ach2023

29 June - 1 July 2023, Virtual Conference

Outline

Humanities research on genealogy data in library

- Cultural heritage data in library
- Genealogy data
- Stories in GLAMs and genealogy stories to support research

Methodology

- Bakhtin' s theory of chronotope

The Chinese Genealogy Knowledge Service Platform at Shanghai Library

- Data used, methodology, functions
 - From digital objects to research contexts
 - What we have achieved and the challenges
- 

Cultural heritage data in library

“Culture is a set of distinctive spiritual, material, intellectual, and emotional features of a society or a social group” (UNESCO)

- Books and manuscripts
- Photographs
- Audiovisual materials
- Genealogy materials, stone inscriptions & other forms of human knowledge

Stories in GLAMs

GLAM institutions:

- Repositories for the human record and creativity
- Collections of various forms of human narrative
- Need appropriate ways to fully present, reconstruct, and disseminate those ‘stories’
- Stories are important elements of cultural heritage¹

**Digital
Turn**

Methodological and epistemological shift in GLAMs (Barber, 2016; Daković, 2021)
‘Storytelling’ to ‘Digital storytelling’

Genealogy data

Genealogy book: record of family names and members (traditionally males) since the Western Zhou Dynasty (Chinese: 西周; c. 1045 – 771 BC)

- A valuable source to understand family history: how families grow, immigrations, important events, celebrities in the family, etc.
- An evidence of social history: events recorded in family history are also events in that area at that time (wars, population policy, etc.)
- A material to educate later generations: instructions recorded on the genealogy book

Genealogy stories towards research:

- Family dynamics and social structures over time
- Patterns of migration and settlement

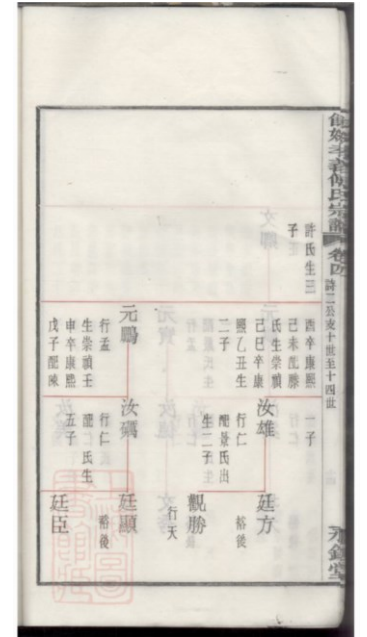

Fig1. Digitized image of a genealogy book

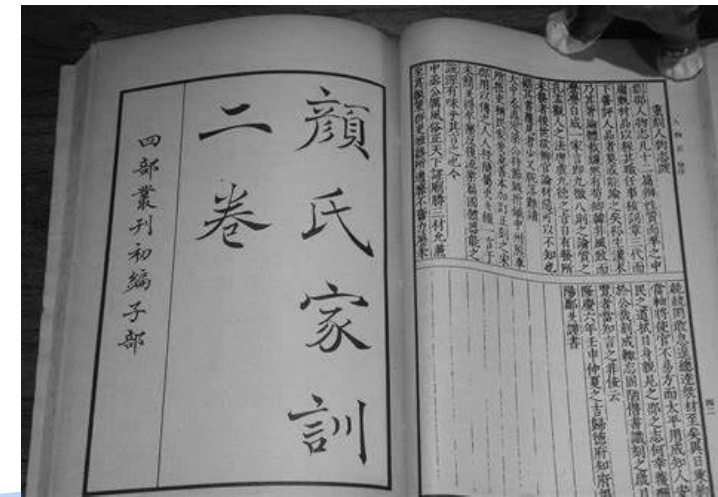

Fig2. Image of Family Yan's instruction

Bakhtin's theory of chronotope

Narrative time-space continuum in the context of cultural heritage resources

“Chronotope” :

- relationship between time and space in literature
- a specific way of organizing time and space within the narrative
- shapes the way the characters interact with each other and with their environment
- reflects the cultural and historical context in which the work was created

Application:

- analyze the ways in which cultural practices and discourses are shaped by the temporal and spatial contexts in which they occur
- provides a framework for analyzing the complex relationships between time, space, and culture

