Appendix A Late Minoan I mortuary sites on Crete

Site code: *AGC*

Site name: Agios Charalambos

No of tombs: 2

Tomb type: 1 Pithos burial
1 Cave (?)

References: Iliopoulou 1997: 73-4

Comments: For the purposes of the present study, the pithos burial will be referred to as Tomb 1 and the cave as Tomb 2.

Site code: *AGG*

Site name: Agios Georgios, Mantalia, Kato Kephala

No of tombs: 1

Tomb type: House tomb

References: Georgoulaki 1996; Soles 1973: 152-6; Platon 1959: 372

Comments: MM III/LM I material found in association with this older structure.

Site code: *AGN*

Site name: Agios Nikolaos, Karvonoulakkos

No of tombs: 1

Tomb type: Cave

References: Löwe 1996: no 35

Site code: *AGT*

Site name: Agia Triada (Akrotiri), Ammoutsas

No of tombs: ? ("large cemetery")

Tomb type: Pithos burials

References: Löwe 1996: no 797

Site code: *AIL*

Site name: Knossos, Ailias

No of tombs: 1

Tomb type: Chamber tomb

References: Hood and Smyth 1981: 11; Petit 1990: 50

Comments: Tomb 8.

Site code: *AN*

Site name: Anopolis

No of tombs: 1

Tomb type: Pithos burial

References: Löwe 1996: no 369

Site code: *ARC*

Site name: Archanes Phourni

No of tombs: 3

Tomb type: Built tombs

References: Löwe 1996: nos 390, 392, 394; Driessen and Macdonald 1997: 174

Comments: Tombs Beta, 3 and 20. In Tomb Beta, LM IA sherds with bones, fallen from the upper storey, were found in the undisturbed fill of the Pillar Crypt. One of the building phases within this tomb is also assigned to LM I. LM IA ceramics were recovered from Tomb 3. Driessen and Macdonald suggest that the LM I burials were cleared out for subsequent interments.

Site code: *CHA*
Site name: Chania, Leoph. Nikophorou Phoka
No of tombs: 4
Tomb type: Pithos burials
References: Löwe 1996: no 1068-1069
Comments: Located by the SE bastion of the Venetian defences.

Site code: *CHO*
Site name: Choumeri
No of tombs: 1
Tomb type: Larnax burial (?)
References: Löwe 1996: no 402
Comments: Dated on the basis of the larnax.

Site code: *EP*
Site name: Episkopi
No of tombs: 1
Tomb type: Chamber tomb
References: Löwe 1996: no 411
Comments: Tomb Gamma. Only the lower part of chamber was preserved, but Kanta (1980: 63) suggests that the ceramics, the kidney-shaped chamber and the elliptical larnakes all point to the first use of this tomb being Neopalatial.

Site code: *GAZ*
Site name: Gazi
No of tombs: ? (cemetery)
Tomb type: Pithos burials
References: Löwe 1996: no 428
Comments: Only one pithos burial was excavated.

Site code: *GOS*
Site name: Gournia, Sphoungaras
No of tombs: ? (between 76 and 150)
Tomb type: At least 75 Pithos burials
1 Larnax burial
References: Löwe 1996: no 109
Comments: At least 150 pithoi were recovered from this cemetery in all, of which the majority are said to have been MM IIIB-LM IA.

Site code: *GRA*
Site name: Gra Lygias
No of tombs: 2
Tomb type: Pithos burials
References: Löwe 1996: no 111-112
Comments: For the purposes of the present study, Löwe no 111 will be referred to as Tomb 1, and Löwe no 112 as Tomb 2.

Site code: *GYP*
Site name: Knossos, Gypsades
No of tombs: 1
Tomb type: Round tomb
References: Löwe 1996: no 542

Site code: *KAM*
Site name: Kamilari
No of tombs: 1
Tomb type: Round tomb
References: Löwe 1996: no 468

Site code: *KAS*
Site name: Kastelli
No of tombs: 1
Tomb type: Larnax burial
References: Pendlebury *et al.* 1935: 80

Site code: *KMS*
Site name: Mavro Spelio
No of tombs: 7
Tomb type: Chamber tombs
References: Löwe 1996: no 554-559; Forsdyke 1927: 250-1, 259-60
Comments: Tombs 1-3, 5-7, and 9

Site code: *KNH*
Site name: Knossos, North House
No of tombs: 1
Tomb type: Uncertain
References: Wall *et al.*: 1986
Comments: No primary burials. Warren suggests consumption of human remains.

