see M. Conrat, Geschichte der Quellen und Literatur des römischen Rechts im frühen Mittelalter, Leipzig 1891, 53–57.
pronounced contrast between the other abbreviated Code manuscripts of the eleventh century deriving from a Lombard context and two apparently complete Codes written in scripts associated predominantly with southern Italy.

II. The fragments and their text:

From the point of view of the text of the Justinian Code, the most important feature of the Vallicelliana fragments is their preservation of subscripts not known from elsewhere (nine new out of twelve in all). Otherwise, the text is largely consistent with the known tradition and offers few significant variant readings. However, it seems best here to provide a complete edition of the text for the sake of clarity. Note that both folios were trimmed for re-use, so that a line at the top or bottom may be missing or preserve only the upper or lower tips of the letters. It seems that each page originally had 23 or 24 lines of text in two columns. The trimming has also cut away the outer edge, so that the rectos have lost the ends of lines in column two, the versos the beginnings of lines in column one. Given the brevity of many of the rescripts, the scribe is frequently able to start a column with a new constitution (Folio 1r col. 2, 1v cols. 1 and 2, Folio 2r col. 2, 2v col. 2). Each constitution begins with an elaborate "Τ" (either for imp[erator/es] or id[em]) with an elongated descender.

The writing on folio 2r is hard to read, with much of the ink rubbed off, especially in the second column. Since part of that has also been cut away, it is impossible in some cases to distinguish between the lacunae for missing ink as opposed to missing parchment.

Only one title is given (7,72), written in red at the top of Folio 2r col. 2. Since of the first line only the lower traces survive, there is no indication as to whether it was given a number.

The individual constitutions, however, are numbered. In total seven such numbers survive, the others being lost in the trimming of the parchment. Thus III is written against CJ 7,64,3, then, since by error no number was written against CJ 7,64,4, the next number is III against CJ 7,64,5, with a knock-on effect also for the next two visible numbers, VII and VIII for CJ 7,64,8–9. There appears to be a I written by CJ 7,72,1, although nothing can be seen where one would expect a number for CJ 7,72,2. The next visible numbers are V and VI written correctly against CJ 7,72,5–6.

The only annotations on the fragments occur on folio 1r, and these are not legal scholia but religious 'doodles'. Between the two columns against lines 4 and 5 there appears to be the rather mysterious sentence 'Alendarum peccator deficit ab impetratis'; further below against lines 7 and 8 there is 'in presentia'. Above and below col. 1 line 21, there are 'maria aue' and 'aue maria gratie plena'.

In the text, the following conventions are used: italic for the expansion of the Beneventan abbreviation signs; and square brackets [ ] for manuscript lacunae, where the parchment has been trimmed. Punctuation follows the manuscript, principally being interpuncts in headings and subscripts. The missing text has been easily restored from the well-known Code tradition. I have used Krüger's editio maior of 1877.

III. Corrected text and translation:

Presented below is a corrected text of the Vallicelliana fragments, showing the differences with Krüger’s standard edition, but generally ignoring orthographic variants. Lacunae are only indicated for passages not attested also in other manuscripts. Substantive textual matters, principally regarding the headings and subscripts, are discussed in the succeeding section.

Folio 1 (= CJ 7,64,2–9)

Quod si cum de aetate quaereretur, implesse defunctum quartodecimum annum ac per hoc iure factum1) testamentum pronuntiavit, nec prouocasti aut post appellationis impletam causam2) destitisti, rem iudicatam retractare non debes. PP. xvi k. Aprili. Alexandre A. II <et Marcello> conss.

III. Imp. Gordianus A. Ingenuo. Si, ut proponis, suspensa apud amplissimos3) iudices cognitione4) provocationis, quam te ob id interposuisse5) dicis, quod decurio nominatus esses6), ad duumuiratum uocatus es7), manifestus8) est praieudicium futurae notioni memoratorum iudicum fieri non potuisse. PP. k. Mar. S[a]bino et Venusto conss?).

