

Supplementary Material

Elena Scarpa et al. doi: 10.1242/bio.20135504

Movie 1. Time-lapse movie showing a 2D collision compared with a 1D collision on fibronectin stripes. Their respective tracks are shown below each movie.

Movie 2. Time-lapse movie showing the possible outcome of cell-cell collisions on 1D culture. Cells can either undergo CIL, form a cell-cell adhesion, or walk past each other.