Site code: *KOM*
Site name: Kommos
No of tombs: ?
Tomb type: Larnax burials
References: Evans 1928: fig 42
Comments: Excavated by local inhabitants.

Site code: *KTT*
Site name: Knossos, Temple Tomb
No of tombs: 1
Tomb type: Shrine
References: Löwe 1996: no 506
Comments: Not used for primary burial in this period, but probably for high status mortuary rituals.

Site code: *KTTA*
Site name: Knossos, Temple Tomb area
No of tombs: 4
Tomb type: Chamber tombs
References: Löwe 1996: no 507-510
Comments: These tombs were not published, but artefacts from them were described by Evans in a letter to the Times newspaper in 1931.

Site code: *KUM*
Site name: Knossos, Unexplored Mansion
No of tombs: 3
Tomb type: Intramural
References: Popham *et al.* 1984: 9, 44, 55, 261 note 6, 309-310, fig 10, pl 26f, pl 33b
Comments: Fetus burials dated through stratigraphy, as no assemblages. Beneath the floors of Room C (burial 1), Room M (burial 2) and Corridor L (burial 4).

Site code: *MAL*
Site name: Malia
No of tombs: 2
Tomb type: Caves
References: Demargne 1945: 13-24; Chatzidakis *et al.* 1963: 60-2
Comments: 'Charniers 2 and 3'.

Site code: *MOC*
Site name: Mochlos
No of tombs: 11
Tomb type: 1 Domestic
7 Pithos burials
3 House tombs
References: Löwe 1996: no 209-210, 212-218; Soles and Davaras 1996: 194
Comments: The 'domestic' burial was a skull in the basement of Building B3. The re-used house tombs were Tombs 4-6, 10 and 22.

Site code: *MSK*
Site name: Megaloi Skinoi
No of tombs: 2
Tomb type: Round tombs
References: Blackman *et al.* 1977: 40
Comments: Tombs 'IIIA' and 'IIIB'.

Site code: *MYR*
Site name: Myrtos Pyrgos
No of tombs: 1
Tomb type: Built tomb
References: Löwe 1996: no 254

Site code: *PAC*
Site name: Pachyammos
No of tombs: ? (less than 213)
Tomb type: Pithos burials
References: Löwe 1996: no 255-256; Driessen and Macdonald 1997: 21

Site code: *PLA*
Site name: Platanos
No of tombs: 2
Tomb type: Built tombs
References: Löwe 1996: no 751
Comments: Tombs Alpha and Gamma.

Site code: *POR*
Site name: Poros
No of tombs: 6
Tomb type: Chamber tombs
References: Löwe 1996: no 454-457; Dimopoulou 1999: 708-10
Comments: The individual tombs are labelled in the present study according to the date of their excavation: (i.e. Π 1940, 1941, 1967, 1986, 1994a and 1994b).

Site code: *PSA*
Site name: Psari Phorada
No of tombs: 1
Tomb type: Pithos burial
References: Löwe 1996: no 754

Site code: *PSE*
Site name: Pseira
No of tombs: 1
Tomb type: Built tomb
References: Betancourt and Davaras 1990: 33-4
Comments: Tomb 10.

Site code: *PYR*
Site name: Pyrgos
No of tombs: 1
Tomb type: Chamber tomb (?)
References: Evans 1928: 75-6
Comments: A tub larnax was recovered by local inhabitants from what was possibly originally a chamber tomb. Dated on the basis of the larnax and gold ring.

Site code: *SMA*
Site name: Smari, Mandres
No of tombs: 1
Tomb type: Pithos burial
References: Pendlebury *et al.* 1935: 81-2
Comments: Pithos sherds were recovered from a rock fissure, though no bones were Noted.

Site code: *STA*
Site name: Stavromenos, Sinanis
No of tombs: 1
Tomb type: Chamber tomb
References: Löwe 1996: no 1171

Site code: *VOR*
Site name: Vorosoi
No of tombs: 1
Tomb type: Pithos burial
References: Alexiou 1976: 621

Site code: *ZAK*
Site name: Zakro, palace
No of tombs: 1
Tomb type: Domestic
References: N. Platon 1971: 120
Comments: A child skull was found high in a wall. These are the only human remains to have been recovered from the palace.

