

Correction to *Lancet Glob Health* 2018; 6 (suppl 2): S22

Hooli S, King C, Makwenda C, et al. Incidence and degree of hypoxaemia in Malawian infants under 2 months of age presenting to district hospitals and its correlation with mortality: a retrospective analysis. *Lancet Glob Health* 2018; 6 (suppl 2): S22—In this Abstract, the prevalence of chest indrawing should have read 85.6% vs 79.2%, the prevalence of WHO danger signs should have read 68.4% vs 61.0%; $p=0.064$, and the distribution of girls should have read 40.9% vs 39.6%. These corrections have been made as of April 30, 2018.
