Declaration of interest: The authors report no conflict of interest.

Funding: No specific funding was obtained for this project.

Ethics approval: The study was approved as a service evaluation by the Applied Health in Cancer Governance Group at the lead NHS site, and confirmed using the UK policy framework for Health & Social Care Research online tool (<http://www.hra-decisiontools.org.uk/research/>). Data collection took place within the timeframe covered by the COPI notice issued for COVID-19 ([Health Service \(Control of Patient Information\) Regulations 2002](#)).

Data Sharing Statement: The data that support the findings of this study are available on request from the corresponding author. The data are not publicly available due to privacy or ethical restrictions.

Acknowledgements: The authors would like to thank all the speech and language therapists at the following participating centres who assisted with data collection:
Addenbrookes Hospital Cambridge, Blackpool Victoria Hospital, Buckingham Healthcare NHS Trust, Chesterfield Royal Hospital, Cumberland Infirmary Carlisle,

Darent Valley Hospital, Guys & St Thomas Hospital, Imperial College London Hospital, Ipswich hospital, Leeds Teaching Hospitals, Liverpool Aintree University Hospitals, Mid Yorkshire Hospitals NHS Trust, Newcastle-Upon-Tyne University Hospitals Foundation Trust, North East London Hospitals, Northamptonshire Healthcare, Northwick Park Hospital, Nottingham University Hospital, Oxford University Hospital, Royal Marsden Hospital, South Tees Hospitals, Southend University Hospital, University College London Hospital, South Tyneside and Sunderland City Hospitals Foundation Trust, University Hospital Wales Cardiff, University Hospitals Plymouth, York Teaching Hospitals.

We also acknowledge the role of the RCSLT Head and Neck Clinical Excellence Networks in facilitating this audit. This work used data provided by patients and collected by the NHS as part of their care and support. We are grateful to these patients for their participation in this audit. We are particularly grateful to the National Association of Laryngectomy Clubs for valuable discussions and for assisting in dissemination of findings. The authors received no specific funding for this project.