Site code: *ZOU*
Site name: Zou
No of tombs: 1
Tomb type: Cave
References: N. Platon 1960: 293-4
Comments: The cave contained 2 pithoi. Other possible tombs of similar date were noted in the vicinity (an MM IIIB cup/bowl was found in a nearby fissure). There is evidence of MM IIIB-LM IA settlement activity in the area.

Appendix B Artefact types associated with LM I mortuary sites*

Key to Appendix E:

Tomb ID	Individual tomb identification for purposes of cross-referencing with the text, Tables and Appendices G to P
Site	General catchment zone of a town or village, within which the tomb location is situated. This may contain more than one location
Location	Specific toponym within the site area at which the tomb or tomb group is located
Tomb number	Tomb name or number allotted by the excavator. Grey highlighting indicates that the entry comprises more than one tomb, though the exact number is not always known
References	Numbers in bold indicate catalogue numbers in Löwe 1996, where full references are cited

Definitions of ‘secure’ and ‘possible’ tombs followed in the present study:

A tomb is considered ‘secure’ if its use at any point within the LM II-IIIB period can be confidently proposed on the basis of stylistic dating of ceramic vessels within the assemblage. Larnax decoration is not considered a reliable dating mechanism. Alternatively, even if no such ceramic evidence is present or published, a number of tombs are nevertheless included in the present catalogue as ‘secure’ on the basis that all of the other datable tombs in the same cemetery group can be confidently placed within this period. Cases where an assemblage has been found or reported, but the tomb structure destroyed, are counted as secure if it is certain that this was indeed a tomb context (through the presence of a burial receptacle or human remains) and it is datable to within LM II-IIIB.

‘Possible’ tombs, meanwhile, include chance finds of artefacts (usually small numbers of relatively intact vessels or other objects commonly found in burial assemblages, such as daggers or rings) that are not associated with datable ceramics. Tombs with undatable assemblages, which are not spatially associated with ‘secure’ tombs, are also placed in this category, as are tombs dated merely to ‘LM III’ in publication (owing to the possibility that LM IIIC use is being described). Finally, tombs without human remains that are described by their excavators as being of unfinished construction are also categorised here as ‘possible’ tombs.

APPENDIX F Catalogue of possible LM II-IIIb tombs

Key to Appendix F:

Site	General catchment zone of a town or village, within which the tomb location is situated. This may contain more than one location
Location	Specific toponym within the site area at which the tomb or tomb group is located
Tomb number	Tomb name or number allotted by the excavator. Grey highlighting indicates that the entry comprises more than one tomb, though the exact number is not always known
References	Numbers in bold indicate catalogue numbers in Löwe 1996, where full references are cited

For the criteria underlying the classification of tombs as ‘possible’ LM II-IIIB tombs, see Key to Appendix E

APPENDIX G Tombs with possible LM II use, beyond the Knossos area

Mid West:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
MW AR 200	Unspecified ceramics dated to LM II/IIIA1 (Godart & Tzedakis)	In the full publication of the tomb, Papadopoulou has redated the construction and earliest use of this tomb to LM IIIA1, based on the ceramic evidence.	Godart & Tzedakis 1992: 89-90; Papadopoulou 1997: 324-331, 338	Unlikely

Mid East:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
ME MA PE	“some small vessels”, unpublished (Platon)	Recovered with a chest larnax.	N. Platon 1954: 516	Possible
ME MA NO	2 cups, not illustrated. Cup, jug and kylix sherds (illustrated) dated to LM II-III A1	There is no information regarding the individual assemblages to which these vessels belonged. The other material from the tomb is Prepalatial and Neopalatial.	Farnoux 1997: 142	Possible
ME MA AP 2	1 Ephyraean goblet, published	This is the only LM II vessel from the group (otherwise mainly LM IIIA2 and IIIB material, although there is one LM IIIA1 vessel). No information could be recovered regarding burials or artefact find spots, so it is not possible to ascertain the number and composition of individual assemblages involved.	Farnoux 1997: 140-1	Possible
ME PS	1 one-handled cup, published	This is the only LM II vessel retrieved from the tomb. Damage resulting from looting rendered impossible any reconstruction of individual assemblage groups. The rest of the ceramics retrieved (60 in total) are MM II-III to LM IIIA2.	Banou & Rethemiotakis 1997: 26-9, 53-4	Possible

