Acknowledgements

ZT is supported by the Dunhill Medical Trust (grant reference: RPGF1902\147). DD is supported by the Wellcome Trust through a fellowship award (WT107467) and through Medical Research Council Unit for Lifelong Health and Ageing at University College London (MC_UU_00019/1).

Declarations

AM is the main author of the 4AT (see www.the4AT.com); there is no financial conflict of interest. AM was co-chair of the committee that produced the 2019 Scottish Intercollegiate Guidelines Network (SIGN) Guideline on Delirium in which the 4AT is recommended. AM and ZT co-developed the DelApp test of inattention; there are no financial conflicts of interest. The other authors declare no competing interests.
