

**Table 4. Congruency between original and alternative case definitions in the cancer sample (N=278).**

		<b>Case based on <math>\geq 4</math> of 7 symptoms +B<sup>a</sup></b>	
		<b>No</b>	<b>Yes</b>
<b>Case based on <math>\geq 5</math> of 9 symptoms +B</b>	<b>No</b>	170 (61.2%)	3 (1.1%)
	<b>Yes</b>	4 (1.4%)	101 (36.3%)

<sup>a</sup>Criterion B was not administered to 3 patients in the cancer sample who did not meet the 5 symptom criterion in the original definition. For estimation purposes was assumed that it would have been met based on the 91% rate of meeting Criterion B in the cancer sample