Far East:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
FE MO 1-9	Unspecified (Papadakis)	Unpublished tombs, dated as a group to LM I-III. However, subsequent reports on the cemetery refer to these tombs simply as 'LM III'. See also footnote 8 of the main text of the present study.	Papadakis 1990: 228-9; French 1994: 81; Soles & Davaras 1996:210-1	Unlikely
FE PAL PE 1	Unspecified (Dawkins)	While the ceramics from the tomb are dated to the LM III period (a pyxis lid is illustrated), Dawkins dates two bronze artefacts to the MM period and appears to decide upon an LM II date for the original use of the tomb as a whole mainly on the basis of the re-used ashlar masonry architecture.	Dawkins 1905: 292	Unlikely
FE PAL PL	1 sherd, unpublished, and 2 blossom bowls (Dawkins)	This appears to be a single interment. None of the other sherds are dated or published. The use of stone vessels for dating purposes is tenuous.	Faure 1964: 66; Dawkins 1906: 1-2	Possible
FE PAL PE 2	1 sherd with LM II decoration. Tub larnakes, 1 stamnos, 1 lamp, 1 'scoop' and 2 'fire boxes' dated to LM II-IIIa transitional (Dawkins)	Only the stamnos is illustrated (LM IIIA). The excavator (Dawkins) prefers an early IIIA date for this tomb because of the use of an LM III type slip on the ceramics. He also notes the absence of "characteristic LM II glaze-paint" on the larnakes, although he does describe their decoration as "distinctly LM II" (Dawkins 1906: 6).	Dawkins 1906: 2-8; Paton 1908: 97-98	Possible

APPENDIX H Tombs with possible LM IIIA1 use, beyond the Knossos area

Far West:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
FW CH OM	2 LM IIIA1 or IIIA2 stirrup jars	No information is given regarding interment numbers or the locations of the vessels.	Kanta 1980: 226-7	Possible

Mid West:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
MW AR 27	One or more of the 3 vessels recovered (1 jug, 1 alabastron, 1 stirrup jar)	It is not stated which of the vessels are LM IIIA1, and no find spots are given. As Tzedakis states that LM IIIA1 was the earliest period of tomb use, they were presumably associated with one or more of the five earlier disarticulated burials heaped together by the north wall, among which individual assemblages cannot be reconstructed. Latest tomb use was LM IIIA2.	Tzedakis 1977: 639	Possible
MW AR 35	1 three-handled piriform jar, not illustrated	This vessel was apparently associated with one of the later burials in the tomb (the later burial on the north side). One other, undated, vessel (a 'krateriskos') was also associated with this burial.	Tzedakis 1977: 640	Possible
MW AR 85	1 jug (illustrated), 1 incense burner	It is not stated with which of the two burials in this tomb these vessels were associated. However, these appear to have been the only ceramics recovered from the tomb.	Tzedakis 1980: 920	Probable
MW AR 89	8 jugs (of which 1 illustrated) and 2 conical cups	These were the only ceramics recovered from the tomb, though it is not stated with which of the 13 burials in this tomb these vessels were associated.	Tzedakis 1980: 921	Possible

Mid West (continued):

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
MW AR 173	One or more unspecified vessels	The whole tomb is dated LM IIIA1-IIIB1. No data are given regarding the findspots or types of the LM IIIA1 material. The LM IIIB1 vessels were associated with the 3 burials on the south side, so presumably the LM IIIA1 material was found with the 4 burials on the north side or the 2 children in between.	Pini 1993: 212	Possible
MW AR 177	One or more unspecified vessels	The whole tomb is dated LM IIIA1-IIIB1. No indication of the types or findspots of the LM IIIA1 material. Burials were found in the SE and NW areas of the tomb, and ceramics were associated with both groups.	Pini 1993: 212	Possible
MW AR 184	1 globular alabastron, illustrated (Godart & Tzedakis)	The whole tomb is dated LM IIIA1-IIIB1 and contained 14 burials. 15 vessels were recovered in all (types provided). Only the LM IIIA1 alabastron has been dated or published, however.	Godart & Tzedakis 1992: Pl 145.2; Pini 1993: 213	Possible
MW AR 199	8 vessels dated IIIA1-2	No indication is given of which of them is LM IIIA1. Found with the 8 earlier burials in the tomb.	Pini 1993: 214	Probable
MW AR 200	1 globular alabastron & 2 sherds in the chamber. Several sherds in the dromos (Papadopoulou)	See Appendix G.	See Appendix G	Probable
MW AR 201	3 cups, 1 alabastron, 1 stirrup jar, 1 cup, several fragmentary vessels. None illustrated	The LM IIIA1 material was with one or more of the four earlier burials in the tomb, while the LM IIIA2 with the latest burial. No ceramics later than IIIA1 are noted with these earlier burials.	Pini 1993: 214	Probable
MW AR 203	3 alabastera, 1 1-handled cup, 2 cups, 1 fragmentary vessel, 1 ‘amphoriskos’. None illustrated	Both burials (one articulated, one disarticulated) are dated to LM IIIA1. Both have associated LM IIIA1 ceramics (and no later ceramics).	Pini 1993: 214	Probable