III. Impp. Carinus et Carus et Numerianus AAA. Domitiano. Certa ratione et fine et multare praesides possunt. Quod si aliter et contra legis statutum modum provinciae praeses multam uobis inrogauerit, dubium non est id, quod contra ius gestum uideatur, firmitatem non tenere et sine appellatione posse rescindi. PP. id. Ian. Caro et Carino conss.

[V]. Id. AAA. Germano. Cum non eo die, quo praeses provinciae praecepit, iudex ab eodem datus pronuntiauerit, sed ductis diebus alieniore tempore sententiam dedisse proponatur, ne ambages frustra interpositae prouocationis auxilium iam pridem a diuis principibus infirmatas esse decretum est. PP. v k. Ian. Diocletiano Α. II. et Aristobulo conss.

VII. Id. AA. Constantio. Si pater tuus, cum decurio creareris, consensit et XV annos aetatis agis, aditus praeses provinciae, si inhabitem te ad obeundum decurionatus honorem esse perspexerit, quando huiusmodi aetati etiam praetermissa appellatione subueniatur, iniquam nominationem remouebit. PP. iii k. Oct. ipsius III et IIII AA. conss.

VIII. Id. AA. et C. Rufino. Veteranis, qui in legione uel uexillatione militantes post uicesimam stipendia honestam uel causariam missionem consecuti sunt, honorum et munerum personalium uacationem cessimus. Huius autem indulgentiae nostrae tenore remunerantes fidam deuotionem militum nostrorum etiam prouocandi necessitatem remisimus.

2] ... But if, when the issue of age was raised, he (the judge) ruled that the deceased had completed his fourteenth year and this was the reason the will was lawfully made, and you did not appeal or stopped after the completed hearing of the appeal, you must not resurrect the matter judicially settled. Posted up on the sixteenth day before the Kalends of April, in the consulship of Alexander Augustus (for the second time) <and of Marcellus>.

3] The emperor Gordian Augustus to Ingenuus. You state that you were summoned to the duumvirate, while the hearing of an appeal before the most distinguished judges was in suspension, an appeal which you say you had lodged for this reason, that you had been nominated as a decurion. If so, it is clear that there could not be any prejudice to the future ruling of the above-mentioned judges. Posted up on the Kalends of March, in the consulship of Sab[inus and Venustus?].

4] The emperors Valerian and Gallienus Augusti and Valerian the most noble Caesar to Julianus. Since you state that the magistrates were appointed as judges and only one of them has given a verdict, there does not appear to have been the need for an appeal, since the sentence is not legally valid. Posted up on the Kalends of July, in the consulship of Aemilianus and Bassus.

5] The emperors Carinus, Carus and Numerianus Augusti to Domitianus. Governors are able to levy fines under specific circumstances and within fixed limits. But if the governor of the province has imposed a fine upon you otherwise and contrary to the established measure of the law, there is no doubt that what appears done contrary to law has no validity and can be revoked without an appeal. Posted up on the Ides of January, in the consulship of Carus and Carinus.

6] The same Augusti to Germanus. Since on the day as laid down by the governor of the province the judge appointed by him did not give his verdict, but he is stated to have given the verdict at another time several days later, the governor of the province will hear the case between you from the beginning, quashing the outstanding appeal, so that the meanderings of a vainly lodged appeal may not protract the matter any further. Posted up on the Kalends of December, in the consulship of Carus and Carinus.

7] The emperors Diocletian and Maximian Augusti to Nicagoras. Trafficked verdicts, which are given by corrupt judges for a price, have long since been decreed to be invalid by the divine emperors even without the assistance of an intervening appeal. Posted up on the fifth day before the Kalends of January, in the consulship of Diocletian Augustus (for the second time) and of Aristobulus.

8] The same Augusti to Constantius. If, when you were made a decurion, your father did not consent and you are IS years of age, approach the governor of the province, and, if he should see that you are incapable of an office such as the decurionate, he will revoke the unfair nomination, since there is help for this age-group even with the appeal omitted. Posted up on the fourth day before the Kalends of October, in the consulship of the Augusti themselves for the fourth and third times respectively.

