Figure 1

Baseline (pre-IVIG / SCIG)

A

HBV surface antibody

- Positive: 89% (71)
- Negative: 11% (9)

B

On IVIG / SCIG

- Positive: 99% (79)
- Unknown: 1% (1)

C

HBV core antibody

- Positive: 99% (79)
- Negative: 1% (1)

D

- Positive: 46% (37)
- Equivocal: 13% (10)
- Negative: 41% (33)
Figure 2

A. Bar chart showing the number of patients for different immunoglobulin products, categorized as Negative, Equivocal, and Positive.

B. Scatter plot showing the sAb titre (IU/ml) against Immunoglobulin product, with markers indicating Positive, Equivocal, and Negative results.

C. Scatter plot showing the sAb titre (IU/ml) against cAb result for different immunoglobulin products.

D. Scatter plot showing Days since infusion against cAb result for different immunoglobulin products.

E. Bar chart showing the percentage of patients and number of infusions for different cAb results.