Mid West (continued):

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
MW PI	Unspecified	The excavator states that the ceramics of this tomb point to two phases of use: one LM IIIA1, the other LM IIIA2. The ceramics concerned are not specified.	Tzedakis 1975: 516-7; Andreadaki-Vlasaki & Papadopoulou 1997: 146	Possible

Mesara:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
M AT 1	1 tall alabastron, 1 jug and 1 possible jug (Furumark)	On the basis of their decoration, all three of these vessels could equally be assigned to LM IIIA2. No details regarding assemblage associations are possible because the burials were disturbed.	Furumark 1972: 104; Paribeni 1904: 685-90	Possible
M GO	Several vessels	Disturbed tomb. Not published by the original excavator, but following their notes and photographs. There appear to be only 2 burials, both in larnakes, but it is unclear with which to associate some of the vessels found outside the larnakes (especially those in the pit under larnax B). None of the illustrated vessels are securely assignable to IIIA1, as opposed to LM IIIA2 (<i>e.g.</i> nos 5 and 14). Others are certainly LM IIIA2 (<i>e.g.</i> no 13).	Laviosa 1970	Possible
M KA 1-14	One or more unspecified vessels (Kanta)	The publication does not specify which vessels belong with which tomb, apart from tomb 11 (which is therefore the only datable tomb – assigned to IIIA2 by Furumark). Thus we cannot reconstruct the original assemblages to which the LM IIIA1 vessels belonged. The rest of the ceramics from the cemetery are LM IIIA2.	Furumark 1972: 104-5; Kanta 1980: 99; Savignoni 1904	Possible
M KAMI	1 squat alabastron, 2 cups, 3 tall alabastra, 1 pyxis, 1 possible pyxis, 2 miniature jugs (Kanta)	Tomb plundered and individual assemblages associated with the 2 larnax burials not clearly definable. Most of the ceramics dated by Kanta are assigned to LM IIIA1, but 1 jug and 1 pyxis are assigned to LM IIIA2. The latter has no published findspot, but the former was associated with “LM IIIA1” vessels.	Kanta 1980: 101-2; Levi 1962	Possible

Centre:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
C AR PH 1	2 chest larnakes	The dating of the larnax used for the single burial in the side chamber has been convincingly challenged by Kanta, since the accompanying assemblage included LM IIIA2 ceramics. The larnax from the main chamber was not accompanied by any assemblage, and so is datable only on stylistic grounds.	Kanta 1980: 33; Sakellarakis & Sapouna-Sakellarakis 1991: 85	Unlikely
C AR PH 5	1 chest larnax	This (presumably single) burial was not accompanied by any ceramics, so the dating is based entirely upon the larnax decoration. Kallitsaki and Kanta prefer a LM IIIA2 date for the earliest use of this whole burial enclosure, however.	Kallitsaki 1997; Kanta 1980: 33	Unlikely
C ART	1 jug (Kanta)	The jug was on the floor and therefore possibly associated with one of the earlier (floor) burials of the tomb. However, its exact location in relation to the other dated vessels on the floor (which are LM IIIA2) is unspecified. The whole tomb had previously been dated to LM IIIA2 by Furumark.	Kanta 1980: 45-6; Furumark 1972: 105	Possible
C EP KE 1	2 jugs (Kanta)	Five of the other vessels from this tomb are dated by Kanta to LM IIIA2. Individual assemblages are not distinguished, although there were at least 3 burials. None of the ceramics from the tomb are later than LM IIIA.	Kanta 1980: 61-5	Possible
C EP TA	1 jug	Three burials in the tomb, but it is not specified with which of these any of the three recovered vessels were associated. One of the other vessels from the tomb is dated by Kanta to LM IIIB-C1.	Kanta 1980: 58-9	Possible
C VO	1 jug (illustrated), 2 cups and 1 conical cup dated to “a relatively early stage of LM III A” (Kanta)	Recovered by a local inhabitant with three other vessels and a chest larnax, all presumably constituting a single assemblage. The dating is tentative, however, as only the jug is confidently dated by Kanta to early LM IIIA.	Kanta 1980: 77	Possible

