The animals of our country
The Grade 2B learners of G.J. Podile Primary School are going on a trip to the Kruger National Park.
They are using the school’s yellow bus. The bus left Ndumiso behind because he woke up late.
The learners told the bus driver to go back. They found Ndumiso standing in front of the school, crying.
They are going to learn about the Big Five animals in our country.
The first animal they came across was an elephant. It has a big nose and long horns. Along the way, they saw a buffalo with its calves.
They saw a lion lying in the bush eating meat.
They saw a leopard sleeping on top of a tree.
They went on and saw a rhino with its horn cut off. When they went home, they were very happy.
The animals of our country