9] The same Augusti and Caesars to Rufinus. To veterans, who have gained honourable or medical discharges after 20 years serving in legion or vexillation, we have granted exemption from office and personal munera. Also, in rewarding the faithful
devotion of our soldiers by the tenor of this our indulgence, we have removed the need for their making an appeal.

CJ 7,71,8,4–7

(4) [If the amount of the debt is equal, but the number of creditors unequal], then the greater number of creditors is to win, so that what the majority wants is to be applied. (5) But if there is matching equality, both of the debts and in the number of creditors, those are to be preferred, who incline to the more humane view, imposing not a cession of property but a period of grace. (6) There is to be no difference in making the choice between secured creditors and the others. But in the apportioning of property by the office of the judge, each creditor is to have the strength of claim, that the legal rules grant him. (7) Regarding the calculation of periods of prescription, there is to be no prejudice to any of the creditors from the five-year postponement.

CJ 7,72

On goods possessed or sold by the authority of a judge and on separations (of property).

1] The emperor Antoninus Augustus to Attica. In relation to the goods of the deceased, it is clear that the case of those legatees is stronger, who can sue him as heir, than of those, to whom he himself left things, since in the first case the legacy is exacted like a debt, but the legacy left by the deceased is applied only after the deduction of the debt. Posted up on the fifteenth day before the Kalends of July, in the consulship of Gentianus and Bassus.

2] The emperor Gordian Augustus to Aristo. The most ready purpose of jurisdiction and remedy for indemnity is set out by the praetor’s edict for the creditors of an inheritance, so that they should successfully obtain a judgement, whenever they bring a motion for the separation of the goods. Therefore you will choose an outcome matching your wish, if you show that you did not rely on the faith of the heirs, but summoned them to court by necessity. [Posted up] on the third(?) day before the Kalends of February, in the consulship of Gordian Augustus and of Aviola.

3] The same Augustus to Claudiana. Suing a debtor on a contract, which precedes the cession of property, is against the rule of law, since equity protects him by the assistance of a defence. But then you can in due course request to sue a second time, if he should later acquire so much property as to force the governor to grant licence for this. [Posted up] on the Kalends of May, in the consulship of Gordian Augustus [and of ?].

4] The emperors Diocletian and Maximian Augusti and the Caesars to Clearchina. What you ask is not lawful, that one of the unsecured creditors should be compelled to take over the debtor’s property and then satisfy his other creditors. Written on the Ides of April at Byzantium, in the consulship of the Augusti.

5] The same Augusti and Caesars to Abidimus. If it is agreed that your debtor’s goods are ownerless and these have not been claimed by the fiscus, you will be correct in asking that you be put in possession of them by a competent judge. Written on the seventeenth day before the Kalends of January in the consulship of the Augusti.

6] The same Augusti and Caesars to Agathemerus. The creditors are not lawfully asking that the debtor’s goods be adjudged to them. And so, if other creditors of your debtor accepted property in pledge, it is absolutely clear that they are deemed to have a stronger claim than you as an unsecured creditor.
IV. The headings and the subscripts:

CJ 7,64,2 [F 1r col. 1]
Subscript: PP. xvi k. April. Alex. A. II consss. (17th March 226)
This subscript is new. The second consul (Marcellus) is missing, although the plural consular abbreviation still stands in the subscript as a fixed repeated element. Honoré previously assigned this text to Herennius Modestinus (his secretary no. 8)9, proposing for him a principal period in office Oct. 223–Oct. 22599). However, he also envisaged a possible extension to March 226 and a ‘hand-over’ period at this time11). Perhaps, therefore, his attribution to Modestinus can be maintained.

CJ 7,64,3 (numbered III) [F 1r col. 1]
Heading: Imp. Gor. A. Ingenuo.
The subscript is new. Although the diurnal date is clear, the consular date has to be deduced from the upper remains of only two letters, the top of a high curve and the top of a tall descender. Of the consules priores for the reign of Gordian III, Sabinus is the only one who would seem to match these traces12). However, Honoré assigned this text to his secretary no. 13, with a period in office from July 241 to July 24613).

