# NeuroFedora: example usage I: Fedora Linux OS

1. Download a Fedora Linux OS
2. Install it on your computer (or don't! You can run it **live!**)
3. Use the package manager (dnf) to install the software you need
4. Profit!

---

<sup>1</sup><https://getfedora.org>

# NeuroFedora: example usage II: CompNeuro-Fedora OS

1. Download the CompNeuro Fedora Linux OS
2. Find lots of computational neuroscience software pre-installed
3. Profit!

---

# NeuroFedora: example usage III: containers

1. Pull and run the Fedora *base* image
2. Use the package manager (dnf) to install the software you need
3. Use containers interactively or create your own container images
4. Profit!

---

# NeuroFedora: join us!

- Use, help others, spread the word
- Suggest more software for inclusion
- Help us include and maintain more software (your software?)
  
- Learn about more tools
- Learn/practice more transferable skills (software development and more)
- Help developers maintain the software you depend on.
