What is information governance?

Recognition of information as an asset that requires stewardship:

- Leadership
- Management
- Balance of societal goals
- Ethical behaviour

What is information governance?

Information governance defined

Information governance is the specification of decision rights and an **accountability** framework to encourage **desirable behavior** in the valuation, creation, storage, use, archival and deletion of information. It includes the processes, roles, standards and metrics that ensure the **effective** and **efficient** use of information in enabling an organization to achieve its goals.