CJ 7,64,4 [F 1r col. 2]
Subscript: PP. k. l[u]i. Aemilia]no et Basso consss. (1st July 259)
There is no trace of a numeral against the heading, and it does not seem to have been lost in the trimming of the parchment, since the numeral against CJ 7,64,5 is incorrectly given as ΠΠ. The heading, though incompletely preserved, is easily restored to match other manuscript witnesses. The Code versions of the Valerianic colleges are the only ones to grant their Caesars (frequently if inconsistently) the style nobilissimus14). It is, of course, standard in contemporary formal texts15). The subscript is new, the consulship being clearly that of Aemilianus and Bassus (259).

CJ 7,64,5 (numbered ΠΠ) [F 1r col. 2]
Subscript: PP. id. Ian. Ca[ro et Carino consss.] (13th January 283)
Although numbered ΠΠ, this is clearly in error because of the omission of a number against the preceding constitution. The imperial college of the heading is clear, de-

Miszellen

spite some disorder. It should of course read Impp. Carus et Carinus et Numerianus. The incomplete subscript confirms that printed in the only other source to preserve it, viz. Russardus’ edition of 1560. Two other manuscripts, Pistoia (P) and Paris (L), give only PP. Honoré assigned this text as his earliest to secretary no. 16A, serving Carus in the east, and cites this text in full as an example of that magister’s laboured style16).

CJ 7,64,6 [F lv col. 1]
Heading: [Id. AAA. Germjano.
Subscript: PP. k. Dec. [Cari]no et Num. cons. (1st December 284)
Although the heading only preserves “[..]ano”, the emperors and recipient can easily be restored as idem AAA. (i.e. Carus, Carinus and Numerianus) to Germanus17). The subscript is entirely new, giving the date of posting as 1st December 284. The consulship must be restored as that of Carinus and Numerian in 28418). Tony Honoré identified the author as magister libellorum no. 16A, serving first Carus, then Numerian19). Since Diocletian had succeeded Numerian on 20th November 284, following the latter’s mysterious demise, this is his earliest known rescript20). Given that Numerian was dead for some time before his decomposing corpse was discovered, it is unlikely, even if we suppose the loss of a sizeable numeral before the ‘k.’, that this rescript could be pushed back in time into Numerian’s reign, although it might have been already written, awaiting his signature. That the magister of Carus and Numerian continued to serve Diocletian, at least for a while, is perfectly plausible. Judging by Diocletian’s actions after the death of Carinus the following year, conciliation of the officials of the previous emperor seems his policy. Carinus’s praetorian prefect and fellow consul for the year, Aristobulus, remained prefect and continued as consul, with Diocletian now as his colleague21). So, aside from the violent elimination of Aper by Diocletian’s own hand, continuance in post for previous office-holders is in character.

16) Honoré (n. 9), 146–147.
17) The members of imperial colleges in headings do not necessarily accurately mirror historical reality. For instance, all rescripts of 293 include the Caesars, even those from January and February before their appointment on 1st March.
18) On this consulship, see R. Bagnall et al., Consuls of the Later Roman Empire, Atlanta 1987, 102–103.
19) Honoré (n. 9), 180 n. 551.
21) Barnes (n. 20), 97 and Bagnall (n. 18), 104–105.
CJ 7,64,7 [Folio 1v col. 1]

Subscript: PP. v [k.?] Jan. Diocl. II et Aristo[bulu conss.] (28th December 285)

P and L give the name as Nicagori, while the Summa Perusina prefers Nicanor22). Krüger prints Nicagorae. The version here, despite the grammatical inaccuracy, seems to confirm his guess. The gender of the recipient cannot be determined from the rescript itself. However, the male form, Nicagoras, is far more common than the female, Nicagora (Nicagore)23).

The date was already partially preserved in the Pistoriensis, giving the consulship for 285, but with the day unreadable, otherwise given in a conjoining text as K. Ian. (CJ 6,34,2). Both texts as part of a single rescript were assigned by Honoré to his no. 17 (Gregorius) on 1st January 285, while still serving Carinus in the West24).