Mid East:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
ME EL ST 17	1 squat alabastron and 1 jug (Kanta)	Single interment with assemblage apparently intact. However, the other 6 vessels in the assemblage are datable only to 'LM IIIA', and may belong to the later part of this phase.	Kanta 1980: 129	Possible
ME MA NO	Cup, jug and kylix sherds (illustrated) dated to LM II-III A1	See Appendix G.	See Appendix G	Possible
ME MA AP 2	1 jug (Farnoux)	See Appendix G.	See Appendix G	Possible
ME MI AP 1	1 tub larnax dated to LM IIIA1/2 (Furumark). Illustrated	Dating is based on larnax decoration only. One of two larnakes in this tomb. No other data are available regarding this tomb's contents.	Furumark 1972: 105	Possible
ME PS KE	1 1-handled cup, 2 cups, 2 stirrup jars, 1 possible kylix, 1 possible stirrup jar	The tomb was plundered and some of the vessels removed, though later retrieved (it is not stated which). However, ceramics recovered during subsequent excavation suggested that one burial by the entrance was LM IIIA2, while that in the centre of the tomb was LM IIIA1. No mention is made of the possible date of the third burial in this tomb.	Banou & Rethemiotakis 1997: 26-7	Probable
ME PS	2 1-handled cups, 2 possible stirrup jars, 1 possible kalathos	See Appendix G.	See Appendix G	Possible

Far East:

<i>Tomb ID</i>	<i>Evidence</i>	<i>Remarks</i>	<i>References</i>	<i>Probability</i>
FE EP 2 & 3	1 jug, 2 stirrup jars and 1 possible piriform jar (Kanta)	There is no information regarding which artefacts are from which of these two tombs, still less from which individual assemblages. The other ceramics recovered were LM IIIA2 and LM IIIB.	Kanta 1980: 150-6	Possible
FE MO 10	1 jug (illustrated) (Soles)	The jug was associated with the later (larnax) interment. The 3 miniature jugs, 2 spouted bowls and 1 kernos also associated with this burial are “probably” LM IIIA1.	Soles & Davaras 1996: 211-5	Possible
FE MY 1	1 possible jug (Kanta)	Tomb was disturbed, and information regarding individual assemblages is not given. The other ceramics are LM IIIA2 to IIIC. One chest larnax was retrieved but the total number of burials is uncertain.	Kanta 1980: 164-9	Possible
FE MY 2	2 certain and 1 possible jug (Kanta)	The excavator’s report suggests that there was only one (chest larnax) burial in this tomb, which was found intact. However, the ceramics date from LM IIIA1 through to IIIC, making it likely that the tomb was used on more than one occasion.	Kanta 1980: 164-9	Possible
FE MY 4	2 possible jugs (Kanta)	Tomb was destroyed, but artefacts and one chest larnax were retrieved. Individual assemblages are not reconstructable. Other ceramics were LM IIIA2, IIIA2-B1, IIIB and IIIB/C.	Kanta 1980: 164-9	Possible
FE MY 5	1 possible cup and 1 possible stirrup jar (Kanta)	Tomb was apparently found intact, with one chest larnax, but the ceramics range in date from (possible) LM IIIA1 to IIIB, and no data are provided regarding numbers of burials or artefact find spots.	Kanta 1980: 164-9	Possible
FE SK 3	1 3-handled jug (Kanta)	Tombs plundered. No information is known regarding the contents of the individual tombs or their assemblages. The other ceramics from the cemetery dated by Kanta are LM IIIA2 and IIIB.	Kanta 1980: 183-4	Possible
FE SP	1 kernos (Kanta)	Presumably at least 2 burials in this tomb (as 2 larnakes were retrieved). None of the other vessels are dated individually, but Kanta suggests an LM IIIA1 date for the tomb as a whole.	Kanta 1980: 173	Possible

Key to Appendices G and H:

Probability

This is a preliminary assessment of the likelihood that the tomb in question actually belonged to LM II or LM IIIA1, on the basis of the current evidence. The criteria underlying the level of probability allotted are as follows:

Unlikely	The suggested evidence for LM II or IIIA1 use has either been subsequently disproved or is based purely on non-ceramic evidence.
Possible	The LM II or IIIA1 ceramic evidence is small in quantity and not part of an intact assemblage.
Probable	An adequate quantity of LM II or IIIA1 ceramic material is present but the assemblage is either not intact or not fully published.

