

Clera

Manuel Jiménez García X **nagami**

The **Reef** Collection emerges from simplicity and sharpness. These objects are built with Ocean Plastic®, a recycled material provided by Parley for the Oceans that comes to a new life in our products. Its angular geometry seems to ossify the material, once present in another shape, performing a different function.

The Clera Chair is at the same time robust and comfortable, it brings a signature object to any space, while serving as a perfect seating for a social environment.