Much of the Vallicelliana subscript is only partly preserved as a result of the trimming of the parchment, and has to be restored by comparison with the other witnesses, although even the most uncertain point, the month [I]an., is likely to be correct. However, the numeral V is absolutely clear on the previous line. Usually a missing numeral before the Kalends makes little real difference to a date, only a few days, at most a couple of weeks. But January is different, since two different Kalends are in question. Thus v k. Ian. from the new subscript gives 28th December 285. Acceptance of this date should also mean emendation of CJ 6,34,2. The effect of this is to leave only one rescript (CJ 4,20,4) assigned by Honoré to no. 17 before the summer of 285 to suggest that he had ever served Carinus in the west, before starting service with Diocletian.

As regards the main text of the rescript, the Vallicelliana Infirmitas is incorrect, but reflects the trend of the other manuscripts, which have variations on infirmitas/atas. Krüger printed infirmas, but perhaps infirmatas was the original reading as at CJ 1,18,4.

CJ 7,64,8 (numbered VII) [Folio 1v col. 2]

Heading: [d. AA. Constantio].

Subscript: PP. iii k. Oct. ipsis IIII et IIII AA. conss. (28th September 290)

The heading of this text is mostly missing here (only part of the elongated descender of the “Γ” can be seen), but it is known from the rest of the tradition. The subscript date is new, but uncontroversial, reproducing a very common style for this year in the Code and other legal sources25). No other rescripts are dated to this day, although three belong to 29 September26). From the date, the magister libellorum who wrote the text must be no. 19 (Charisius), although Honoré did not detect in it any positive signs of style27).

22) For the Summa Perusina reference, see G. E. Heimbach, Anekdota II, Leipzig 1840, 124 and F. Patetta, Adnotationes Codicis Domini Iustiniani (Summa Perusina), BIDR 12 (1900), 251.

23) 195 versus 26 according the on-line Search II of the Lexicon of Greek Personal Names (covering volumes I, IIa, IIIa, IIIb, IV and Va) [http://www.lgpn.ox.ac.uk], checked on 8. Sept. 2008.

24) Honoré (n. 9), 147–148.

25) Bagnali (n. 18), 114.

26) CJ 3,44,12; 6,37,15; 7,43,8.

27) Honoré (n. 9), 181 n. 555.
CJ 7,64,9 (numbered VIII) [Folio 1v col. 2]

Heading: Id. AA. et CC. Ruphino.

The folio breaks off before the subscript. The heading however confirms the recipient as Rufinus. In his edition of this text, Krüger prints onerum over honorum as similarly at CJ 4,12,3. However, the conjunction of honores and munera as two complimentary but separate technical terms is far more common in the third-century rescripts. Note in particular the very similar text CJ 10,55,3: *Veteranis ita demum honorum et munerum personalium uacatio iure conceditur, si post uicesimum annum militiae, honestam uel causarium missionem consecuti esse ostendantur. Onus* is a looser synonym for munus, and documentary sources show it used (like munera) in contrast to honores. honorum must, therefore, be the correct reading here. Even in the Florentine Digest editors have seen miscopying, with onus for honor in Digest 50,1,18.

CJ 7,71,8 [F 2r col. 1]

The subscript for this constitution of Justinian to John the Cappadocian, absent in the rest of the tradition, has been lost here also in the trimming of the parchment. Judging by the space needed for the missing text in CJ 7,72,2 at the bottom of col. 2, the subscript, if present, would have covered two lines.

CJ 7,72,1 [F 2r col. 2]

Heading: Imp. Ant. A. Attic[e].

Subscript: PP. xv k. Iul. G[entiano?] et Basso conss. (17th June 211)

Although very hard to read, it is possible that the numeral ‘I’ stood against the heading. Note that not all of the recipient’s name is preserved, but Attica is surely correct, as per Krüger. The subscript is new, but of the first consul’s name only a ‘c’ is readable before the trimmed edge of the parchment. Given that the second consul’s name is clearly Bassus, the consulship of 211 appears to be the only one to match surviving traces, if the first consul was spelled Centianus. Honoré does not attribute this text to any secretary. In the text of the rescript, the retractatione matches the trend of the other manuscript witnesses, but Krüger’s detractionem (deduction) must be correct. Retractatio and indeed detractatio both mean refusal and would make no sense in this passage.

