We are planting seeds
Acknowledgements

The following partners have played a valuable role in the co-creation of this storybook:

The North West Province Department of Education, Ngaka Modiri Molema District, South Africa.
The Department of Basic Education, Directorate: Rural Education, South Africa.
London South Bank University, United Kingdom.
The Economic & Social Research Council (ESRC) (ES/T005149/1), United Kingdom (funder).
The Grade R learners started to look for seeds to plant.
The learners saw tomato, carrot and cabbage seeds.
The children started to plough in the garden. They started to dig in the soil to plant their seeds.
After they planted their seeds, they started watering the garden.
After a while, the planted seeds were growing.
Their tomatoes grew big and red. The insects were now a problem. They wanted to eat the tomatoes.
The children looked for insect killers to protect their plants.
They were very happy to see their plants growing well. They had enough vegetables to sell at the market.
We are planting seeds
