Our partners

Metascience 2025 is a unique global gathering connecting those engaged in the science of science across disciplines, sectors and regions. It wouldn't be possible without the organisations that share our commitment to analysing and strengthening research cultures.

Our conference partners represent a diverse cross-section of the metascience landscape – public research funders and foundations, publishers and data platforms, academic institutions and technology companies – each playing a vital role in fostering more open, inclusive, agile, impactful and rigorous research.

We want to extend a warm thanks to all the Metascience 2025 partners for enabling such a rich agenda, which we hope will provide lots of opportunities for the exchange of ideas, networking and community-building.