CJ 7,72,2 [Folio 2r col. 2–2v col. 1]

Heading: Imp. Gor. A. Aristoni.

This subscript is new. The trimming of the parchment means that it is impossible to know whether there were other numerals before ‘iii’, but the date can only be out by a few days, if at all. The second consul’s name only survives as ‘biola’ but is, of course,

---

28) CJ 5,71,16; 7,62,7; 8,47,7; 10,32,5; 10,39,3; 10,40,3; 10,41,1; 10,55,2; 10,57,1; 10,64,1; 10,65,3; 10,70,1; CTh 12,1,5; Digest 50,5,10,4 and 50,5,12,1. Note also the title de muneribus et honoribus at Digest 50,4.

29) Thus the rhetorical tripling muneribus et oneribus et obsequiis at CTh 13,5,7.

31) The Summa Perusina gives Atticia (Heimbach [n. 22], 125).

32) Honoré (n. 9), 132, n. 798.
Aviola. The year is 239. This matches Honoré's attribution of this text to his secretary no. 12, in office March 238 to June 241.

**CJ 7,72,3** [Folio 2v col. 1]

Heading: [Id.] a. claudane.
Subscript: [PP.?] k. Mai. Gor. A. [et ignoto? con]ss. (1st May 239 or 241)

The name of the recipient, Claudiana, matches the rest of the tradition. The subscript is new. It is difficult to tell if a numeral was present in the part missing before k. mai., but the diurnal date cannot be far wrong. Of the second line of the subscript, only the superscript abbreviation stroke from cons. survives. Gordian III was consul twice, for the first time with Aviola in 239 as in the previous rescript, for the second time with Pompeianus in 241. There is no way of deciding which of these two is correct. Both dates fall within the period in office of Honoré's secretary no. 12, to whom he attributes this text.

**CJ 7,72,4** [Folio 2v col. 2]

Heading: [Id. Diocl. et Max.] AA. et C. Clearcine.
Subscript: S. id. Apri. Biza. AA. conss. (13th April 293, at Byzantium)

The correct form of the recipient's name is probably Clearchiana, as Krüger prints following the Summa Perusina's Clearciana. Clearchiana is certainly the most plausible form for such a Greek name with a Latin ending, but is otherwise unattested. The subscript is new, and both clear and uncontroversial. It is one of several texts issued at Byzantium on this date. The author of this text was identified by Honoré as Hermogenian, in office as magister libellorum throughout 293 and 294, although apparently solely on the basis of date (inferred from the following dated rescript). Because Hermogenian gathered the rescripts he wrote into the Hermogenian Code, it is notable that most carry the date that the emperor signed them (data or scripta or subscripta). Earlier texts taken from the Gregorian Code more routinely have the date of posting up (proposita) outside the emperor's residence. However, this contrast cannot be pushed too far. Rescripts in the Justinian Code may have been edited by the commissioners, and Hermogenian constitutions from outside the Code exhibit a degree of inconsistency. Whatever this may reveal about the nature of the original Gregorian and Hermogenian Codes, it is quite clear that this and the succeeding text correctly reflect Justinian Code practice.

33) Honoré (n. 9), 117 n. 569 and 133 n. 808.
34) Honoré (n. 9), 117 n. 565 and 133 n. 808.
35) Other versions transmitted are Clearcina (M; as Vall.), Cleartina (C), Clareteia (R). For the Summa, see Heimbach (n. 22), 125 and Patetta (n. 22), 255.
37) CJ 5,70,4; 6,42,22; 7,60,2; 8,39,2 (all Id. Apr. at Byzantium); CJ 3,19,1; 3,32,13; 4,19,9; 6,2,10; 7,32,6 (Id. Apr. alone).
38) Honoré (n. 9), 64 n. 315.
CJ 7,72,5 (numbered V) [Folio 2v col. 2]

