Restorative Justice

Restorative Futures !

A restorative approach advocates a proactive rather than a reactive response to public policy in a rapidly changing world, allowing us to more effectively address issues related to health, human rights, climate, urbanism, diversity, equity and inclusion in resource-poor settings both locally and globally.

Restorative practice introduce a way of working with conflict that puts the focus on repairing and mending harm that has been done. It is an approach to conflict resolution that includes all parties involved.
