Supplementary Figure S1. Kernel density plot of age at study entry questionnaire.

Supplementary Figure S2. Plot of the scaled Schoenfeld residuals for change of skirt size (CSS) with smoother.

Supplementary Figure S3. Estimated survival functions for 3 values of change of skirt SS (CSS) (CSS=0, CSS=1, CSS=0.287 (median CSS)) with other covariate values set to their mean value. Solid lines represent estimated curves based on the Cox model, dashed lines represent estimated curves based on the exponential model.