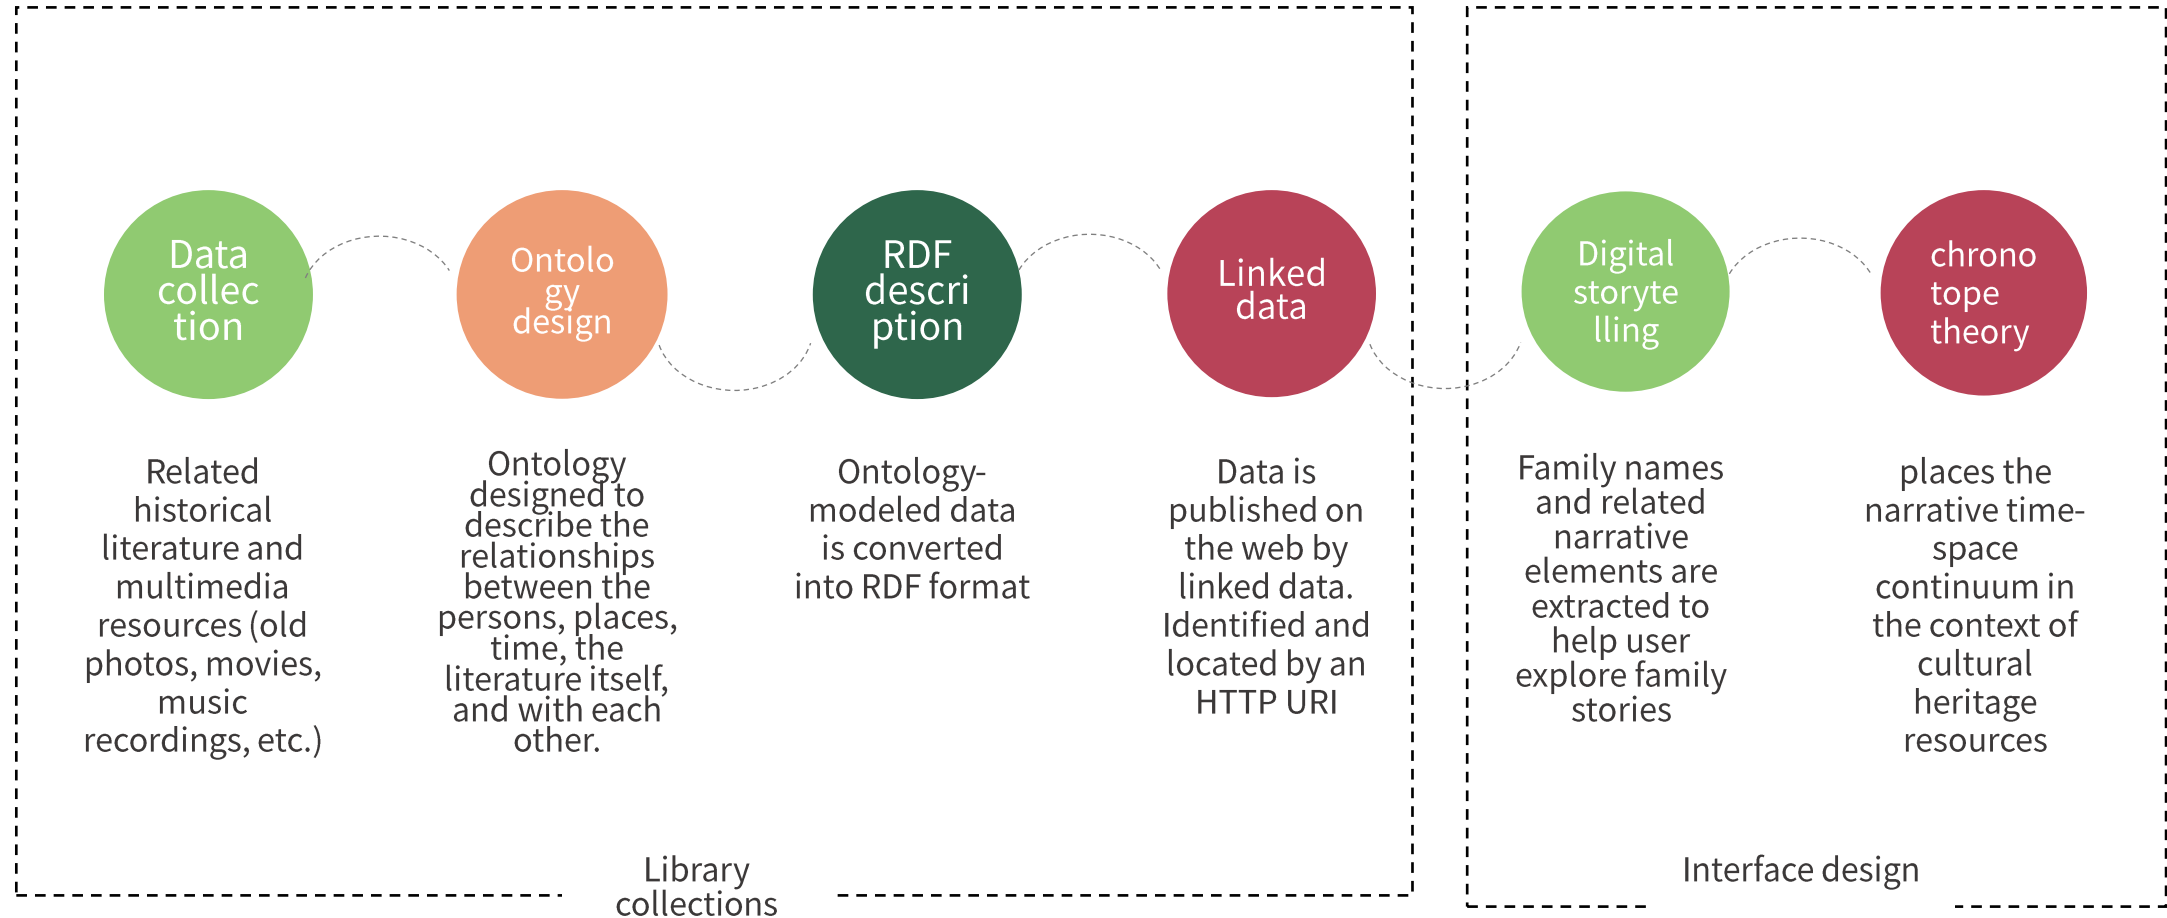

The Chinese Genealogy Knowledge Service Platform

The screenshot displays a search interface for the surname 'Feng' (丰). At the top, there are navigation tabs for '姓氏浏览' (Browse Surnames) and '时空浏览' (Browse Time/Space). Below this is a grid of letters A-Z, with 'F' highlighted. The main content area shows a grid of search results for various surnames, including '方 fang', '傅 fu', '冯 feng', '范 fan', '樊 fan', '符 fu', '费 fei', '房 fang', '封 feng', '奉 feng', and '丰 feng'. Each result shows the number of entries and the number of ancestors, along with the starting year. The '丰 feng' result is highlighted in a larger box, showing a detailed view of the genealogy book '湖南常德县前后乡鄧氏四修族谱六卷首一卷(湖南常德)'. This view includes a description of the book, a list of ancestors, and a list of family records.

- around 70,000 entries
- event ontology designed
- more than 100,000 migration events
- spanning more than 3,000 years

爱新觉罗 艾 安 敖 阿

爱新觉罗

先祖名人1511 | 家谱文献 856

满族姓氏。清朝皇室姓氏，世居今辽宁省新宾县一带。后改汉字姓“金、赵、肇、罗、艾”等。满语“爱新”义为金，“觉罗”义为族。一说“觉罗”音译为赵，“爱新”义译为金者。金者，金人后裔也；赵者，自北宋二帝及其宗室没金，女真人便有人以“赵”为姓，俗称爱新觉罗为高赵，其他觉罗如阿颜觉罗等为民赵。亦有改姓单姓金或保留末字姓罗，或音译为肇、为艾。清末有宣统皇帝溥仪；近代有草编艺人裕庸等，皆姓爱新觉罗。

About this journal

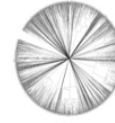

The *Journal of Open Humanities Data (JOHD)* aims to be a key part of a thriving community of scholars sharing humanities data. The journal features peer reviewed publications describing humanities research objects or techniques with high potential for reuse. Humanities subjects of interest to JOHD include, but are not limited to Art History, Classics, History, Linguistics, Literature, Modern Languages, Music and musicology, Philosophy, Religious Studies, etc. Submissions that cross one or more of these traditional disciplines are particularly encouraged.

Please see [our Youtube channel](#) for video content about the journal and the events we have organised

The Journal of Open Humanities Data

- Launched in 2015; open access and peer-reviewed
- Fastest growing data journal for humanities research
- 83 articles published so far
- Vision: be a key part of a thriving community of scholars sharing humanities data
- Two publication types
 - Short data papers (1000 words): descriptions of datasets with high reuse potential
 - Full-length research papers (3000-5000 words): discussion of methods, challenges, and limitations in the creation, collection, management of humanities data
- Editor-in-chief: Barbara McGillivray (King's College London)
- Submission guidelines: <https://openhumanitiesdata.metajnl.com/about/submissions/>

To close

Currently:

- we have library users exploring their own family history
- some research context, such as our open data contest each year

But...

- challenge is to facilitate more collaborations with researchers
- need to find diverse research context to explore the value in the genealogy data
- for the librarians to work closely with researchers in supporting their research journey
