- Abstract:** *Purpose* – To date, few studies have been undertaken to make explicit how microblogging technologies are used by and can benefit scholars. This paper aims to investigate the use of Twitter by an academic community in various conference settings, and to pose the following questions: Does the use of a Twitter-enabled backchannel enhance the conference experience, collaboration and the co-construction of knowledge? and How is microblogging used within academic conferences, and can one articulate the benefits it may bring to a discipline?
