

MAS\_Madri

## madrid arch

"From Madrid to the Sky" is an art project expressing the deep attachment of people to with its sky, a sky that has been part of the local and a background of their greatest wishes and achievements.

The exhibition aims to have the entire atmosphere and architecture of Madrid's atmosphere is re-created in the shape of clouds that filter and modulate the light. Simultaneously the floor below becomes a map of the city. In a way the visitors are not in the city itself. Printed material and projections recreate the experience of urban spaces, giving a perception of the streets and people in a way no conventional can.

The exhibition is directed to the main part is expected to interest the professional visitor who is invited to enjoy Madrid through its Architecture.
