According to the British Library catalogue, Add MS 59512, ff. 24-213 contain letters sent by A.S. Hunt to H.I. Bell between 1900 and 1933. However, ff. 24-39 are letters and postcards written by Hunt to O. Gradenwitz in those years. These are published below (1-10, 12, 14-16). We have added a card sent by Gradenwitz to Bell (11) which would have been similar to one other sent to Hunt, now presumably lost, and the letter of Gradenwitz to Hunt (13) to which 14 is a reply. How these letters came into Bell’s possession is a matter of speculation, but we think it likely that he received them from Frieda Gossmann, a niece of Gradenwitz who went to England as a refugee in 1938 and was in contact with Bell. A letter of W.G. Waddell to Bell which references Gossmann and the papyrus collection of Gradenwitz is published in the Appendix.

Hunt’s letters 1 and 3-10 acknowledge receipt of publications sent by Gradenwitz. 1 is dated 30 April 1900; Gradenwitz visited Oxford at the end of the summer of the same year, at the invitation of Grenfell and Hunt. 2 is written in response to congratulations by Gradenwitz on the award of an honorary doctorate from the University of Königsberg, where Gradenwitz taught at that time. Conferred (in absentia) on Grenfell and Hunt in January 1902, it was the first such honour for Hunt, and the second for Grenfell (after Dublin). This letter was written in Egypt, as

1 An edition of the Hunt-Bell correspondence, which begins in 1907, is in progress.
4 Hon. LittD awarded by Trinity College, Dublin in 1900.
was also the case with 3. These two as well as 4-9 contain references to Grenfell and Hunt’s excavations.

10 is the last letter from the time before WWI, which brought an end to Hunt’s contacts with Germany until the 1920s. Hunt met Gradenwitz in Bologna by chance in early 1925, and suggested that Gradenwitz might visit England. This took place in spring 1928, and items 11-13 relate to the visit. 11-15 refer to the Konträrindex, a reverse index of words found in papyri, a work rather forgotten today. The last letter (16), written a few months before Hunt’s death, seems to be a reply to a letter of condolences on the death of Hunt’s son; understandably, the tone is more personal than in the other letters. A personal touch is also evident in 15, where Hunt calls Gradenwitz ‘my friend’; the preservation of these letters was Gradenwitz’s token of friendship.

Note on the transcriptions. Line changes in headings and addresses are indicated by |, page transitions by ||. Not all the details of the postmarks are given.

5 Letter of Gradenwitz to Bell, dated 22.1.28 (BL Add MS 59525, f. 153). Gradenwitz enquired whether Bell and Hunt would be in their ‘Wohnorten’ around Easter or Whitsun; «man könnte dann über manche Papyrusfragen sich aussprechen», he added. Hunt wrote to Bell about this on 2 February 1928 (BL Add MS 59512, f. 177): «It would be better, as you say, if Gradenwitz would communicate again a bit later. Do you know what he wants to talk about at all?». This would have been addressed by the ‘note’ described under 11.

Dear Professor Gradenwitz

Very many thanks for your kind congratulations, and also for your friendly support which must have contributed in no small degree to the decision of the Philosophical Faculty to confer upon us such a distinction; which I need not say is a great pleasure and encouragement to us.

We have just finished 3 weeks of fairly successful work in the west of the Fayûm and are now moving south to the neighbourhood of Tebtunis, where we had such good fortune two years ago.11

Dear Prof. Gradenwitz, I hear from England that during my absence you have been kind enough to send me some papers and one I think some time ago, and another recently. I shall not have the pleasure of seeing them till my return, but there is no reason why I should not write to thank you now.

We have been very busy with our excavations, which have been on the whole attended with good fortune. We began at Hibeh where we added considerably to the stock of Ptolemaic cartonnage; then tried some other places in the East bank which were not very productive; and have

Dear Professor Gradenwitz,

Very many thanks for your “Laterculi Vocum Latinarum” which I found awaiting me on my return from Egypt. It will be most useful and I am very grateful for so valuable a present. We have come back rather earlier than usual this year, in order to get on as fast as possible with Oxyrh. IV, which I hope will be ready by the beginning of July. But though short, the season has I think been a very satisfactory one, and we have made another large addition to the Oxyrhynchus collection. A good deal of ground still remains however, and we shall probably be at work on the site for two more winters at least.

I am staying at my home in Essex for a short time before beginning work again, but shall be returning to Oxford in a day or two.