Heading: Id. AA. et CC. Abidimo.
Subscript: S. xvii k. Ian. CC. conss. (16th December 294 [293])

Krüger prints the recipient's name as Abydonius, following Heimbach's reading of the Summa Perusina (as with the previous rescript), although Blume and Patetta read Abidomus, and the other manuscripts give Abidimus or Abdimus. Despite its classical look, Abydonius does not derive from Abydos (which gives Abydenus), and is only obscurely attested in some grammatical or geographical works (derived from a Macedonian place-name, Abydon). It has not been found as a personal name. Abidimus might be a corruption, indeed, of Abydenus, or of Avidius or Avitius. However, something beginning in Abd suggests Latinisation of a Semitic word form (Abd = slave). Indeed, Abdimus is attested in the mediaeval Latin tradition of the Cassiodoran version of Josephus's Antiquities. In his original work, Josephus gives an account of the relations between Solomon and Hiram, king of Tyre, in particular their exchange of riddles, quoting verbatim passages from two historians, Menander of Ephesus and Dios (Ant. Jud. 8,144–9). An almost identical account is given in Against Apion (1,112–20), except that Dios is quoted before Menander. In Against Apion, the person credited with solving the riddles is named by Dios (Ap. 1,115) as Άβδήμοονιν Τνριόν άνδρα and by Menander (Ap. 1,120) as Άβδήμουνος παϊς νεώτερος, and it is the second declension form Abdemonus, which is attested...
in both instances in the Latin Against Apion). In the Antiquities, Dios (Ant. Jud. 8.149) refers to Λβδήμονα τινα Τύριον άνθρα, while Menander (Ant. Jud. 8.146) mentions Λβδήμονος παις νεώτερος. This latter passage would most naturally be taken, by analogy with the form of the name in Dios, as a 3rd declension genitive, but it seems more often taken as a second declension nominative (as in the Against Apion quotation). Unfortunately, the critical edition of the Latin Antiquities stalled after one volume and did not reach Book Eight, but the apparatus criticus to the Niese and the Nodet editions both cite the Latin tradition and make it clear that in the Dios quotation the name is Abdimus, but Abdimonis in the Menander, thus treating it as a genitive. Further, this passage is quoted verbatim by William of Tyre, and here a name is added to the Menander passage to give Abdimus, Abdaemonis filius, on the reasonable basis that the person named in the Dios passage (Abdimum quendam Tyrium) should fill the place of the unnamed son of Abdemon in Menander. Despite the confusions of the name in both the Greek and Latin traditions of Josephus's quotations of Menander and Dios, it is clear that an original Phoenician name, 'bdhmn (slave of Hammon) was rendered variously into Greek as Άβδήμων, Άβδήμοονος.

\[\text{56) The god is Baal-Hammon, not the Egyptian Amon. See F. Briquel-Chaton-}\]
and Άβδήμονος\textsuperscript{57}), and that Abdimus and Abidimus, in addition to Abdemonus or Ab-
demon, are plausible Latin renditions of the same. Thus Abidimus, the reading of the
Vallicelliana and the other Code manuscripts, must here trump Abydonius, Krüger’s
choice.

The subscript is not new, but otherwise transmitted as \textit{xvii k. Ian. aa conss.}. The
\textit{S(crpta)} of the Vallicelliana is a correct supplement. However, the consular date of
the Caesars (294) must be wrong, since CJ \textit{7,72,7} was issued on the 1\textsuperscript{st} December
294, and the texts are supposed to be in chronological order. The correct year is 293
\textit{(AA. conss.)}. Honoré assigned the text to Hermogenian, but apparently from the date
alone, not from any detectable signs of style\textsuperscript{58}). It is one of several texts issued on the
same day from Sirmium.

CJ \textit{7,72,6} (numbered VI) [Folio 2v col. 2]
Heading: Id. AA. et CC. Agathemoro.
The inscription preserves the recipient’s name in an almost correct form, which was
probably Agathemerus (as printed by Krüger)\textsuperscript{59}).

London \hspace{1cm} Simon Corcoran
