

### **Appendix 3 – Subtitles Preferences**

Thank you for taking part in this research project which aims to develop a set of guidelines for the production of subtitles for the deaf and the hard-of-hearing (SDH) specifically for the Turkish audience. Your opinion will provide me with invaluable information to develop guidelines that meet your needs and preferences and will ultimately help broadcasters to air programmes with subtitles specifically tailored for you.

You are going to watch four clips with subtitles for the deaf and the hard-of-hearing, each of them divided into two or four parts. After each clip you will be given time to answer some questions.

Please do not hesitate to let me know if something is unclear or if you need further explanations. I will be very happy to help.

**Many thanks for your participation!**
