

**TABLE 4.** Events in our cohort

| WT type | Age at dg (mo) | Event               | EFS (mo) | Outcome | OS (mo) |
|---------|----------------|---------------------|----------|---------|---------|
| ET-WT   | 75             | local relapse       | 10       | NED     | 96      |
| ET-WT   | 17             | local relapse       | 10       | NED     | 73      |
| ET-WT   | 17             | metachronous        | 35       | NED     | 143     |
| ET-WT   | 8              | other malignancies* | 12       | Died    | 20      |
| ST-WT   | 49             | distant relapse     | 15       | NED     | 40      |
| ST-WT   | 56             | distant relapse     | 28       | NED     | 182     |
| ST-WT   | 67             | distant relapse     | 11       | NED     | 13      |
| ST-WT   | 62             | distant relapses    | 10 + 19  | Died    | 36      |
| ST-WT   | 9              | metachronous        | 13       | NED     | 144     |

WT - Wilms tumor; ET-WT - epithelial type Wilms tumor; ST-WT - stromal type Wilms tumor; EFS - event-free survival; OS - overall survival; mo - months

NED - no evidence of disease

\*neuroblastoma followed by myelodysplastic syndrome