Key to Appendix I:

Tomb ID	Tomb code as listed in Appendix E
Tomb type	b = built tomb c = chamber tomb ca = cave/rock shelter cv = corbel-vaulted tomb im = intra-mural burial lb = larnax burial p = pit pb = pithos burial pc = pit-cave rt = re-used round tomb s = shaft grave xb = disused structure ? = uncertain
Chamber area	Given in square metres For chamber tombs and corbel-vaulted tombs, the figure provided is the area of the chamber; For shaft graves, it is the area at the base of the shaft; For pit-caves, it is the area of the burial chamber ('cave')
Dromos length	Given in metres For chamber tombs and corbel-vaulted tombs, the figure provided is the dromos length; For shaft graves, it is the total depth of the shaft followed by the depth of the burial chamber below the covering slabs; For pit-caves, it is the depth of the shaft ('pit')

Key to Appendix N

Group classification

The correlation between the general functional categories assigned to ceramic vessels in Appendix M and the individual vessel forms set out in Appendix N is as follows:

Appendix M	Appendix N
‘Ritual’ vessels:	Rhyton Kernos Ring vase
‘Consumption’ vessels:	Goblet Cup Conical cup Tankard Bowl
‘Storage’ vessels:	Stirrup jar Jar Alabastron Pyxis Askos Amphora Flask
‘Preparation/pouring’ vessels:	Jug Ladle Thelastron Cauldron Krater Kalathos
‘Lighting/burning’ vessels:	Brazier Incense burner

This ceramic vessel classification system is fairly subjective, and the attribution of certain of the ceramic types to one functional category rather than another (or indeed, to several) could legitimately be questioned. However, this system is not intended to be comprehensive, as opposed to providing broad groupings for the ordering of the different individual types and the consideration of their spatial variations. Indeed, such a classification system cannot be comprehensive, given our lack of understanding of the functional and ideological significance of many of the Late Bronze Age vessel forms on Crete. And this gap in our knowledge poses a problem for any interpretation of the significance of different vessel types within the mortuary assemblages.

We can differentiate on a broad level, between storage vessels (usually closed shapes) and food preparation or consumption vessels (usually open shapes). However, the potential range of function and significance within each is vast, and in the almost complete absence of residue

analyses, it is not yet possible to associate particular vessel types with particular commodities, if indeed such a straightforward association actually existed.

Classification and nomenclature:

For most individual vessel types, the terminology employed by Kanta (1980) will be followed. Most of the forms are fairly standardised in their nomenclature, but a few are very much subject to the choices of definition made by the excavator of the individual site, as observed by Hallager (B. Hallager 1997). In such cases, a frequent lack of published illustration and description has meant that often we must simply accept the terminology used by the excavator. However, where possible, some standardisations have been made for the purposes of the present study, simply in order to facilitate reference and comparison, and these are set out below:

Goblet: this embraces the kylix, Ephyraean goblet and champagne cup

Alabastron: As Hallager observes, this is “one name with many shapes” (B. Hallager 1997, 15-16). Within the present study, Hallager’s definition will be followed, according to which the ‘alabastron’ includes the tall (or baggy) form, the squat, the straight-sided and the globular. The globular version particularly has received a variety of different names from different excavators, including ‘amphoriskos’ (Kanta 1980: 111, fig 103.3), ‘alabastroeides’ (Tzedakis 1984: 371, Pl 293a), ‘stamnos’ (Tzedakis 1984: 371, Pl 293b, e), ‘two-handled krater’ (Godart and Tzedakis 1992: Pl 135.1) and ‘krateroeides’ (Tzedakis 1980: 919, Pl 688f). The straight-sided alabastron is also referred to as a ‘pyxidoeide’ (Tzedakis 1980: 920, Pl 689a-b). The ‘stamniskos’ and ‘krateriskos’ occasionally referred to by Tzedakis with regard to the Armenoi cemetery are never illustrated, but it is here assumed that they would also come under the definition of alabastron used within the present study.

