What is information governance?

Recognition of information as an asset that requires stewardship:

- Leadership
- Management
- Balance of societal goals
- Ethical behaviour

Information governance defined

Information governance is the specification of decision rights and an accountability framework to encourage desirable behavior in the valuation, creation, storage, use, archival and deletion of information. It includes the processes, roles, standards and metrics that ensure the effective and efficient use of information in enabling an organization to achieve its goals.

- Information Ethics

**IG model in development**

- Stakeholder engagement
- Information needs
- Information literacy
- Information wealth and poverty in an online globalized world
- Green requirements

**Freedom of speech**

Country ratings from Freedom House's *Freedom in the World* 2016 survey, concerning the state of world freedom in 2015. 67

- Free (88)
- Partly Free (59)
- Not Free (60)
Information Rights Law

GDPR
- Required to be implemented by May 2018 (so within the 2 year timeframe for Brexit once Article 50 is triggered)
- Needed to trade in the EU, e.g. Norwegian trade model requires compliance
- De facto standard for managing personal data
- ICO (UK ombudsman) confirmed UK will have ‘adequacy’
