

Table S1. Daily doses of antihypertensive medications

Drug*	Daily dose (mg)	N	Drug*	Daily dose (mg)	N	Drug*	Daily dose (mg)	N
ACE inhibitors								
Captopril	25	1	Candesartan	2	2	Diltiazem	60	1
	50	1		4	19		120	40
Cilazapril								
	0.25	1		8	28		180	31
	0.5	58		12	2		240	26
	1	38		16	21		360	3
	1.25	24		32	4	Felodipine		
	1.5	4	Losartan	12.5	4		2.5	73
	2.5	183		25	11		5	107
	3.75	3		50	24		7.5	1
	5	463		100	4		10	72
	7.5	1		200	1		15	1
	10	10	β-blockers				20	3
Enalapril	2.5	1	Atenolol	25	6		30	2
maleate	5	7		50	17		40	1
	7.5	1		100	13		60	2
	10	5	Carvedilol ¹	6.25	2	Verapamil hydrochloride		
	20	14		12.5	3		80	2
	40	4		25	4		120	1
Lisinopril	2.5	2		50	5		240	3
	5	2	Celiprolol ¹	200	8		720	3
	10	3		300	1	Diuretics		
	15	1		400	8	Amiloride ³	2.5	5
	20	2	Metoprolol	23.75	1		5	9
	40	1		50	1	Bendroflumethiazide (Bendrofluazide) ²	1.25	1
Perindopril	2	1		47.5	164		2.5	193
	4	1		71.25	4		5	17
Quinapril	2.5	2	Nadolol	95	134	Bumetanide⁴		
	5	20		142.5	1	Chlortalidone ²	12.5	6
	7.5	1		190	29		25	6
	10	37	Pindolol	40	5		50	1
	15	3		80	1	Furosemide⁴		
	20	81		160	1		20	8
	40	22		5	1		40	51
α-blockers								
Doxazosin	1	3		10	1		60	1
	2	5		15	1		80	14
	4	9	Propranolol	20	3		100	1
	6	2		40	2		120	1
	8	3		60	1		160	1
Terazosin	2	6		80	1		240	1
	2.5	1		160	2	Hydrochlorothiazide²		
	4	6	Sotalol	40	2		6.25	5
	5	9		80	3		12.5	324
	10	4		120	2		25	13
	15	2		160	13		50	8
Calcium channel blockers								
Amlodipine	2.5	7	Indapamide²				2.5	7
	5	45	Spironolactone ³	12.5	7		25	16
	10	25		50	1		50	1
							100	1

*Either as monotherapies (1 drug) or polytherapies (combined with up to 3 other antihypertensives). ¹Vasodilating beta-blockers; ²thiazide(-like) diuretics; ³potassium-sparing diuretics; ⁴loop diuretics.

Table S2. Differences in blood pressure (BP) variables between untreated participants and those on beta-blocker or diuretic monotherapies¹

Monotherapy	N	Brachial systolic BP (mmHg)	Brachial DBP (mmHg)	Aortic systolic BP (mmHg)	Augmentation index	log _e (excess pressure integral (mmHg.s))	Backward pressure amplitude (mmHg)	Reflection index (x 10 ⁻³)	Pulse wave velocity (m/s)
Beta-blockers									
All [†]	134	-13.4 (1.5)*	-5.8 (0.9)*	-12.2 (1.4)*	0.8 (1.0)	-0.03 (0.03)	-1.4 (0.5)*	9.7 (3.0)*	-0.6 (0.1)*
Non-vasodilating	129	-13.0 (1.5)*	-5.8 (0.9)*	-11.7 (1.4)*	0.8 (1.0)	-0.02 (0.03)	-1.2 (0.5)*	11.1 (3.0)*	-0.5 (0.1)*
Diuretics									
All [‡]	86	-11.5 (1.8)*	-4.0 (1.1)*	-11.0 (1.7)*	-3.7 (1.2)*	-0.15 (0.04)*	-2.6 (0.7)*	-1.2 (3.6)	-0.4 (0.1)*
Thiazide(-like)	68	-11.1 (2.0)*	-3.5 (1.2)*	-10.1 (1.9)*	-2.6 (1.4)*	-0.14 (0.04)*	-2.7 (0.7)*	-1.6 (4.0)	-0.4 (0.1)*
Loop + thiazide(-like)	78	-11.7 (1.9)*	-4.0 (1.1)*	-10.9 (1.8)*	-3.3 (1.3)*	-0.14 (0.04)*	-2.7 (0.7)*	-2.1 (3.8)	-0.4 (0.1)*
Potassium-sparing + thiazide(-like)	75	-10.8 (1.9)*	-3.6 (1.1)*	-10.3 (1.8)*	-2.9 (1.3)*	-0.14 (0.04)*	-2.5 (0.7)*	-0.4 (3.8)	-0.4 (0.1)*

¹Values are differences in means (standard error) compared to untreated (adjusted for age, sex and ethnicity). *Significantly different to that of untreated hypertensives. [†]Vasodilating and non-vasodilating beta-blockers. [‡]Thiazide(-like), loop and potassium-sparing diuretics.

Table S3. Differences[†] in blood pressure (BP) variables between participants on β-blockers (all or non-vasodilating beta-blockers) and those on drugs from other antihypertensive classes

Comparison group		Reference group (βB regimens)	BP variable	Beta-blockers included in analyses	
				All [‡]	Non-vasodilating
CCB regimens	CCB or	βB or		N=343	N=320
	CCB + ACEI or	βB + ACEI or	bSBP	-0.1 (1.4)	-0.5 (1.4)
	CCB + D or	βB + D or	bDBP	-0.3 (0.8)	-0.7 (0.8)
	CCB + D + ACEI	βB + D + ACEI	aSBP	-1.9 (1.4)	-2.6 (1.4)
			AIx	-4.1 (0.9)*	-4.4 (0.9)*
			log _e (EPI)	-0.10 (0.03)*	-0.11 (0.3)*
			Pb	-2.1 (0.5)*	-2.2 (0.5)*