I am enclosing a list of addenda et corrigenda to Preisigke’s Wörterb., mostly from Oxyrh. Perhaps Mr. Bell has entered them up in his copy of Preisigke more carefully than I have yet done. Dear Professor Gradenwitz,

I see no objection at all to your kind thought of dedicating the Conträr-index to Grenfell’s memory. He would, I feel sure, have appreciated the honour.

As for print, I think that the upright type is the more legible, and I rather prefer the larger of the two (which I have marked with a cross) though of course it will take up rather more space, which may be an objection. The oblique stroke in front of the third letter, where it first occurs, seems to me a good practical method, and probably less unsightly, as you say, || than heavy type.

Much has been written on the Gradenzwitz papyrus collection. Gradenzwitz died in July of 1935, and a letter from his niece Frieda Gossmann, dated 4 October 1935, indicates that she intended to sell the collection and hoped that the University Library of Heidelberg would buy it. This did not happen, and it is unclear whether other institutions in

61. Frieda Gossmann (Berlin 1892 – London 1940), a niece of Gradenzwitz, was dismissed from her position as schoolteacher in 1933, as a result of the racial laws of the time. Uncle and niece were very close to each other: Gossmann’s address in Berlin, Martin Luther Str. 89, was Gradenzwitz’s in 1929 (13); the statement in Herrmann, Kleine Schriften cit. n. 2, p. 416, that Gradenzwitz “in Einsamkeit starb” in Berlin, is curious. Gossmann dealt with Gradenzwitz’s papyrus collection after his death; see the Appendix below. A separate study, currently in preparation, will describe her efforts to leave Germany and her time in Britain.

Dear Dr. Bell,

How kind of you to write and correct the dating of the “Birds” papyrus\textsuperscript{69}! I wish I could have consulted you earlier. I’ll look up Schubart at the first opportunity\textsuperscript{70}.

Have you any unpublished papyri that throw light on education in Graeco-Roman Egypt? I am gathering material for an article for a Centenary Volume\textsuperscript{71}, and I remember your Thonis papyrus\textsuperscript{72}.

Dr. Gossmann has sent me the catalogue of her uncle’s papyri || in the hope that some institution or person here may purchase them. It is

\textsuperscript{67} William Gillian Waddell (Neilston 1884 – Cairo 1945); see Who was Who in Egyptology\textsuperscript{1}, London 2012, p. 428.

\textsuperscript{68} On 25 April 1938, by ship from Bremen to Southampton (information from \textlanglehttp://www.passagierlisten.de\textrangle).

\textsuperscript{69} Perhaps a reference to a publication by Waddell.

\textsuperscript{70} Three papyri of Aristophanes’ Birds had been published by that time. The reference may be to P. Berol. inv. 13231 (MP\textsuperscript{3} 139), published by Schubart and Wilamowitz in BKT V.2, pp. 99-108, no. XVIII.1. It is also possible that Waddell refers to Schubart’s Griechische Palaeographie or even to Papyri Graecae Berolinenses.

\textsuperscript{71} Waddell does not seem to have published anything on this subject.

\textsuperscript{72} SB III 6262 = Sel. Pap. I 1133.
difficult, as some are already published (Plaumann\textsuperscript{73} & Sammelbuch\textsuperscript{74}), but I shall do my best. The first question I am asked is, will she sell individual papyri, & break the collection? I wonder if America would not offer a better field?

With kind regards,

Yours sincerely,

W.G. Waddell

P.S. Jouguet & Guéraud’s Manuel d’écolier\textsuperscript{75} ought to be out any day now: I am looking forward to it, & it will be useful for my article\textsuperscript{76}.

ABSTRACT

An annotated edition of the extant correspondence of A.S. Hunt and O. Gradenwitz and related items: fourteen letters and postcards written by Hunt to O. Gradenwitz; one letter of Gradenwitz to Hunt; one postcard sent by Gradenwitz to H.I. Bell; and a letter of W.G. Waddell to Bell.

\textsuperscript{73} G. Plaumann, \textit{Griechische Papyri der Sammlung Gradenwitz}, SB Heidelberg 1914, Abb. 15.

\textsuperscript{74} SB I 5670-5681, 5692-5693, 5806.

\textsuperscript{76} We are grateful to Cecilia Mambrioni for re-collating our transcriptions against the originals in the British Library, to Chiara Scanga for copying letters of Gradenwitz to Bell, to Holger Essler for helping with the reading of the postal annotations, and to the referees of the journal for some useful suggestions.