Amphora: this refers specifically to a two-handled, tall, usually piriform closed vessel. ‘Amphoriskoi’ are also included within the category (*e.g.* Ioannidou-Karetsou 1985: 353, Pl 180c). Palace Style jars and other jars, however, are not included, despite the fact that they are occasionally referred to as ‘three-handled’ or ‘four-handled’ amphorae in publication (*e.g.* Hood & de Jong 1952: 264, fig. 10a and c; Hutchinson 1956: 72, Fig 1.6; Tzedakis 1980: 919, Pl 688a).

APPENDIX P Larnax workshop attributions

Workshop	Larnakes	Larnax Types	References	Comments
West Crete polychrome workshop	• MW AR 10 number II • MW AR 24 number I • MW DR	Chest	Kanta 1980: 293	All with polychrome decoration.
Rethymnon workshop	• MW no provenance (3 larnakes) • MW ST (5 larnakes) • MW MA 4 (3 larnakes) • MW AD	Chest	Kanta 1980: 292-3 Mavriyannaki 1972: nos 6, 7, 8	Kanta suggests these represent 2-3 generations of work from same workshop, in LM IIIA2 and IIIB.
Rethymnon workshop?	• MW MA 1 • MW AR 11	Chest	Kanta 1980: 293	Kanta says these are from the same hand, though it is not clear whether she thinks they are from the Rethymnon workshop.
Rethymnon workshop?	• MW MA 1 • MW MA 1	Chest	Kanta 1980: 293	Kanta says they are from the same workshop (though one was probably the work of an apprentice), but it is not clear whether she thinks they are from the Rethymnon workshop.
	• C ARK TS • C THR • FE SP (possible)	Chest	Kanta 1980: 291	Gable projections on the lids of all these larnakes. Two also lack feet.
	• C EP AA • Queen's megaron, Knossos	Tub	Popham 1970: 59, note 26	
	• Gazi no provenance (Heraklion Museum no 11145) • C AM	Chest	Kanta 1980: 291	Decorated with reserved spirals.

	• C GA ME • C GA ME • C GA ME	Chest	Kanta 1980: 20	
Petras-Piskokephalo group	• FE PI • Agios Georgios cemetery • FE PR PA • No provenance (Geneva)	Tub	Kanta 1980: 292; Tsipopoulou & Vagnetti 1997	Tsipopoulou & Vagnetti suggest these belong not only to the same workshop, but also to the same craftsman (1997: 475). They also attribute a stirrup jar to this painter. The larnakes are all of same clay type, and are dated to LM IIIC by Tsipopoulou & Vagnetti and by Kanta.
Episkopi workshop	• FE PA AL 1 • FE EP 3 • FE EP 1 • FE EP 3 • Kastro-Kavousi (no tomb given)	Tub & Chest	Kanta 1980: 143, 150, 156-8; figs 56.1, 63.1-5 Tsipopoulou & Vagnetti 1997: 474	The chests are characterised by their tub-shaped covers and decorative motifs of animals, religious symbols and identical tricurved arch nets.
-	• PAL PE 2 (2) • Myrsini Aspropolia (not stated which tomb) • Siteia (not stated which tomb) • Katsambas (not stated which tomb)	Tub	Kanta 1980: 292, figs 71.10, 102.5	Characterised by the fact that these tubs are short with prominent rims and a handle in the middle of each side. They have a simple motif on each side, of a panel filled with horizontal wavy lines and flanked by a single spiral on either side.
Petras-Achladia workshop	• FE AC (2 larnakes) • Achladia Kimouriotis • Petras Papoura (no provenance) • Petras (domestic) • No provenance (Zurich Museum) • Siteia (no provenance)	Tub & Chest	Tsipopoulou & Vagnetti 1995: 95-106; 1997	The chests are characterised by octopi, horns of consecration with double axes, plastic additions, spirals, leaf-shaped elements, zigzags and X-patterns. NB although Tsipopoulou & Vagnetti put all these larnakes together in one group, they only state directly that the Siteia tub "can be related to the same workshop" as the chests (1997: 474). Regarding the other tubs, they simply say that "the similarity between the Siteia and the Ierapetra larnakes is too close to be accidental" (<i>ibid.</i>), indicating "a special 'style', that seems to be well at home in Eastern Crete".

Kritsa workshop	• Kritsa A • Kritsa B	Tub	Tsipopoulou & Vagnetti 1997: 475-6	This group is perceived as a derivative of the Petras-Piskokephalo group. Both larnakes are from same unpublished tomb and same clay type, but Tsipopoulou & Vagnetti think two different potters are responsible for each. The tomb is dated to LM IIIC.
