

Aesthetic outcome after breast conserving surgery and either intraoperative radiotherapy or whole breast external beam radiotherapy for early breast cancer: Objective assessment of patients in a randomized controlled trial in Lublin, Poland.

Tables

Table 1. Characteristics of the study population (n=29).

<i>Patient</i>	
Age, median (range)	56 (49 to 79) years
Height, median (range)	163 (152 to 174) cm
Weight, median (range)	75 (53 to 104) kg
BMI, median (range)	27.3 (20.5 to 39.3) kg m ⁻²
<i>Tumour</i>	
Size, median (range)	15 (7 to 50) mm
Side, left/right	13/16
Quadrant, n	
Upper Outer	21
Upper Inner	5
Lower Outer	2
Central	1
Grade, 1/2/3	1/24/4
<i>Therapy</i>	
Chemotherapy, no/yes	14/15
Adjuvant hormonal therapy, no/yes	5/24
